7. DAMAGE ASSUME: REMARKS: MAJ CONE REPORTED SIGHTING 4 SAMPANS IN A RIVER AT YD 245805 WHICH IS IN THE DMZ AREA.

J CONG SAID HIS A/C did not ENTER the DMZ AREA.

THIS TIME A ship over 100' long WAS picked up YD 575655. HIS A/C WENT IN FOR A VISUAL SIGHTING & SHIP FIRED A FLAK INTO THEIR GENERAL AREA.

REMARKS:

A NEW CONTACT WAS ESTABLISHED IN the VICINITY OF VINH

J CONG REMARKED that they were SERIOUSLY ATEMPTING A VISUAL RECCE OF the SHIPS IN this AREA.

MISSION M1R1-52 (CONT'D)

MADE 4 RUNS BA TO SPECIAL FORCES CAMP — NEGATIVE RESULTS, AS HAS BEEN THE CASE IN THE LAST TWO DAYS. TERRAIN FEATURES PERMIT POSITIONING CURSORS WHERE WE KNOW CAMP MUST BE, BUT BUILDINGS ARE NOT RADAR SIGNIFICANT. SEVERAL BRIDGES TO THE ENE OF THE CAMP ARE RADAR SIGNIFICANT AND SUITABLE FOR USE AS OFF-SET AIM POINTS IN THEIR OWN VICINITY — BUT BECAUSE OF THEIR DISTANCE FROM BA TO, GREAT ACCURACY IN THE VICINITY OF THE CAMP COULD NOT BE EXPECTED.

RETURNED TO DA NANG TACAN, LOCATING SEVERAL SIGNIFICANT AIM POINTS TO THE SOUTH: METAL STORAGE SHEDS IN HOI AN AREA; SEVERAL BRIDGES OVER THE RIVERS TO THE SOUTH. B/N WILL DEBRIEF THESE IN DETAIL WITH CAPT. HORNBACHER IN GROUP BRIEFING HUT.

MADE SEVERAL RUNS TOWARD MON KI MOUNTAIN FROM THE SOUTH. BROKE OUT RELATIVELY BRIGHT RETURN BETWEEN PANAMA AND HAWK BATTERY. WILL CHECK TO [redacted] ASCERTAIN THAT REFLECTOR HAS BEEN

DECLASSIFIED

DECLASSIFIED

MANAGED TO QUITE EASILY BREAK OUT TWO MK-21 ARRESTING CABLES ON RUNWAY 35L, AND THE RADAR REFLECTORS TO EITHER SIDE OF THE RUNWAY, JUST SHORT OF NORTHERN CABLE.

DECLASSIFIED

21 November 1966

Condolo 44, M1121-54

Off the deck at 1710, checked in with Joyride, Panama and Moonman. Proceded to Surgu lake 22 miles North North West of Thin Phuoc We use a hard return (building near an airfield) as an update point for the computer. Flew into the update point at 16000' 300 KIAS and updated computer as well as a practise attack to make sure the computer was generating the correct release info. System checked out good. Turned in on a heading of 140 for the target which is a mountain peak about 2200 meter south east of Thin Phuoc. ~~which~~ the camp itself (Thin Phuoc) makes a very nice Aimpoint with several returns in the area. Used the brightest return in the center of the complex as my offset Aimpoint. Tried to contact King Lear Alpha on an assigned frequency by Moonman. We tried four frequencies assigned by moonman and could not

DECLASSIFIED

DECLASSIFIED

raise King Bear Alpha the, TPQ-10 controller. This is the third day in a row that we have not been able to contact King Bear Alpha. After trying to contact King Bear Alpha for several minute we continued making practice runs, on two of the runs we were able to observe the target and the camp that we were using as the aimpoint. Both times computer put us on target and generated proper release signal. All three days we have had good systems attacks but nobody to monitor them. The aimpoint is very well defined in fact the entire camp breaks out on a heading of 140. All three days I have picked up the aimpoint by at least ten miles and have had ample time to program my computer for release. Until we get coordination with King Bear Alpha our work is in vain.

