A FM was sent to 4.2mm but could not process because range too close for 4.2 tubes. FM then sent to 81mm who processed (6) rnds HE which fell short into perimeter of FSB. Explosions were first thought to be enemy incoming but check of tube settings revealed it was friendly incoming. Reason for mishap was that prox and dir of Target was plotted from observer (PPS-5) to target instead of from gun to target. The difference between location of PPS5 radar & 81 mortar tubes is 150 meters, enough to cause rounds to impact in perimeter: 1 US KIA, 9 US WIA, 8 US DO. (1) US WIA remain at Mary Ann.
