4. Important Visitors to the Command

a. Lieutenant General Lewis W. WALT, Assistant Commandant of the Marine Corps, visited Marine Aircraft Group 13 on 27 April 1968 and observed operations of VMFA-323 in the flight line and maintenance area.

b. Brigadier General Homer S. HILL, 1st Marine Aircraft Wing, Deputy Commander visited Marine Aircraft Group 13 on 29 April 1968 and observed VMFA-323 in combat operations.

Part II - Narrative Summary

The month of April 1968 was the ninth month of Combat Operations for VMFA-323 on its current tour of duty in the Republic of Vietnam. The weather was generally good over most of the I Corps until the latter days of the month. The tail end of the summer monsoon materialized and became stationary in Southern I Corps as it had done in the month of March further north. This weather had no significant effect on flight operations during this reporting period.

The Squadron had one week of air-to-ground alert which got off to a slow start but recovered the last few days. Many interesting sorties were flown from the alert pad but it was evident that enemy contact was light due to the increased number of reconnaissance team inserts that were supported.

Several areas in the I Corps seem to be getting hotter along with the daily temperature. Hit incidents of aircraft delivering soft ordnance became increasingly frequent. The majority of all soft ordnance delivery close air support missions are receiving ground fire of some type ranging from small arms to automatic weapons fire. "Charlies" on the job training is paying off as he has received more and better weapons and seems to be more effective in their use.

Maintenance exceeded its planned number of sorties but had some difficulty associated with rainy weather during the latter part of April. Shortage of personnel on the flight line and in the Ordnance Department had a definite effect on aircraft turn around time and sortie rate. There is a shortage of ground handling equipment at this time which also increases turn-around time.

The temperature is rising along with the humidity and the increasing amounts of blowing dust. The average Marine works in a tee shirt or bare chested whenever his job permits. Hasty bunkers were built after the beginning

of the TET offensive and are now being replaced with standard and more adequate construction. Repairs to enlisted and upgrading of officer quarters are in full swing with protection from the elements and comfort during the hot months being the prime objective.

On 23 April 1968 the MAG-13 cantonment received (18) 122 millimeter rocket rounds which did little or no damage. There were no casualties from the attack itself but MAG-13 reported 53 persons injured on metal pallets enroute to the bunkers. VMFA-323 had the least injured as the removal of this type of walkway has been in progress for some time.

Aircrews had their best month in April since the beginning of this combat tour. A shortage of Pilots and RIO's was caused by several TAD commitments, injuries to personnel who were subsequently hospitalized, and aircrews out of country delivering PAR/Shoehorn aircraft.

Transfers without replacements have taken a toll on experienced aircrews. Major Paul BOOZMAN departed for the Khe Sahn Air Operations post followed by several other aircrews rotating home or to other duties within RVN.

Some of the highlightmissions flown during April were:

19 April: Major MILLER and Lieutenant BARRON were launched from the hot pad with Captain PATRICK and Captain DRISCOLL for a close air support mission to Hue Phu Bai just at dusk. While on target Major MILLER's aircraft received severe battle damage and returned to Chu Lai. The aircraft will have to be returned to the U. S. for repairs.

27 April: Major FERDINAND and Captain VADNAIS along with Captain LYMAN and Lieutenant BARRON as wingman launched from the pad in extreme weather conditions to destroy an enemy force in contact with friendlies. The FAC controlling this hop has written a statement recommending the Distinguished Flying Cross for both crews. A job "well done".

23 April: Major BAILEY and Lieutenant LASHLEE along with wingman Captain KRUSE and Captain HIGBEE launched to Khe Sahn from alert pad and subsequently destroyed two active rocket sites and received an outstanding statement from the FAC.

April: Sorties in general were all flown in an ever increasing hostile fire environment. Aircraft hit incidents have increased significantly due to the effort of the VC/NVA to reduce air mobility by firing every conceivable weapon in an anti-air mode.

During April the combined squadron battle damage assessment received from controlling agencies, amounting to about 10% of all missions flown, delineated as follows:

ENCLOSURE (1)

Enemy Killed by Marine Air (KBA)	60 Confirmed/5 probable
Structures	38 Destroyed/12 Damaged
Bunkers	49 Destroyed/29 Damaged
Secondary Explosions	26
Fighting Holes	8 Destroyed
Road Cuts.	10 Achieved
Mortar Positions	1 Destroyed/1 Damaged
Rocket Positions	3 Destroyed/1 Damaged
Automatic Weapons Positions	2 Destroyed
Trench Line	495 Meters Destroyed
AAA Sites	1 Destroyed
Caves	3 Destroyed
Hedge Row	250 Meters Destroyed
Bridges	2 Destroyed/1 Damaged

Part III - Significant Events

1. Personnel: Joined Officer 3 Enlisted 31
Dropped Officer 2 Enlisted 9
Promotions Officer 0 Enlisted 5
2. Awards: Air Medal - 98
Navy Commendation Medal - 2 (V)
Navy Achievement Medal - 1 (V)
Meritorious Masts - 1
3. Air Operations: April Statistical Summary as Follows:

Total Combat Sorties 563	# Group/other Pilots Flying 7
Total Flights 575	Average Group/Other Pilots Sorties 14
Total Combat Hours 625.4	Average Group/Other Pilot Hours 16.6
Total Flight Hours 640.9	Average NFO Strength 15
Average Pilot Strength 14	Average NFO Hours 43.4 -
Average Pilot Sorties 41	High Day (Sorties) 21 April -26
Average Pilot Hours 45.7	High Day (Hours) 21 April -30.0
