REMARKS:

COM () TEST (31) BY CONVOY ()

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: a control group (n = 10) and an experimental group (n = 10). The control group performed the task without any load, while the experimental group performed the task with a load of 10 kg. The subjects were divided into two subgroups: a control subgroup (n = 5) and an experimental subgroup (n = 5). The control subgroup performed the task without any load, while the experimental subgroup performed the task with a load of 10 kg. The subjects were divided into two subgroups: a control subgroup (n = 5) and an experimental subgroup (n = 5). The control subgroup performed the task without any load, while the experimental subgroup performed the task with a load of 10 kg.

REMARKS

COM () TEST (/) / BY CONVOY ()

Figure 1. The effect of the concentration of the *Ag* ions on the *Ag* ion adsorption capacity of the *Ag* ion adsorbent. The concentration of the *Ag* ions was 0.01, 0.05, 0.1, 0.5, 1, 5, 10, 50, 100, 500, and 1000 mg/L. The adsorption capacity was determined by the difference between the initial and final concentrations of the *Ag* ions in the solution. The adsorption capacity was determined by the difference between the initial and final concentrations of the *Ag* ions in the solution.
