SECTION I (C) SIGNIFICANT ORGANIZATION ACTIVITIES

1. (C) GENERAL: During the reporting period 1 November 1967 to 31 January 1968 the 3d Brigade TF, 4th Infantry Division participated in Operation Baker for 62 days, Operation Muscatine for 23 days and Operation Wheeler/Wallowa for 7 days for a total of 92 days in combat. The 3d Brigade TF, 4th Infantry Division has participated in 632 consecutive days in combat as of 31 January 1968.

a. Mission: The 3d Brigade's mission in Operation Baker was to assume responsibility within the Duc Pho AO for:

(1) Offensive and defensive operations designed to locate and destroy NVA elements, Viet Cong main force, local force, and guerrilla units as well as the Viet Cong infrastructure.

(2) Provide convoy security in zone, and from Quang Ngai south on Hwy #1 to the Brigade AO.

(3) Be prepared to provide one rifle company on two hours notice, and an additional rifle company in an additional two hours, for employment anywhere in the Americal Division TAOR, on order.

(4) Be prepared to provide a company size reaction force to support the defense of Quang Ngai Airfield, on order.

(5) Support Revolutionary Development in the 3d Brigade AO.

(6) Conduct psychological operations in support of tactical operations and revolutionary development.

(7) Be prepared on 12 hours notice to provide one reinforced infantry battalion for employment anywhere in South Vietnam.

(8) Be prepared on an additional 12 hours notice to deploy the remainder of the 3d Brigade TF, 4th Infantry Division anywhere in South Vietnam.

b. The 3d Brigade's mission in operation Muscatine was to assume responsibility for the southern 2/3 of the Muscatine AO for:

(1) Offensive and defensive operations designed to locate and destroy NVA elements, Viet Cong main force, local force, and guerrilla units as well as the Viet Cong infrastructure.

(2) Assume responsibility for security and road clearing of Hwy #1 from BS623865 to BS633810.

c. The 3d Brigade's mission in operation Wheeler/Wallowa was to assume responsibility of the northern half of the Wheeler/Wallowa AO for:

(1) Offensive and defensive operations designed to locate and destroy NVA elements, Viet Cong main force, local force, and guerrilla units as well as the Viet Cong infrastructure.

(2) Assume responsibility for providing security as required for the 39th Engr Bn repair mission on Hwy #535.

(3) Assume responsibility for security and road clearing of Hwy #1 from BT114497 to BT175418.

d. Operational Areas. (See Inclosure #1 for Duc Pho AO, Inclosure #2 for Muscatine and Wheeler/Wallowa AO's).

(1) The area designated as the 3d Brigade AO in the Duc Pho AO encompassed the majority of Duc Pho & Mo Duc Districts, Quang Ngai Province.

(2) The area designated as the 3d Brigade AO in Operation Muscatine encompassed Binh Son & Son Tinh Districts, Quang Ngai Province.

(3) The area designated as the 3d Brigade AO in Operation Wheeler/Wallowa encompasses Duy Xuyen, Que Son, and Duc Duc Districts in Quang Nam Province.

e. Task Organization: Principal units of the 3d Brigade TF, 4th Infantry Division, with commanders names and dates of command, and the major supporting and operational controlled units are as follows:

Headquarters, 3d Brigade TF, 4th Infantry Division
Commander: Colonel George E. Wear (1 Nov 67 - 31 Jan 68)

Deputy Commander: 3d Brigade TF, 4th Infantry Division
LTC Alvin C Hadley (1 Nov 67 - 3 Nov 67)

2. INTELLIGENCE:

a. General: During this reporting period, 1 November 1967 through 31 January 1968, enemy activity is categorized in three phases, based on the three separate areas of operation.

b. Phase One: 1 November 1967 - 2 January 1968, Duc Pho - Mo Duc area of operation. This phase began in the middle of the enemy's Winter Campaign that was designed to produce a propaganda left through a series of quick victories in order to bolster the morale of his followers. On the night of 30th October 1967, a Battalion size force attempted to destroy the bridge over the Song Ve River (BS695635) and was driven off by elements of the 2nd ARVN Division. As a result of a night ambush on 31 October 1967, a prisoner was captured that confirmed the fact that the 97th MF Bn, 2nd MF Regt attacked the Song Ve Bridge and was based in the Nui Lon Mountains (BS6747) and Song Ve Valley (BS6049). Airborne Personnel Detector missions (People Sniffer), agent reports and usual sightings confirmed the fact that the enemy had moved back into the mountains on the western border of the Brigade's reconnaissance zone. On 3 November 1967, the 2nd Battalion, 35th Infantry conducted a ten day operation in the Song Ve Valley where it contacted small elements of the C-18 LF Company and scattered NVA food gathering parties. The ten day operation resulted in 25 enemy KIA, and the capture of 15 weapons.