Ray L. Springfield

DECLASSIFIED

DECLASSIFIED

[redacted]

22 NOV 1966

Condole # 28, M1122-42

Took off at 1343. Checked in with Joyride, [redacted] attack on small lake just north west of thein Phuoc about [redacted] lake is used as an update for the computer. On practice run systems checked out good. Switched steering to tgt which is a mountain peak south west of thein Phuoc, cursors fell on tgt but when I switched to AP #1 cursors shifted too far left and on improper heading. Error was in the computer under Airpoint #1. Typed in bearing and distance from tgt to airpoint under airpoint one and the second run was on the money. Good run. System worked as advertised. Contacted King Lear "A" on button purple and told them our intentions. We would make a systems attack on the target at 16000', 400 KTAS and they would monitor our release. I gave them my inertial

DECLASSIFIED

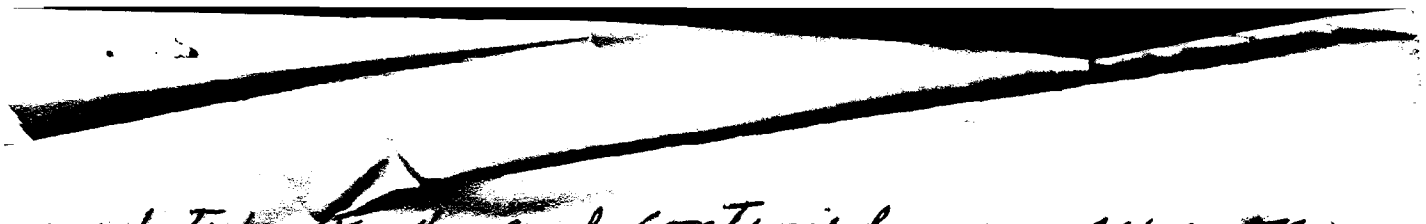

DECLASSIFIED

[redacted]

doppler winds which were real accurate and told him to crank these winds into his computer so that our winds and TAS would correlate. Hawkeye has trouble to be lock on us when we were still 20 miles from the point so he advised us that a run in from that heading would not be effective since they had to have a skin paint to monitor our release. We asked for a south to north run in which would bring us closer to their gear located at Quang Nai. They locked us up and we turned inbound on Tgt. Lead Tgt locked up using offset aimpoint and had the computer in attack but four miles from release TPQ broke lock and could not monitor our release. King Fear advised us that Tgt was out of range for their gear, Next we accepted target closer to their position. The first was a bridge at Tuong Van. I gave him the

DECLASSIFIED

DECLASSIFIED

updated winds and continued my run on the bridge. Computer generated a release signal 4 seconds prior to TPQ-10. Next we ran the bridge at Quang Nai, Highway bridge just north. Computer generated a release signal at same time TPQ-10 was at the bridge. Lead after this run checked out with King Lear "A" checked in with Monroe, GCI to GCA.

Note: Received outstanding cooperation from King Lear Alpha. Their gear will just not track as far North as Chin Phuoc, therefore TPQ-10 monitored releases cannot be used in this area. Suggest targets within twenty nautical miles of their sight for max effect.

[illegible] approximately 45 minutes
[illegible] great amount of instrument traffic.
Practical [illegible] of Ch To and made
5 runs on headings of 270° and 180°
approaching the Camp. It will be assumed
that the optimum condition for
navigation.

Will no joy on [illegible] and
camp. We continue [illegible] more or less
of the Ac Camp on [illegible] the
surrounding hills. Always, [illegible]
VFR they evidently see camp more distantly
[illegible] the exact physical location of
the camp with respect to the [illegible] and
more directly to the south, no [illegible]
can be dropped.

As a dispersion method, the [illegible] of
the camp might be [illegible] constructing [illegible]
addn. Take over and call strikes on the enlarged
area. We are certain that the AC will [illegible]
[illegible] in the camp and [illegible].

