Got off late in DT-12 (after allowing time for hot air drying of air conditioning system) with 25 D-1's, still hung from last night's systems hot pad. Beamed TPO with King Lear A. Through Candole. Considerable time spent with King Lear, as he brought their gear up and we provided systems and information. Normal TPO thereafter.

To allow for adequate fuel upon return to Da Nang, had time for only one radar survey run at Ba To reflectors. Reflectors spotted at 16 miles, approximately 12,000'. Although complete RS was not effected, mission provided excellent refresher for 2d Lt. Millheim, recently reassigned to Squadron as B/W. Good systems throughout mission.

Prebriefed targets and mission of road recon. Took off as planned at 0055. Headed for DMZ, when in area. Updated systems on the mouth of river in the DMZ. Proceeded up highway 101 to target, fully computer at Last 50's, using target as aim point. Target coordinates 1709N E 10655, 132'. There were no indications of moving targets enroute to this target. Acquired the target at 10 miles, and made a gliding Straight Path Dive from 7000' out at 450' releasing 9 MK 81's. All good, no duds noted. Pulled off heading 040° out to sea made a port turn and came back to northern most point of recon and proceeded down highway one. Near the lake at Tam Tung acquired a moving target lock, attempted a rocket run, but system indicated valid data tip and no release pulled off to port, out to sea then proceeded back to second target, Truck Park at Ben Lang. Using the tip of the land in the lake as an offset 113°03' / 13,528' computed from OAP computer a straight path attack was

made, delivering 6 MK 81's. No duds and a large orange explosion was noted. * Pulled off target and proceed up north for AMT1 targets. A possible target was found in approximately the same area as the first on the way back to DM7. Again no system release, Hit being full and proceeded home. Landed with self contained mode and GCA monitor 4000# in chocks.

* Platform tumbled as we pulled off this target.

REMARKS:

CHECKED ON STATION OVHD #50 W/ MOONMAN @ 1156 - AT THAT TIME
 KMC LR 'A' WORKING A LOSS FLT AND CDR 330 WAS AHEAD OF ME, ALREADY
 ORBITING #50 W/ MOONMAN. AFTER COMPLETION OF CDR 330, KMC LR A
 PROCEEDED TO WORK AN OXFORD⁽⁰³⁾ FLT THAT DID NOT RID THROUGH
 MOONMAN AND CONSIDERED CDR 331 #2 IN PATTERN - FINALLY MOONMAN
 INSTRUCTED ME TO CONTACT KMC LR 'A' ON PURPLE - KMC LR A INFORMED
 ME I WAS #3 IN PATTERN - I REPLIED THAT I HAD BEEN IN
 STATION 0150 AND HAD 0115 REMAINING ON STATION AT WHICH TIME
 THEY SUGGESTED I RETURN HOME. I CONTACTED MOONMAN TELLING THEM
 I WOULD STILL LIKE TO DROP - MOONMAN CONTACTED LANDSHARK 'A'
 AND OBTAINED CLEARANCE FOR ME TO GO ON TGT AHEAD OF
 CDR 331 - DROPPED ONE PASS AT 1305 AND RETURNED HOME
 WITH MINIMUM FUEL GCA STILL HAVING ENOUGH FUEL FOR UDON
 DIVERT - SUGGEST FLTS CHECK THROUGH MOONMAN AS A

REMARKS:

Dev "E" attempted five runs on first target. The TPQ-10 gear was unable to maintain contact with the aircraft.

Consequently the controller advised us to contact Joyride for divert. Doing so, we contacted Joyride - then Dev "B" whose gear failed 1 minute after contact. Fuel precluded further assignment of targets by Joyride, and Joyride directed RTB, aborting the mission.

LT CLARK / CAPT SPRINGFIELD

Off the deck at 1100 H. Checked in with Joyride, Moonman, LSM. Updated Computer on Quang NAI highway bridge and ran a velocity correct. Inertial/Doppler derived winds look real good. Made our first run on Bato on a heading of 210° , alt 10,500 picked up reflectors at 11nm got TIR Ground lock 7nm out Stepped Computer into attack and made practise run everything looked good. Switched steering to GIA VUC, range and bearing look good picked it up at 11nm a series of weak returns in the target area am not positive that these returns were reflectors, but judging from terrain features would say that they were. Went North and typed in coordinates of HA THANH. Identified Target Area at about 19nm on 015 heading 10,000'. Positively identified target about 10nm out. Updated Computer on Quang NAI high way bridge and came back South to GIA VUC. Picked up target