On the 4th of November, the 1st Battalion, 14th Infantry launched a thirty day operation in the heavily forested, mountain area in the Southwest portion of the Brigade's AO (BS7428) against elements of the 22d NVA Regt, 3d NVA Division. Captured documents and the P's revealed that the 1st Battalion, 14th Infantry had engaged support elements of the 22d NVA Regt to include the Signal, Reconnaissance, and Mortar companies, plus scattered elements of the 8th and 9th NVA Battalions of the 22d NVA Regiment. The operation terminated with 109 enemy KIA, 57 weapons captured, to include two 82MM mortars and 28 rounds of 82MM mortar ammunition. On or about 6 December 1967, the 22d NVA Regiment with two of its Battalions, withdrew from the mountains and moved into the lowlands of Binh Dinh Province (vic BS9108) where they were quickly engaged by the 1st Brigade, 1st Air Cavalry Division and elements of the 22d ARVN Division. Within a fifteen day period, the 22d NVA Regiment had lost over 600 men. The 7th and 8th NVA Battalions along with regimental support companies sustained the bulk of the losses. The 9th NVA Battalion avoided contact. In December 1967, the 97th MF Battalion moved South and lost over 150 men to elements of the 1st Air Cavalry Division. The remainder of this

CONFIDENTIAL

1

AVDDC-OP

2 February 1967

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

phase was devoted to platoon and company size operations directed against village and hamlet infrastructure. The local force units in close coordination with the village and hamlet guerrillas, continued to harass the Brigade by planting mines and booby traps on the trails and roads throughout the AO with particular emphases along Highway #1. The enemy in the area took advantage of the Christmas and New Year cease fire to rest and resupply prior to the Spring Offensive.

c. Phase Two: 2 January 1968 - 25 January 1968. This phase found the Brigade operating in the Son Tinh and Binh Son Districts north of the Song Tra Khuc River against several local force units. The enemy's most potent threat in this new AO was his ability to avoid contact behind an uncountable number of mines and booby traps which accounted for 9 KHA's and 30 WHA's. The single significant contact that took place during this phase was on 17 January 1967. Company B and Recon, 1st Battalion, 14th Infantry, combat assaulted into an area where four local force VC Companies (T18, 21 Sapper, 31, 95) had just recently assembled in preparation for a forthcoming attack. Brigade Aviation and gunships flying in support of the combat assault were the first to observe and engage the enemy soldiers who were moving about in a communications trench. The contact ended late in the afternoon on the 17th with 80 enemy KIA and 36 weapons captured. The remainder of this phase was spent conducting platoon and company size search and destroy operations against small bands of local guerrillas that continued to move ahead of the advancing troops and place booby traps in their paths.

d. Phase Three: 26 January 1968 - 31 January 1968. A large build-up of enemy units in the Northern part of the Americal AO caused the Brigade to move North into the Quang Nam Province and assume the AO occupied by the 3d Brigade, 1st Air Cavalry Division. A relief in place was effected and the 3d Brigade, 1st Air Cavalry Division moved farther to the North. The first part of this phase was spent in platoon and company size operations in an attempt to gain intelligence as to the enemy's probable actions during the "TET" period. Intelligence reports revealed that the 2d NVA Division Headquarters, the 1st VC MF Regiment and the 3d NVA Regiment moved from their base areas, Vic AT8733 - AT9641, into the northern part of Duy Xuyen District Vic AT9751 - AT0351. As part of the enemy's overall plan to attack during the normal "TET" cease fire period, two fire bases within the Brigade's AO received light to moderate mortar (82MM and 120MM) and 75MM Recoilless Rifle attacks on 30 and 31 January 1968. Agent reports revealed that a VC Company of the 105th LT Battalion with an NVA mortar platoon attached were responsible for shelling the Brigade's fire support bases. Thang Binh and Que Son District Headquarters were shelled and attacked by VC Local Force units that were working in close coordination with local guerrilla forces.

e. Summary of Enemy Personnel and Equipment Losses: 1 Nov 67 - 31 Jan 68.

3. OPERATIONS AND TRAINING

a. Plans:

(1) During the period covered by this report, the 3d Brigade was responsible for planning the relief of elements of the 196th Infantry Brigade (LT) within a portion of the Muscatine AO effective 021200 January 1968.

(2) During the latter part of the reporting period, the 3d Brigade planned and conducted the relief of the 3d Brigade, 1st Air Cavalry Div in a portion of the Wheeler/Wallowa AO effective 261200 January 1968.

AVDDC-OP

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

(3) During the reporting period the 3d Bde sponsored the 11th Inf Bde (LT) and the 198th Inf Bde (LT) (See Inclosure #4)

b. Operations:

(1) General: The 3d Brigade continued with the mission assigned for operation Baker until 021200 January 1968. During this reporting period, elements of the 3d Brigade conducted search and destroy operations in their respective areas of responsibility with attachments from C Troop, 1st Squadron, 10th Cavalry and the 2d Battalion, 9th Artillery. Contacts during the period were light and in some cases initiated by the enemy; however, in all cases the enemy force was defeated and enemy casualties were moderate to heavy. Friendly casualties were light. The 3d Brigade enemy/friendly killed in action ratio is a very respectable 22.5 to 1 for the entire reporting period. During Operation Muscatine, 021201 January 1968 to 261200 January 1968, searching for, locating, and destroying the enemy in tunnels and caves became a necessity for the accomplishment of the assigned mission. The most significant contact during Operation Muscatine occurred on 17 January and was a result of a combination of timely intelligence, thorough planning, and a combat assault which forced the enemy into an untenable position where he was destroyed by ground elements and armed helicopters. In addition to the normal objectives of an Infantry Brigade, the additional objectives of interdicting the enemy's supply routes and inhibiting his freedom of movement were established. These objectives were accomplished by continual H&I artillery fires, strategic location of firebases, and continual movement of troop elements in the field. By denying the enemy the ease of movement and the liberal amount of supplies he had become accustomed to, he was forced to disperse and operate in small elements. Consequently, the enemy was caused to spend more time foraging and this decreased his ability to attack in force. In both the Baker and Muscatine AO's, the concept of operations included an advance over suspected avenues of enemy movement and a methodical search for enemy personnel, caches, and fortifications. The objective was to deny the enemy use of the inhabited lowlands and thereby cut him off from his source of food, intelligence, labor and recruits. The general plan was to have infantry battalions establish firebases with the battalion command post and supporting indirect fire elements. One rifle company was employed to guard the firebase and conduct local operations while the remainder of the infantry elements conducted operations throughout the TAOR. After the enemy was found and fixed, all available firepower was brought to bear as the infantry advanced, methodically searching every enemy position. These procedures were continued during the initial phases of operation Wheeler/Wallowa, 261201 January 1968 to 312400 January 1968.

