129 ANEX H Combat Operations After Action Report, Operation EL PASO II/III
Raid Target 21 - 27 June 1966

1. Background: A returnee, NGUYEN MING NHUT, rallied on 4 April 1966. He reported a storage area containing 3,000,000 pinsters worth of supplies vic XT 445540. The camp was reported to be guarded by 80 men. On 7 May, 20 sampans were seen in the area and on 12 May, two sampans were sunk there. On 13 May a bridge capable of carrying truck traffic was destroyed by air and wooden crates on a landing dock nearby produced secondary explosions when hit by artillery fire. On 14 and 15 May approximately 200 tons of rice were uncovered by an airstrike in the area.

2. Raid: On the morning of 21 June the 2/16 Inf and a heliborne assault into a landing zone in the vicinity of the storage area with the intent of destroying the base. At 0925H, six VC were encountered near a hut vic XT 461512. One VC was killed (BC), two VC KIA (Prob), and one VCC. One German Mauser rifle, two 105mm rounds, and ten rounds SA ammo were also captured. The VCC stated he was from C-65 local unit. Their mission is tribute collection and formation of guerrilla teams in the BEN CUI area. Rallying NGUYEN MING NHUT stated the 80 man force guarding the storage area was B-65. At 1125H, vic XT 458525, the 2/16 Inf was engaged by another small group of VC resulting in one VC KIA (BC). The VC was carrying medicine and may have been a medic. Destroyed were a classroom, five huts, and one hospital consisting of an operating table, oxygen mask, and medical supplies. Other supplies captured or destroyed during the day were one French M-35 SMG, two sampans, 16 rounds of SA ammo, seven grenades, two 155mm rounds, torches, 55 gal gas, gunpowder, a water pump, 9 1/2 tons of rice, one base camp and 300 sheets of tin. The unit had not reached the base camp area by nightfall so they dug in and prepared to go on the following day.

3. On 22 June, the 2/2 Inf was committed to raid area. As the units penetrated into the supply area it became apparent that it was quite extensive. VC losses during the day were 47 tons of rice, two sampans, 100 sheets of tin, four grenades, 16 rounds SA ammo, eight huts and one building.

4. On 23 June the search of the area continued with numerous small contacts throughout the day resulting in eight VC KIA (Prob). VC losses during the day were four base camps, 1350 lbs of flour, 30 gal of tobacco, 30 gal NUOC MON, 2.25 tons of rice, two truck tires, four tractor tires, one 3/4 ton trailer, 75 gallons of fuel, two oxcarts, two bicycles and 1000 tons of rice.

5. On 24 June small groups of VC were again contacted resulting in one VC KIA (BC), and one k50/PPSH41 CHICOM SMG captured. VC losses during the day were one boat building facility, two boats, 300 lbs of tea, 15 tons of dried fish, 3.85 tons of rice, 55 gallons of fuel, 25 tons of salt, 1000 cans of sardines, 15 thermos jugs, 20 kerosene stoves, 100 gallons of kerosene, 8000 aluminum pans, 900 soup ladles, and 550 gallons of oil. Documents captured by the 2/2 Inf vic XT 416537 indicated that the 272d Regiment and 243 Artillery Battalion were in the area as recently as 20 June and that the 271st Regiment was probably still in the BINH LONG - TAY NINH Province area. The losses suffered by 273d Regiment on 17 May and 11 June vic LOC NINH probably resulted in their withdrawal to this area for replacements and resupply.

6. On 25 June the number of contacts decreased, however, the 2/16 Inf killed one VC (BC), 11 VC KIA (Prob), and captured one CHICOM AK assault rifle. VC losses during the day were two - seven HP boat motors, two base camps, four sampans, 2.35 tons dried fish, 24.65 tons of rice, and five gallons of tar.

7. On 26 June the 2/2 Inf killed two VC (BC), and captured one rifle and one German Mauser. An armed CH-47 helicopter killed five VC (BC) and destroyed one .50 cal MG in the area. VC losses were ten tons of rice, one grenade, 500 lbs of wax, 320 sheets of tin, five spools of bailing wire, 12 bicycles, and one bag of toothpaste and tooth brushes, one bicycle repair shop, and one base camp.

8. The units spent 27 June destroying VC supplies and extracting on the 26th. Evidence indicated that more supplies will be found along the SAIGON River north towards Cambodia. Total losses during the raid are listed in Appendix 1. VC losses during the operation in cost of supplies is in excess of 23,000,000 piasters.

ANNEX I Combat Operations After Action Report, Operation EL PASO II/III
Long Range Reconnaissance Patrols

1. Long Range Reconnaissance Patrols were utilized to search suspected areas, vic LOC MINH for VC and installations. The results of their missions are listed below:

a. Team #4 infiltrated at 031900H June vic XT 6185 and exfiltrated at 041717 vic XT 6288. One VC was sighted at 040800H vic XT 835614. Contact was made with four VC at 041635H and a fight developed. The patrol took evasive action and requested exfiltration. During exfiltration the helicopters were fired on by an estimated VC platoon. Fire teams engaged the VC with unknown results.

b. Team #2 infiltrated 031855 June vic XT 5894. At 041500H vic XT 592939 one VC platoon was seen moving southwest. The VC had one 81mm mortar, one LMG, and individual weapons. An airstrike was placed in the area with unknown results. At 051145H the team was extracted vic XT 6090 and received fire from the village vic XT 675915 and airstrikes were placed on the target.

c. On 101857 June Team #5 infiltrated vic XT 5883. From 1915H to 2130H small groups totaling 100 men were seen moving west vic XT 584827. At 110925 the team was exfiltrated vic XT 585835.

d. On 101859H June Team #3 infiltrated vic XT 5786 and exfiltrated at 111358H vic XT 579880. No significant sightings.