10nm. Identified a strong return in area of where I placed reflectors. Think I had them. Turned out North to HA THANH and noticed very high winds in computer. Found that doppler radar had gone berserk and were giving me 285 knots of wind. Immediately secured doppler, but it had already torqued off my platform (inertial). Cursors were about 4nm short of target area. Went back to NAV CKPT AND positioned cursors on Quang NAI highway bridge. Updated on bridge and ran a velocity correct with inertial on trying to get the high winds induced by the doppler back down to normal. Got them in good order again and made another run on GIA VUC on a 1720 hdg at 9500'. Picked up reflectors at about 15nm. Got a TIR ground lock and made systems practice attack. Turned back north to HA THANH and positively identified it on radar. Came back to Danang. Shot Tacan 2 penetration which was turned into a GCA.

Respectfully submitted

CONDOLE -25
RADAR SURVEYCREW MAJ M'GARVEY
1ST LT KLINGERMAN

Flight was briefed as Radar Survey for Ha Thahn and Hia Vun.

Aircraft assigned for the flight was DT-7. Only system gripe was high velocity on INS.

A temp light was received while wings were being spread and INS was secured for the rest of the flight.

The first Check point used was tip of land just South of Chu Lai. Navigation mode used was doppler and system was tracking very well.

After update run in Heading of 211° was used on Ha Thahn, but had to abort run because BN left switch in memory point and 97 knots of wind was put into computer.

Second run in was on same heading and was able to locate Ha Thahn at 16 miles and obtain a

CONFIDENTIAL

CONFIDENTIAL

track lock on at 11 NM and contact was stepped into attack at 8 NM.

Next run in was made on Gia Vuu heading 172° was able to lock on at 12 NM and practice attack was run. Turned outbound to 090 to update on Coastal Check point, and then ran Gia Vuu on heading 255° and track lock was obtained at 13 NM.

Next heading was 010° on Ha Thahn which is a better return on Ha Thahn than 215° , but 215° was easier to locate Camp because of good river return all the way into Target.

Returned to Da Nang from Ha Thahn because a block time of 1130 was requested after takeoff. Block time was requested because of a delay in approach time was expected due to heavy radar traffic which was stacking up for approx. 30 min.

M 0105-27 RADAR SURVEY

T/O 1338 on radar survey mission of the Ba Do, Gia Duc and Ha Thuan Special Forces Camps.

Updated computer at Chu Lai and proceeded to Ha Thuan @ 15 M. Over Ha Thuan we turned south for Gia Duc. Up to this time pilots PWD had no steering. BN's gear appeared to be functioning normally. About half way to Gia Duc the platform tumbled. Platform now had TEMP light. Went to mag 161 and secured platform. Computer starting increasing in range readout when it should have been decreasing. We turned to the east and when we approached the coast I manually updated computer. We then turned back to Ha Thuan but bearing and distance were in error. We no longer had cursor tracking capability. We decided to return to Da Bang and run the radar reflector recently installed at the south end of runway 35L near the moose.

We made one approach at 8500'. Moose cable visible but 3 returns appeared in vicinity of the reflector. We requested to make a self contained approach but due to excessive traffic ^{COP} were unable to ^{AL}

LT SECOR / CAPT SPRINGFIELD

RADAR SURVEY - BATO, GIA VUC, HA THANH

Took off at 1000. Checked in with Joyride, Panama, Moonman and LS"A". Monitored LS"A" FREQ. Updated on Quang Nai Hiway bridge. Had no inertial navigation system. Tumbled on taxi however doppler radar worked fine. After updating on bridge arced around to 210° heading and ran reflectors at BATO at 12,000'. Picked up reflectors at 15Nm. made a practise attack. Switched steering to GIA VUC. Picked out several weak returns in target area. Locked on to them on heading 260° and 8nm. Am not sure it is reflectors and need a VFR day to verify. Would not make systems attack until returns were verified VFR. Turned North to HA THANH. Picked up target area at 19nm. Positively identified camp at 11nm. Would make systems attack using camp as offsett aimpoint. Turned South on 172° heading back to BATO.

out camp area at about 20nm. SAW several returns in reflector area. Am sure they are reflectors but will not make systems attacks until verified UFR. Came back north to HA THANH and picked it up no sweat. Back to GIA UUC used same returns as last run. BACK to HA THANH. Once more to GIA UUC and back to HA THANH. Checked out with LSIA, moonman and made a GCA landing using landing mode. Due to high undercast could not get down any lower than 9500'. It is this BIN'S opinion that at a lower altitude and diving at target. Reflectors would be much more identifiable.