Block-Time arranged through Miami for
a radar hand-off to Panama, Rome

M1123-19

Off the deck at 1342, checked in with Joyride, Panama, Sandshark "B" and got a handoff to King Lear "B". Made a practice attack on Chu Lai. Search radar was degraded to the point of almost hopelessness. Spoking covered the entire DVRI however could distinguish very hard targets. Weattack run on chu Lai was unsuccessful. Five seconds prior to release all the symbols disappeared from the VDI. attack light out was only indication of release. Contacted King Lear "B" and gave them our altitude, TAS and wind information also the target (Thien Phuoc). King Lear ran us into the target three times from south to north and one last to west and all four times no joy on search radar due to severe spoking on the scope. Also lost video when any "9" force was applied to AC. Mission unsuccessful due to degraded systems. Checked out with

REMARKS: NO NAVREST

Remarks:

Condole 18 was working with Dev D. We reported in and we were going to make 5 runs on 5 different targets. At release of our first bomb we lost com. (both transmitter & receiver. At this time we aborted & returned to jettison area 090/roughly 20 to 30 mile and jettisoned the remainder of our ordnance. Due to pitot static system acting up I remain airborn until dailight. I had a VGI tumbled and a DME on the tacan which would not work until 7-10 miles. I let down visual and try to enter from over the water east of the field. Unable to because of rain. I try tacan #1 with poor DME. At 5000' alt stuck and I wave off. At this time I squacked emergency on IFF and made another visual pass cross checking with tacan. I landed 35 MIN pass ETR. Next way off would have been divert. TJ Randall

DECLASSIFIED

CONDOLE 21 M1129-21 CEP EVAL

CREW JACOBSON/BUTCHKO

Arrived in the target area 1437. Contact established with TACA) CONDOLE 46 Several practice runs were made at 14,000 ft exhibiting positive target ID. Contact established with DEV B. One practice run made from SW to NE on heading 060. System on attack at 10 miles, lock straight path selected with system set for practice release solution. No in range lights or weapon release symbol generated. Gunsight tracking OK - PHD Steering OK, VVD Steering OK. TGT Symbol tracked normally. With exp available a probable release point was computed to DEV B. They concurred with their equipment. Another run was set up from NE to SW for actual manual drop. Ordnance panel was set up and verified. System stepped into attack at 8 miles. Once again all indications of a normal solution were generated

DECLASSIFIED

DECLASSIFIED

CODDLE 01 M 1139-21 (CONT)
except for the weapon release
symbol and no range indication.
Pilot commenced at 7 mile in
descending (15°) straight path. Gunsight
tracking was good and on target.
Bomb gone at commit. No release
signal was generated ie no release pulse
no shuttle drop or ordnance panel.
Probable release point was broadcast
as target symbol tracked down the VDI
DEV. B confirmed the release point
with their equipment.
No further attempts were made
for weapons drops. The flight was
then recovered by DEV/B on a
normal TPQ recovery.

30/4/6

REMARKS: NO MOREST — unable to establish contact on channel Blue. We could hear them but they didn't answer our transmittions. After establishing contact we made two dummy runs with TPQ monitored by Det "B". Flights flown at 11,000' due to flak fire up to 10,000'. All runs were made on a 240°

DECLASSIFIED

DECLASSIFIED

II

11,000' and 300 Kts indicated, 372 kts true. We call in bound at 16 miles at which time we were in the clouds. Called 10, 8, 6 miles and mark. TPQ [redacted] with our yet they indicated we were 150 meters left of course. With this run-in heading the bridge, which was our off set and point would go off the side of our scop about four miles prior to release. Run-in heading we would like to have was 060°, but DEV B were unable to paint us in that direction. On the second run same calls & same run-in our mark again concurred with TPQ, yet they indicated 20 meter left of course. We made no correction to bring in our left of course indication given by Dev "B". Our third run was live with no release, due to faulty racks. All system indication were good. On the third run no indication was given as to our mark & TPQ's mark. On our fourth run still same altitude, air speed & run-in heading we had one bomb release and spotted at 350 [redacted]

DECLASSIFIED

DECLASSIFIED

III

at 10:30. All indications look good on systems. We were unable to get any more automatic releases. At this time we [redacted] to TPQ [redacted]
We were still unable to drop our ordnance until we made our third pass using snakeye switch on and stepping them off with manual pickling each bomb. This still only worked with center line rack and it is felt that ordnance racks were at fault instead of automatic releases with systems.

J J Randall
Capt USMC
