34	CON'T.		immediatley on arrival. An interpreter is scheduled to be with the trainees. Insure their unit controls them by formation, etc. It would be a good teaching vehicle for the PFC's. The CMMI and preperation for it have priority over this training. Suggest you employ them in maintenace and ammo storage first to accomplish both your and their objectives. In training like this it is best to integrate and not have them work seperatley. ARVN's use the technique for 60 & 81 mm mortar of making all adjustments on the GT line, but it is unknown if they do the same for 4.2 mortars. Also you are reminded of a training inspection at LZ AM from 1400-1600, 28 Aug.
