Operational Discrepancy Report

MSA 83

At approximately 1545, 16 Feb 1968, I received a Trap for mission #83, ~~discrepancy resupply to Hue Hosp.~~ I was to launch immediately, pick up a 3200 # external at the ASP and contact Scarface 7-1 and 7-2 for escort. I launched at 1605 and contacted ASP on the briefed frequency and was informed that there was no external for Hue Hospital. I also contacted Scarface 7-1 and 7-2, who had no knowledge of the mission and were tied up on another mission. I then contacted Reaction Base and was informed that the external would not be ready until 1730, ~~more than an hour later.~~ The coordination, or lack of same, in this case and so many ~~other~~ like cases is completely unsatisfactory. It is a waste of men and material, ~~and~~ a source of frustration to the already ~~frustrated~~ frustrated helicopter pilots of the Group and is totally ~~unnecessary~~ unnecessary, ~~but~~ ~~given a little adequate planning~~ if a little pre-launch coordination were conducted instead of launching everything in all directions and then trying to get organized. (GA Chances)

External coils to be lifted to Hue Hospital.
While trying to connect Load A/C
struck the Load. The connecting strap
was less than 2 feet long. Strongly recommend
contacting Loadmaster - to have longer
slings, much longer. A/C developed leak
→ to P.B. Leak was water. Not serious
