My father died after the war and i believe it was in the Veterans hospital in Ohio, he was from Ravenna Ohio and was in the Marines as a helicopter gunner. I am interning at the Republican National Committee and I go to school at Kent State University, however after I graduate in December I am planning on coming back to Washington to work. I know that my dad, William Allen Danford, had alot of pain and as a result he started to drink heavily but I am not exactly sure what the technical cause of death was but I know in my heart that it was a result of Vietnam. I would ask my mom or grandma more about him but it is something that they have a hard time talking about and I do not want to push them too hard. I appreciate any help you could provide me.

Sincerely Jason