Lt Clark / Capt Springfield

Tally Ho 1642 and 1977

Took off at 1130H, checked in with Gaynor, Panama, and Watuloy, blind bat was not up. Updated computer on Dong Ha highway bridge. Headed west until DVRI bug was at 010° then turned inbound at 24nm to Target 1642. Probed up river at 13nm - 8000'. Got a ground lock but cursors drifted so turned track radar off. Re-positioned cursors just short of Ferry computer. updated and stepped computer into attack. Put ten D2X on Target. All went off. Ran road race Irving saw no moving targets although AMTI was working real well. Saw one moving ship about 30nm off the coast of Dong Ha bearing 100° . Cycled steering to 1977. Range read out 26nm and steering looked good. We rolled in to steering and ran 1977 on a 135° heading. In target area was a large radar return. Put my cursor on it and tried

for Track lock on. Got lock and about 4nm from target cursors zoomed out past target about 4nm. By the time I got set lock up again it was too late. We turned back North and orbited about ten miles south of Don Hoi out to sea. Then attacked 1977 at 10,000' on a 200° heading. Made a diving straight path attack and released six O2x. Turned southeast out to sea called Waterbug for GCI GCA.

Respectfully Submitted

CONDOLE 428 TALLY HO

Airborne at 2135 with all systems up.

VDI degraded, constant pathway expansion, but symbols, steering, drift line useable.

Ran practice at path on Nine - solution looked tight. Up dated on Cape Mui Bay and turned inbound to target 1977.

Acquired, locked on at 12 miles. Clearly identified on both scopes. Expended

8 D-2's (2 subsequently discovered hung up), release 4500' level, from gliding approach.

Swung up the coast, "looking" at road segment and beach. No moving targets

detected on road. Many small hard targets on beach line - several small ones

water borne. One very hard target in

waterway 17°20' 106°41'. Struck 1271, repeat attack - got too steep and alerted men. Ran

the beach & road back to 1977, dropped

3 D-2's. Returned up road & beach. no

moving targets. Struck 1271 4 D-7's. Same hard waterborne target seen. Returned again

to 1977, and attacked with 2 D-7's. All

releases in @. Rockets at 2700' ~~CONFIDENTIAL~~ 200.

unable to secure 17R take-off as briefed.
 when reporting in joyride, reported on station; "they" interpreted our mission as weather recon. unable to convince them we were "on station" and would report weather. -
 Landshark actually diverted us to TPQ before we had opportunity to observe weather in vicinity of target.
 Probably a good move anyway, since weather turned out to be about 3100 ft ragged; 3500 ft overcast, and unsuitable for ordnance carried.

Could have run smoother if enough time to properly coordinate with all agencies prior to airborne.

REMARKS:

Tally Ho went as briefed. Hit first target (2015) and using straight path made dropping 10 bombs. When bombs exploded the clouds lit up with many flashes then a very large white glow for a second. Which this could have been a possible secondary explosion. Attached record target 1498 with 10 bombs and saw many flashes as bombs went off. As we took the third target under attack (1642) the systems (computer had transient voltage) went down. We then came out of the Tally Ho area and contacted Waterbury of Deseronto Delta to release unexpended ordnance on TPG. Were unsuccessful in finding moving targets on AMTI. Entire mission was flown in the clouds.

took off at 2200 climb out to reach Watuboy.
 After clearing with Watuboy proceed along
 western portion of road recon towards
 target 2015, ran an attack, straight path
 releasing 10 D-2s on the systems/NOTS.
 A series of white flashes, normal bomb
 detonation occurred with the last flash in
 the series being large in brightness and lasting
 about twice as long in duration. (Possible
 secondary) Proceeded north to target 1498.
 Enroute, searched for moving targets
 on radar, with no success. Acquired
 target and made a straight path diving
 run. Systems and nots functioned properly
 10 D-2s away. Normal detonations,
 pulled off target out to sea, came back
 heading south towards target 1642.
 Searched for moving targets enroute to
 this target, none indicated on scope

Contacted Waterway, handed off to
Dev "D" and unloaded 3 D-2, attempting
5 D-2's. Returned to Danang, had

thereafter. Landed at 2335, no further
incident.
