

"Mar 30, 1981

Dear Lt Anderson,

Good to hear from you! Also hope your family had a good time over the holidays. I'll help chip in for the monument also I'm interested in that design contest.

Since my last letter I'm doing pretty good I recieved a VRA appointment Oct 6, 1980 to the USA Corps of Engineers at the Buffalo, Dist. of the Great Lakes. Its alot of traveling however somebody has to put the groceries on the table.

Also have a more positive opinion on the V.A. believing they are trying to give me a fair shake.

I recieved a letter from a grunt a couple of weeks ago also looking for the incredible "Doc Milton" so a ray of hope came through ~~via~~ the DAV magazine "inquiring section". It will take a little time but will find him.

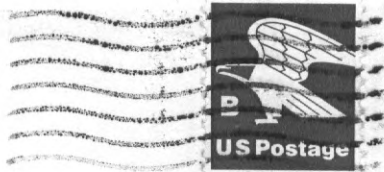

My new job surveying technician is pretty neat get to shoot laser beams at targets for plotting points etc reading a map not to boring hardest part is being away from the family.

Well thats about it still trying

to pin down "Doc Milton" and St Tucker
Watching the attempted assassination
on the tube & it sort of makes
me feel the way I did when JFK
got done in. So I'll keep ya posted
when this thing gets cleared up and
you do the same. Thank you for
your concern!

Yours truly
Denny Jaszka
