1. Enemy Initiated Activity

The enemy carried out his long reported plans last week with the sapper attack against FSB GATOR on the 4th by an unidentified unit, probably an element of the 406th or 409th Sapper Battalion. The predicted attacks on CAP 142, CAP 143, and LZ MINUTEMAN on the 5th were probably led by the 48th Battalion with weapons support from the 107th Battalion. The attack on the NDP of 2/6 ARVNs on the 7th was probably conducted by 95A, P31, and K51. The unit formerly called V20(T18) is now C71Z or V20(T18).

2. Movements A PW captured by the 1/52 Battalion indicated the possibility of reinforcement of QUANG NGAI and QUANG TIN forces by approx 140 NVA.

3. Course of Actions

a. PW interogation and captured documents indicate the current offensive to be from 4 Jan to 15 Jan 70 with orders to district forces to attack Allied platoon size or smaller forces if the situation is favorable and main force units are to attack company size forces or bases.

b. The coming week will probably see a continuation of last week's activity with possibly a tapering off towards the end of the week, as the enemy will probaly begin his resupply and retraining for his planned TET Offensive.