(2) 1st Battalion, 14th Infantry: During the reporting period, the 1st Battalion, 14th Infantry participated in Operation Baker in the Duc Pho area with the Battalion CP at "LZ THUNDER" (BS874323) and later in the Cat Mit Valley located at the headwaters of the An Lao River Valley in the 3d Brigade's Reconnaissance Zone. In January the Battalion moved with

7

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

the 3d Brigade Task Force and relieved elements of the 2d ROK Marine Brigade on the Batagan Peninsula. Operations were conducted in AO Grant during Operation Muscatine with the Battalion CP located at "LZ UPTIGHT" (BS731840). Upon the relief of AO Grant, the Battalion moved north on 25 and 26 January and entered Operation Wheeler/Wallowa; establishing a Battalion CP at "LZ COLT" (BS11,327). During the reporting period the Battalion had many minor contacts and ambush engagements with a major contact occurring on 17 January. (A detailed explanation of the techniques employed is contained in inclosure #3).

(3) 1st Battalion, 35th Infantry: During the reporting period the Battalion conducted search and destroy operations in two AO's. During Operation Wheeler the Battalion, OPCON to the 101st Airborne Division, operated near Tam Ky, Republic of Vietnam with the Battalion CP located at "LZ MARY LOU" (BT132203). During Operation Wallowa, the Battalion CP was located at "LZ BALDY" (BT132453). The Battalion reverted to 3d Brigade control on 26 January when the 3d Brigade, 4th Infantry Division assumed responsibility for the northern portion of the Wheeler/Wallowa AO. During the period 26 January - 31 January, no significant contacts occurred.

(4) 2nd Battalion, 35th Infantry: During the reporting period the Battalion conducted search and destroy operations in the Baker AO, the Muscatine AO, and the Wheeler/Wallowa AO. From 1 November to 18 December 1967 the Battalion CP was located at "LZ LIZ" (BS751436). On 19 December 1967 the Battalion became OPCON to the 198th Infantry Brigade (LT) and established a Battalion CP at "LZ SUE" (BS567877). From 9 January to 31 January the Battalion participated in Operation Wheeler/Wallowa, OPCON to the 196th Infantry Brigade (LT) with Battalion CP's at "Fire Support Base West" (AT990250) and at "LZ ROSS" (BT029341). Throughout the period the Battalion had many minor engagements with one moderate contact.

(5) 4th Battalion, 3d Infantry: From 19 January - 25 January, the 4th Battalion, 3d Infantry was OPCON to the 3d Brigade, 4th Infantry Division. During this period the Battalion had no major contacts; however, there were numerous minor contacts and ambush engagements.

(6) Troop C, 1st Squadron, 10th Cavalry: During the reporting period the Troop was employed in several cavalry roles, i.e., screening, strong points, convoy security, etc.

(7) C Company, 4th Engineer Battalion:

(a) General: During the Quarter 1 November 1967 to 31 January 1968, Company C, 4th Engineer Battalion continued to support the 3d Brigade Task Force with combat engineer support in the area of operations and with construction and maintenance support at "LZ BRONCO" and "LZ BALDY".

CONFIDENTIAL

AVIDDC-OP

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

(b) Operations: (LZ BRONCO)

1 Clearing landing zones.
2 Destruction of enemy caves, tunnels, bunkers, and defense positions.
3 Construction, maintenance, and clearing of defensive perimeters.
4 Mine clearing
5 Technical assistance in construction of field fortifications.

(c) Operations: (LZ BALDY)

1 Construction and maintenance of Brigade forward base.
2 Helipad construction and maintenance.
3 Maintaining a water supply point.
4 Peneprime distribution.
5 Mine clearing.
6 Road construction.

(6) 2d Battalion, 9th Artillery:

(a) General: During the period 1 November 1967 to 2 January 1968, the mission of the 2d Battalion, 9th Artillery was direct support of the 3d Brigade, 4th Infantry Division on Operation Baker. Battery A was OPCON to the 3d Brigade, 101st Airborne Division and 3d Brigade, 1st Cavalry (Airmobile) Division in Operation Wheeler/Wallowa in direct support of the 1-35th Infantry. Battery B was in direct support of the 1-14th Infantry, and Battery C was in direct support of the 2-35 Infantry.

1 Additional artillery units which were under the operational control (OPCON) of this Battalion were as follows:

1 2d Battalion, 11th Artillery (155mm) from 1 November to 2 January with the mission of Reinforcing.

(1) Battery C, 3d Battalion, 18th Artillery (8" - 175mm) was OPCON to the 2d Battalion, 11th Artillery during this period.

