7. Maintenance

a. During the month of July, this squadron had an average of 13 aircraft on hand. Induction of BuNo. 151503 into rework decreased this to twelve on hand at the present time. This will be further decreased with the scheduled induction into rework of BuNo. 150632 during August. The slight decrease in operational ready time during July corresponds with a similar increase in NORS time, while NORM time remained relatively constant. BuNo's 152283, 150418, and 149411 accounted for 18, 20, and 31 days of NORS time respectively. Calendar and acceptance inspections accounted for 14 days of NORM. A total of 538 sorties were flown during July, resulting in 548.7 flight hours and a utilization rate of 116.7.

LOGISTICS SUMMARY REPORT VMFA-542

Section I - Supply

1. OVERALL SUPPLY SITUATION

a. The general supply situation continues on a moderately satisfactory level with Aviation Supply continuing to be the major problem area. The number of NORS G items, for the month of July, had a high of 36 on 14 July and a low of 15 on 1 July. The average number of NORS N (NFE) items was 17.5. Work stoppage items remained at an average of 66 items during the month.

b. The problem of a high NORS rate continues to exist in Aviation Supply; the majority of the NORS documents passed into the supply system are low usage items with fewer than two requirements per six month period and as a result are not stocked by Group Supply.

c. Of the two M6 Gas Particulate Filter units mentioned in last months report, one has been received. The units were ordered priority 02 on 10 June under MCP document number 9161-3771. The remaining unit is on an outstanding document with BM status from MRI dated 10 June 1969.

d. Three Outboard Station Adapters, FSN 1095-948-3845, were received by this command but were shipped as Center Line Adapters with the following shipping data on the containers FSN 1095-912-2148. These Center Line Adapters were discussed in last months report in regards to their AOC rate. Mag-11 Message 1905422 July called out the subject discrepancy to the shipping facility (NSD YOKOSUKA). On 25 July two more Outboard Station Adapters were received with Center Line Adapter information on the container.

c. This squadron's Not Operational Ready Rate for Supply exceeds the NORS Standards for Aircraft specified by the OPNAVINST. 5442.4. This is due to parts presently on order not being on hand in the local supply system. Action taken by this activity consists of sending follow-ups to Group Supply, initiated by our expeditor. Our current status is still awaiting parts and future action consists of more follow-ups.

(2) Significant Problem Areas:

(a) The squadrons excessive NORS rate is a contributing factor to the NORM rate. The NORM rate is increased because of the necessity to selectively interchange parts.

(b) Lighting is needed in the revetments for more effective night maintenance.
