

THIS BOOT IS SPIKE PROTECTIVE

INSTRUCTION TAG
BOOT, COMBAT, TROPICAL,
MILDEW RESISTANT

INSTRUCTION FOR USE

1. **Wear with:** 1 Pair socks, wool, cushion sole.
1 Pair insoles, ventilating.
2. **Sizes** -- The tropical boot is supplied in whole and half sizes 4 through 14 in all widths, and 3 through 14 in XW width. The boots should be worn longer and wider than the combat

boot you normally wear in order to allow for normal swelling of the feet in hot weather and must be fitted with the ventilating insoles and cushion sole socks.

3. Pull on boots, seating heel firmly into place, then double lace at third or fourth eyelet. Boot should fit snugly, but not tightly.
4. Trouser should be worn outside the boot.
5. Carry extra socks with you. Change socks often, at least

once daily. Remove boots, and dry feet as often as possible. Neglect of the feet can cause Jungle Rot and make you a casualty.

6. Remove ventilating insoles and shake out to dry. Wash in warm (not boiling) soapy water.
7. Brush mud and excessive dust off boots. To prevent leather from getting hard and stiff, wax often with shoe polish containing silicone. Clean screened vents on inside shank so that water will drain out.

8. Wipe inside of boot occasionally with a moist soapy rag and let dry.
9. As frequently as possible, dry boots and insoles in the sun. Do not place near intense heat as this will destroy nylon, leather, and plastic.
10. Before putting on boots in snake, insect, scorpion and spider infested areas, carefully inspect the inside of the boots to avoid painful and disabling bites and stings.