(2) One searchlight section from Battery G, 29th Artillery was also attached to the 2d Battalion, 11th Artillery for this period.

b Battery A, 6th Battalion, 11th Artillery (105mm) from 30 December to 2 January with the mission of Reinforcing.

(b) During the period 2 January through 25 January traditional missions continued in the following AO's.

1 Battery A - Operation Wheeler/Wallowa.

2 Battery B - Operation Muscatine.

a During the 11 January through 25 January Battery G, 6th Battalion, 11th Artillery was OPCON to the 2d Battalion, 9th Artillery with the mission of Reinforcing.

3 Battery C - Operation Muscatine 2 January - 11 January.

a During the period 11 January through 25 January Battery C became OPCON to the 196th Infantry Brigade (IB) in operation Wheeler/Wallowa.

(c) During the period 25 January through 31 January the 2d Battalion, 9th Artillery continued the mission of direct support to the 3d Brigade, 4th Infantry Division in support of Operation Wheeler/Wallowa. Battery A was in direct support of the 1-14th Infantry, Battery B was in direct support of the 1-35th Infantry and Battery C was in direct support of the 2-35th Infantry.

1 Additional artillery units available to this Battalion were as follows:

a Battery C, 3d Battalion, 16th Artillery (155mm) 25 January to 31 January with the mission of GSR.

b Battery B, 3d Battalion, 18th Artillery (8" - 175mm) 25 January to 31 January with the mission of GSR.

c Battery G, 29th Artillery (2 searchlight sections), 25 January to 31 January attached to the 2d Battalion, 9th Artillery.

d Battery W, 2d Battalion, 11th Artillery (U.S. Marines, 155mm) 25 January to 31 January with the mission of GSR.

TOTAL	75	1605

(5) Aviation:

(a) During the quarter the Brigade Aviation section flew a total of 1214 hours, 2934 sorties, and carried 1722 passengers. Of the total OH-23G flying time, 639 hours and 405 sorties were flown on scout operations. The section recorded 57 confirmed enemy KIA's and 27 weapons either captured or picked up by the ground troops. Three aircraft were damaged by mortars. Six aircraft were damaged by enemy ground fire and five crewmen were wounded.

(b) Tactical Air Support statistics for the reporting period are as follows:

FAC MISSIONS			COMBAT SKY SPOTS		
	<u>Req</u>	<u>Flown</u>		<u>Req</u>	<u>Flown</u>
NOV	148	69		55	33
DEC	95	31		48	40
JAN	15	13		1	0
TOTAL	258	113		104	73

(10) Chemical: During the reporting period personnel detection missions and CS-1 drum drop missions were greatly reduced because of monsoon weather which produced cloud cover in mountainous target areas. The following chemical activities were conducted by the Brigade:

CONFIDENTIAL

CONFIDENTIAL

14

AVDDC-OP

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

(a) Use of CS grenades on a daily basis by ground troops and the Brigade Aviation Section in support of tactical operations.

(b) Employment of CS, grenades by military police to control civilians in base camp areas.

(c) Five (5) CH-47 Sorties were flown with CS-1, 55 gallon drum drops. A total of 5,600 pounds of CS-1 Riot Control Agent was expended on suspected enemy supply routes.

(d) Five Personnel Detection Missions were flown, two of which were with OH-23 helicopters.

(11) Training: During the reporting period 3d Brigade TF personnel graduated from the following schools:

<u>SCHOOL</u>	<u># GRADUATED</u>
3d Brigade NCO Preparatory School	140
4th Division NCO School	33
Brigade replacement Training	465
4th Division Pre-Recondo School	6
MACV Recondo School	5

4. LOGISTICS:

a. General: The 3d Support Battalion (PROV) has primary responsibility for logistical support of the Brigade. General support was provided by FSA (Task Force McDonald) until 26 January 1968 when the Brigade moved to LZ BALDY. At that time, TM FRAZIER assumed responsibility for general support of the Brigade. The Brigade continues to use its requisitioning, shipping and receiving actions concerning Class II and IV items and repair parts. Repair parts requisitions are passed through our general support maintenance activity, the 188th Maintenance Battalion at Chu Lai. All other requisitions are delivered by courier to Qui Nhon Depot. Supply and Maintenance support for elements of the Brigade rear detachment at Pleiku base camp is provided by the 4th Infantry Division.

b. Supply:

(1) Class I

Prior to the Brigade moving to LZ BALDY, all items were provided by FSA with distribution made to the Brigade Class I yard for storage and issue. Ration breakdown for all units at LZ BRONCO was accomplished by the 3d Support Battalion (PROV). Perishables were stored in two 1½ ton refrigeration vans and four 600 cubic feet refrigerators. After moving to LZ BALDY, 3d Support Battalion (PROV) assumed responsibility of the

12

AVDDC-OP

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

Class I yard including ration breakdown and distribution to all units:

(b) Class I issues for reporting period:

A Rations	546,000
C Rations	262,324
LRRP Rations	16,147

(2) Class II and IV:

(a) Depot ships directly to our activity address code through the Brigade Supply Officer, to a Class II and IV storage and distribution area. This was made possible by the opening of a supply account enabling all organic, attached and opcon units to requisition and draw directly from the Brigade Supply Officer, rather than returning to a distant base camp.