2. By this time it was apparent the VC were withdrawing in small groups to the west towards Cambodia and there would be little chance of engaging a sizeable force in this jungle area. Operations were shifted to the MINH THAMH area in an attempt to locate elements of the 272d Regiment located in the area. Attempts to infiltrate in the late afternoon of 12 June were hampered by poor visibility so the teams were infiltrated early on 13 June.

a. At 130658H June Team #1 was infiltrated vic XT 7155. There was a considerable amount of VC activity in the area. At 0920H the team was surrounded by an estimated 30 VC and requested exfiltration. Air strikes were called in on the VC and the teams extracted at 131000 vic XT 709549.

b. Team #6 infiltrated at 130650H June vic XT 6656. There was evidence of considerable VC activity. The team was engaged by an unknown number of VC, one team member was killed and four VC were killed (BC). The team requested extraction and was extracted, minus the KHA, at 130915 vic XT 663560. An air strike was placed on the VC positions.

c. The areas in a and b above were unsuitable for LRP operations. Cover and concealment are sparse and the terrain is open in many places. Two infantry battalions were committed into the area. Several base camps, including one of regimental size, were found in the area, however, only small groups of VC were encountered as they chose to abandon their camps. The aerial rifle platoon was also committed where the patrol member was killed and his body was recovered.

3. The extent of VC losses as a result of LRRP findings cannot be accurately assessed. Canopies prevented BDA from air strikes and the VC chose to flee from US ground forces committed. Any VC casualties from air were carried off so they would not be found.

3. (C) Intelligence:

a. Enemy Situations: Previous confirmed base camps utilized by 272 VC Regt between the MINH THANH and MICHELLE Rubber Plantations, vic XT5758, XT5767, XT6058, and XT6067. A major supply installation consisting of rice caches and a reported supply base containing 13 million piasters worth of supplies on the West side of S.IGON River, TAY BINH Province, vic XT4456 to XT4636 to XT4454 to XT4653. Airstrikes in the area on 19 May 66, uncovered an estimated 200 tons of rice and large storage buildings and an estimated 200 additional tons of rice. This logistical base was reported to have been operated by B-150 element of C-963 (NIGON Service Group CCBW) and the area was secured by approximately 80 VC. During the period from approximately 15 June to 27 June VC 9th Division units were located Southwest of LOC MINH (XT728003) vic Cambodian border and in War Zone "C". There was evidence that the VC were withdrawing to regroup. The VC activity was renewed on 30 June when the 271st Regt attacked our armored column vic LOC MINH. The obvious routes of withdrawal were again to the West toward the Cambodian border, possibly through Cambodia to War Zone "C". 272nd Regt was suspected to be located vic XT604775 during this period. They were in a position, where at the time of their choosing, so as to attack MINH THANH road or Route 13 between CHON THANT (XT7662) and AN LOC (XT7558). Considered order of adoption was to attack convoys (columns) on MINH THANH road, Route 13, and a remote possibility of attacking the MINH THANH base camp, attacking ARVN-US installations in AN LOC - QUYN LOI area.

b. VC Strength, Activity, and Situation During the Operations:

(1) The 272 VC Regt withdrew to the West as indicated, however, their speed of movement allowed them to clear the MINH THANH area of traffic prior to the commitment of the 1st Bde into a blocking/interdiction role. Base camps were located in the area as reported. Reports and evidence of activity revealed the 272 VC Regt did cross the S.IGON River into War Zone "C" as predicted in the intelligence estimate.

(2) The logistical base along the S.IGON River in TAY BINH Province did exist in the area. The intelligence reports of rice and supply caches were located in much greater quantity than estimated and covering a larger area than initially reported (see results). VC activity in this area consisted of contact with squad size elements in several locations simultaneously, harassing activity such as snipers, use of boobytraps and ordnance detonated mines. Evidence gained from documents established the fact that the VC were from a rear service security element.

(3) The VC 271 Regt withdrew to the West toward the S.IGON River and Cambodia. Blocking forces on trails encountered elements of 271 withdrawing and units up to Co size from 273 VC Regt.

(4) The 272 VC Regt was located in the general area that current intelligence indicated the attack on elements of 1st Bde vic XT6874 MINH THANH road, was conducted by the entire 272 VC Regt. The location of the battle area and route of withdrawal were exactly as predicted by the 1st Bde.

(5) Accuracy of Intelligence: The intelligence gained during the operation and prior to major phases and engagements by the Bde were quite accurate. However, the estimation on number of base areas, amount of supplies and caches were less than the actual quantities found. There were also periods of time from 2-5 days where intelligence was of a negative nature. The ability of VC to deceive friendly forces as to their location and intention was proven throughout ML BSO II.

4. (C) Mission: From 1st Infantry Division CDM 10-66 (Operation ML BSO II) dated 30 May 1966.
