OPERATIONAL DISCREPANCIES, REMARKS AND/OR RECOMMENDATIONS (ENCLOSE LZ CONDITIONS):

There are several definite areas that need to be brought to the attention of authorities. Today I chased SCAREACE 36-24 & all discrepancies occurred. First, we are scheduled as a section (one wing & 134) but we never even have a section brief to go over all the procedures.

FLIGHT LEADER (PRINT) Gillespie

SIGNATURE RW Gillespie

specified in the NATOPS briefing guide. And with the A/C being from different squadrons, procedures are not clearly understood between the two A/C. 2. We are not used as a section, the Huey will not fly or work as a section & the 34 is generally left 4 or 5 miles behind the Huey when traveling from place to place. When you fly with a wingman, he is supposed to be somewhere on your wing where he is in visual contact. I instructed my wingman 4 different times that he was far in front of me & to allow me on his wing but it was no avail. 3. I am never kept informed of our mission and of all radio changes. Consequently, when the Huey leaves me 4 or 5 miles behind, I cannot even contact him by Radio. This was amply illustrated by 38-1 losing a chip light at Dong Ha Mountain & he couldn't tell his wingman. I was on my way to him before his Huey wingman was. This is definitely Safety of Flight and against all operating Procedures in the 1ST WING.

4. The 34 is rarely used as C&C & the Huey will make many trips before losing the 34 help. I was told today that the MAC-39 Soften officer told the SCORFON people that the 34's are just for SAR. THAT IS definitely wrong because our mission as well as the Huey is C&C and our After Action Sorties & Tasks are C&C and not SAR. Why don't they work 2 Hueys on the mountain missions & 2 34's in the lowlands? I'm sure the job could be done more expeditiously and with greater safety. I refuse to fly with a Huey on C&C until the situation is satisfactorily resolved.

R.W. Zahnd (38-3) ALSO