(b) The Brigade continues to make extensive use of the airstrip at Duc Pho which aids the functioning of the logistical train, bringing quick delivery of personnel and necessary items of equipment.

(3) Class III

(a) At LZ BRONCO, Task Force McDonald provided wholesale issue of all types of fuel. Storage capacity was increased to 871,000 gallons on 5 December after completion of the tank farm. At LZ BALDY, all fuels are wholesale issued by 3d Support Battalion (PROV). Storage capacity is 100,000 gallons. At firebase Ross, POL is issued by 3d Support Battalion (PROV).

(b) POL issues report period (gallons): JP4 (887,000) - AV gas (94,000) - MO gas (448,000) - Diesel (447,000).

(4) Class IV:

(a) At LZ BRONCO, Task Force McDonald operated the ASP and was supported from Qui Nohn and on occasion from Chu Lai. Since moving to LZ BALDY, TM FRAZIER operates the ASP. Resupply of Class IV originates from Chu Lai. Storage space limits stockage objectives to a 5 day supply of most items.

(5) Class V issues for the reported period:

(6)

CONFIDENTIAL

105mm HE	63,055
4.2" HE	12,302
81mm HE	18,454

(6) Transportation:

(a) Two (2) light truck squads and one (1) medium truck squad from the 3d Support Battalion (PhuV) support the Brigade units at LZ BALDY.

(b) Air Force C-123 aircraft provided a scheduled airlift between the Brigade at Duc Pho and its rear detachments at Pleiku. Since moving to LZ BALDY, air lifts have been provided by Americal Division Transportation Office. The 4th Infantry Division Transportation Office has provided flights on request from the 3d Brigade rear detachment at Pleiku. TMN Chu Lai is in the process of scheduling missions between Pleiku and LZ BALDY. During the report period, the following air movement record was compiled:

(a) Sorties:	326
(b) Passengers:	6949
(c) Cargo:	113 tons

(7) Medical:

(a) "D" Co, 4th Medical Battalion provides immediate medical support for the Brigade. Excellent evacuation support was given by the 498th Medical Company, air ambulance, and by the Air Force evacuation teams. While at LZ BRUNCO, D Co evacuated patients to the 2d Surgical Hospital in Chu Lai and to the 67th and 85th Evacuation Hospitals in Qui Nhon. Since 20 January 1968 "D" Co has moved to LZ BALDY and is getting evacuation support from the 54th Medical Company. There is no Air Force evacuation team. Patients are sent to 2d Surgical Hospital in Chu Lai and Naval Station Hospital in Da Nang.

(b) Medical Statistics for reporting period:

Disease Patients	4,430
Battle Casualties	206

Non-battle casualties	<u>591</u>
Total	5,227
Patients admitted to ward	1,346
Patients evacuated to hospitals	1,189
Patients returned to duty	2,900

5. CIVIL AFFAIRS

a. General: Priority of effort was directed towards the following four areas: Public health and sanitation, public education, refugee relief, and civic construction. All projects were designed to be short range and high impact in nature. All projects requested by GVN officials and all work was performed by indigenous personnel. US personnel and units participating in civic action were the 3d Brigade S-5 section; 4th AA Platoon, 29th Civil Affairs Company; and the subsector MACV advisory team. GVN agencies included four RDC Teams; GVN refugee relief personnel, VIS personnel, and a culture drama team.

b. Public health and sanitation:

(1) Medcap results:

<u>a</u> Sick call	11,846
<u>b</u> Dental	181
<u>c</u> Baths for children	672
(2) GVN health workers trained	6
(3) Latrines constructed	4
(4) Public health films shown	9

(5) Duc Pho hospital was fitted with screen doors and windows.

c. Public education:

(1) Construction of two elementary schools was completed. (5 classrooms).

(2) Work continued on two elementary schools. (9 rooms)

(3) 200 school kits were distributed.

CONFIDENTIAL

18

AVDDC

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

(4) 17 classrooms of school furniture were built.

(5) 12 hours of English classes were taught weekly. Total student participation 270.

(6) 50 General Walt scholarships were administered.

d. Refugee relief:

(1) 800 housing units were initiated in 3 separate camps. Units are 50% complete.

(2) 38 loads of foodstuffs were distributed to supplement the CURDS food program.

(3) The sanitary fill was operated by three camps on a rotating basis and the salvage lumber utilized to build homes and start several small woodcraft shops.

(4) 200 refugees were given steady employment producing rock which was used to upgrade the base camp road network.

(5) An additional 20 refugees were employed daily within the camp filling sandbags, building bunkers, digging drainage ditches, etc.

(6) Transportation was provided CURDS to assist moving the food and materials provided the District through civilian channels.

e. Civic construction:

(1) One market was constructed in Sa Huynh (BS924223).

(2) Six entrance gates were built on approaches to schools and public buildings.

(3) Construction on six wells were completed.

(4) A refugee reception center was initiated.

(5) Poles and wire were procured for the rural electrification program.

f. Psywar:

(1) Psychological operations included leaflet drops, ground and aerial speaker missions (both live and taped).

16

CONFIDENTIAL

19
CONFIDENTIAL

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

(2) Leaflet drops and aerial speaker missions were accomplished using C-47, Q-2, and UH-1D aircraft. Ground missions were accomplished with a 250 watt snaider.

(3) Armed propaganda personnel were available; however, effectiveness and potential was not realized because of a lack of requests from the battalions to utilize the team in the field.

(4) Summary:

(a) Leaflets dropped	25,240,000
(b) Aerial speaker time	34 hours
(c) Ground speaker time	270 hours
(d) Halliers	7
(e) Leaflets made	8
(f) Tapes made	32

SECTION 2 (C) COMMANDERS OBSERVATIONS

Observations (Lessons Learned)

1. (C) Personnel: NOT USED

2. (C) Intelligence:

a. Item: Use of Vietnamese National Police, village and hamlet officials, and military intelligence informants in combat operations.

Discussion: American units have successfully used National Police and village officials during combat operations. However, skilled interpreters are needed to convey the US Commanders objectives. A thorough briefing is necessary and should include identity of the area of operations, command relationships, and objectives to be attained by the National Police and village officials. Inhabitants within the AO should be interrogated in detail to determine which are innocent civilians and which are Viet Cong.

Observation: A thorough briefing of National Police and village officials is a necessary prerequisite before employing them with US units.

b. Item: NVA bunkers and static observation points.

Discussion: Long Range Reconnaissance Patrols operating on ridges where there is low scrub vegetation or high single canopy should be especially watchful for bunkers and fortified OP's. These installations are located where they have a commanding view and excellent fields of fire on both sides of the ridge.

Observation: Long Range Reconnaissance Patrols should be extremely careful to avoid detection when patrolling ridges. If they are engaged by personnel manning fortified positions, the best course of action is to withdraw and report the bunker location to a higher unit.

c. Item: Movement of Long Range Patrol.

Discussion: When patrolling in relatively open or high single canopy terrain a loose diamond formation is usually more effective than a file formation. A loose diamond formation with 4 to 6 meters between personnel has been found to be the best formation for immediate reaction to enemy contact. More firepower can be achieved to the front without sacrificing firepower to the flanks. A 180° break of contact can be made by the point disengaging through the center of the diamond.

21
CONFIDENTIAL

CONFIDENTIAL

24

AVDDC-OP

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

while the flanks reverse directions. In jungle or heavy vegetation; however, a file formation is most desirable for maintaining control and leaving little sign of movement through the area.

Observation: The diamond formation has proven to be best suited for long range patrols unless the vegetation is so dense that a file formation is required.

d. Item: Use of aircraft with OH-23 helicopters on Scouting Missions.

Discussion: Use of the O1-E aircraft with a qualified aerial observer in conjunction with a scouting team of OH-23 helicopters has proven to be a valuable intelligence asset during the reporting period. The O1-E flying at a higher altitude can observe a larger area and detect movement and suspected enemy locations that require further investigation. The location is then marked with a smoke rocket and the scout team takes the area under close reconnaissance. If enemy are sighted they are taken under fire by machineguns mounted in the OH-23.

Observation: A team of OH-23 helicopters and a O1-E Bird Dog aircraft have proven effective in gathering intelligence information as well as finding and engaging enemy in hidden positions.

e. Item: Response to MID reports.

Discussion: Operations in relatively pacified areas of operation require extensive use of intelligence reports to completely eliminate hamlet guerrillas from the AO.

Observation: Operations must be directed at the hamlet infrastructure to prevent enemy activity in relatively secure or pacified areas. This unit has conducted operations directed at the hamlet infrastructure by utilizing good intelligence information provided by MID personnel. As reliable information was gathered by MID personnel successful operations were planned.

3. (C) Operations:

a. Item: Close air support.

Discussion: Air Force Tac-Air has not been extensively employed by battalion size units during this period for two reasons:

(1) Enemy contact has usually been at very close quarters to VN civilians in populated areas or to US troops. Use of Tac-Air might have resulted in US troops and VC civilian casualties.

(2) Helicopter gunships; however, have been employed extensively. They were found to be more responsive and could give the pinpoint accuracy needed for the close contact normally found in the Bde's AO.

Observation: Helicopter gunships are very effective when units are in close contact with the enemy. Direct communication with the gunship versus relaying through FAC to tactical aircraft facilitates a flexible response to a rapidly changing close contact.

b. Item: Use of the E-8 CS Tactical Launcher and CS grenades.

Discussion: There has been no opportunity to employ these devices in a combat situation and to evaluate their effectiveness; however, they have been

CONFIDENTIAL

25

CONFIDENTIAL

AVDLC-OP

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

put into perimeter defense positions. Test firings show that adequate coverage of any target area is obtained. Wind direction is a prime factor in the employment of these dispensers. In offensive operations, CS grenades have been very effective in routing the enemy and suspected enemy from bunkers and holes.

Observation: CS (Riot Control Agent) is an asset in both offensive and defensive situations. Its continued use will enhance the effectiveness of combat operations.

c. Item: Effectiveness of night operations.

Discussion: Night operations were conducted against Viet Cong elements to keep them from moving at night. Ambushes are effective, but greater psychological results can be obtained by moving small elements throughout a selected AO.

Observation: Interrogation of prisoners has revealed that night operations have a demoralizing effect on the Viet Cong and prevent them from moving freely at night to collect taxes and propagandize the population.

d. Item: Operation of the AN/VRC-12 series of radios with a Yagi antenna.

Discussion: This unit has operated a two-station special purpose FM net. The two stations were separated in such a manner that terrain would not permit operation of a net utilizing the AN/VRC-12 series of radios with RG-292 antennas. It was decided to try a folded dipole (Yagi antenna) at each station instead of the RG-292. The efficiency of this antenna enabled reliable FM voice communication to be conducted between the two stations utilizing the RT-524. The directional characteristics of the Yagi limits net configuration to two stations.

Observation: Employment of the Yagi antenna with the present series of FM radios provides more economical (i.e. elimination of relays) long range FM voice communications.

e. Item: Effectiveness of the new D and E companies (Infantry Battalion).

Discussion: The addition of these units has increased the combat effectiveness of the Infantry Battalion. The extra rifle company (D company) gives the Battalion greater flexibility. E Company, composed of the combat elements of Headquarters Company (i.e. Recon Platoon and 4.2" Mortar Platoon) can be more effectively controlled.

Observation: The reorganized Infantry Battalion can concentrate on combat operations with the lettered companies and rely on Headquarters Company for the necessary administrative and maintenance functions.

f. Item: Need for peneprine distribution equipment.

Discussion: The application of peneprine or similar dust palliative is a major engineer task in Vietnam. Adequate distribution equipment is not available to combat engineer companies and battalions. Currently, distribution is accomplished with improvised applicators which are both awkward and inefficient. A large capacity, truck-mounted distributor (800 gallons or larger) is needed.

Observation: Present equipment available for dust palliative distribution is unsatisfactory. Necessary applicators should be included in the TOE's of Engineer Units.

23

CONFIDENTIAL

CONFIDENTIAL

AVDDC-OP

2 February 1968

2b

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

g. Item: Use of OH-23 helicopters for Personnel detection missions.

Discussion: Two test missions were flown using a modified manpack personnel detector in an OH-23 Helicopter. The purpose of the test was to determine if the OH-23 could be used for detection "Beagle" missions. The OH-23's were employed in pairs with one ship carrying two door gunners. When the detector indicated the presence of personnel on the ground, the area was searched and any enemy was taken under fire. More "Beagle" missions will be conducted in future operations.

Observation: Personnel detection (Beagle) missions were successful and were found to be valuable in locating the enemy in areas inhabited by civilian personnel.

h. Item: Infusion of Popular Force Personnel into US Units during combat operations.

Discussion: Popular Force personnel were infused at the squad and fire team level; keeping them in pairs and separated in the file by two or more US soldiers. Two interpreters were available and were utilized during these operations. Upon completion of the days operation, Popular Force personnel were reassembled into their own platoon organization and released at predesignated points. At this time, the US Units would emplace stay behind ambushes to prevent compromise of their positions. All attempts to integrate Popular Force personnel into these ambushes were negated by the Popular Force Commander, who daily stated his personnel had other missions to perform during the hours of darkness.

Observation: A major problem area was the lack of communication even though two interpreters were available. This problem was particularly noticeable when contact was made. Squad leaders had great difficulty in making PF personnel understand what needed to be done. A lack of discipline resulting from the absence of a chain of command was observed in the platoons that worked with this unit; however, the presence of US Advisors favorably effected the performance of PF units. PF units were extremely effective during search operations; however, when contact was made they did not demonstrate a working knowledge of the principles of fire and maneuver. PF personnel were more than eager to return fire but hesitant to make any forward movement.

i. Item: Combined US, RF/PF operations.

Discussion: The best method of conducting combined US, RF/PF operations is to employ the US Units as the cordon and to use the RF/PF Unit to perform the search.

Observation: The most successful combined operations have been conducted when advisors were present to co-ordinate the RF/PF search element with the overall operation plan. Without the assistance of advisors and interpreters, the RF/PF Units lack discipline and do not search thoroughly.

j. Item: Radio consoles for command and control helicopters.

Discussion: Command and control aircraft utilized by this unit are not always equipped with radio consoles. Standard consoles are effective and allow close coordination during combat assaults or combat operations. Jury-rigged consoles are a poor substitute, due to the lengthy installation time which may preclude utilizing the Command and Control aircraft for other missions such as medevac, resupply, and evacuation of dead.

CONFIDENTIAL

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

Observation: Command and Control helicopters should be equipped with consoles to provide more reliable communications with tactical units on the ground and to prevent loss of time while installing jury-rigged consoles.

4. (C) Logistics: Not Used.

5. (C) Civil Affairs:

a. Item: Interpreter for HB (2 man loudspeaker) Psychological Warfare Team.

Discussion: The HB Psychological Warfare Team attached to this Brigade does not have an assigned interpreter who is trained in psychological operations. This necessitates substituting an interpreter from other sources who is not trained in the techniques of psychological warfare. Consequently, the effectiveness of the team is greatly reduced.

Observation: Each HB team should have a psychological operations trained interpreter assigned to it from the resources of the psychological operations battalion.

b. Item: O-2 aircraft aerial loudspeaker missions.

Discussion: Interrogation of POW's and Hoi Chanks indicate that speaker missions from the O-2 aircraft flown in excess of 1500' altitude are not understandable. This observation is further substantiated by interpreters and GVN troops who were placed on specific targets as test personnel. Numerous recommendations that O-2 aircraft broadcast at an altitude of 1500' have been forwarded through channels.

Observation: O-2 loudspeaker missions should be flown at an altitude of 1500' since the experience of this Brigade indicates that the present program is ineffective.

2 February 1968

SUBJECT: Combat Operations After Action Report

1. Name of Operation: Battle of PHU NHIEU.

2. Date of Operation: 170800H to 171800H January 1968.

3. Location: PHU NHIEU (1) Hamlet, Quan Binh Son District, Quang Ngai Province, RVN.

4. Command and Control Headquarters:

a. 1st Battalion, 14th Infantry. This operation was coordinated with an operation by the 1st Battalion, 52nd Infantry.

b. Reporting Officers:

(1) LTC George L. Ball, CO 1-14th Inf.

(2) CPT Albert D. Carter CO A/1-14th Inf.

(3) 1LT Bruce G. Shipley CO B/1-14th Inf.

(4) CPT Robert R. Vaughn CO C/1-14 Inf.

(5) CPT Harold E. Sells CO D/1-14 Inf.

(6) 1LT Terry E. Bender Rec Plat/1-14th Inf.

5. Task Organization:

a. Company A, 1st Battalion, 14th Infantry.

b. Company B, 1st Battalion, 14th Infantry.

c. Company C, 1st Battalion, 14th Infantry.

d. Company D, 1st Battalion, 14th Infantry.

e. Reconnaissance Platoon, 1st Battalion, 14th Infantry.

6. Supporting Forces:

a. Artillery fire support was provided by B Btry, 2nd Battalion, 9th Artillery and A Btry, 3rd Battalion, 18th Artillery. Although only 85 rounds of 105mm ammunition were expended during the LZ preparation after an unexpected change in the landing zone, the fire was characterized by a high degree of accuracy and flexibility.

AVDDC-OP

2 February 1968

SUBJECT: Combat Operations After Action Report

B. The 123rd, 174th, and 176th Assault Helicopter Companies provided aerial surveillance, troop lift, and armed helicopter support. In addition, HHC, 3d Brigade Aviation Section provided OH-23 observation helicopter (armed) support. The armed helicopters and the OH-23's operated under the control of airborne and ground commanders.

c. 3d Brigade Aviation Section OH-23's were armed with two (2) M-60 machineguns each and furnished the ground commanders with suppressive fires and immediate information on the enemy's location, movement, and weapons capabilities. They engaged and killed a total of seven (7) VC.

7. Intelligence:

Intelligence reports received during the planning stages for the search and destroy operation to be conducted on 17 January 1968, indicated that the 95th LF Company was operating in the hills, vic BS692875. On 14 January 1968, the Binh Son District Headquarters reported that the 95th LF Company was located in an Thinh (2) Hamlet, BS725896. Based on this information, An Thinh (2) was designated as the objective area. The 95th Company was reported to have a strength of 100 men equipped with 81mm mortars, 2 LMG's and assorted small arms. It was anticipated that when US forces entered the area the enemy would hide in the ditches and hedgerows and fire on the advance elements. As US forces closed on the village, the enemy was expected to withdraw and try to evade to the north or south along the coast and hide in the many bunkers and holes within An Thinh. A combat assault was planned on the high ground about three and one half kilometers from the objective, An Thinh (2). Elements from A and B Companies, 1st Battalion 52nd Infantry were to occupy blocking positions along the beach and the high ground north of An Thinh (2). Elements designated for the combat assault were B Company, 1st Battalion, 14th Infantry and the Reconnaissance Platoon 1-14th Infantry. The initial contact was initiated by VC employing BAR and LMG fire on A/1-52nd Infantry at approximately 0815H. Because of this contact, a new landing zone was selected, closer to the objective area. The elements on the landing zone did not receive any contact. However, as the Reconnaissance Platoon moved 200 meters to the southeast they received automatic weapons fire and several M-79 rounds or hand grenades. The enemy was hiding in trench lines concealed by thick hedgerows along trails and villages, and the Battle of PHU NHIEU ensued. Almost immediately, the enemy troops were observed from the air by an aerial observer in an armed OH-23 helicopter. OH-23's engaged the enemy at hedgerow level and inflicted many casualties and created a great deal of confusion among the enemy. As the maneuver elements of B Company and the Reconnaissance Platoon of the 1st Battalion, 14th Infantry engaged the confused enemy, the VC became disorganized and fled from the area of contact to hide in the many bunkers and hedgerows in the vicinity of PHU NHIEU (1), PHU NHIEU (2) and PHU NHIEU (3). The Battle of PHU NHIEU then became one of searching the hamlets, house by

3 - 2
CONFIDENTIAL

33

CONFIDENTIAL

2 February 1968

house, hedgerow by hedgerow, and bunker by bunker. The enemy had to be flushed from their hiding places or killed in them. In the action there were eight prisoners taken; among them an acting platoon leader. Interrogation of these prisoners indicated that the enemy had elements of four Local Force Companies involved in the Battle of PHU NHIEU. The units identified were the 95th LF Company, P31 LF Company, 21st LF Sapper Company and the T18th LF Company. The total approximate strength of the enemy units engaged in the Battle of PHU NHIEU was 240 men. The prisoners stated they were in the PHU NHIEU area to train for an attack on an unknown area, possibly an RD Hamlet, in the vicinity of PHU NHIEU within the next ten (10) days. The man, documents found on the enemy bodies and in the area of contact verified the units involved in the battle were subordinates to the Binh Son Viet Cong District Headquarters. The intelligence reports that were received in the planning for this operation were considered accurate and timely. This information was sufficient to insure that the friendly elements around PHU NHIEU were deployed in a position that contributed to the overall success of the operation. The results of this successful operation are reflected in PAR 10C.

8. Mission:

A/1-14th Infantry and C/1-14th Infantry were to conduct screening missions on the high ground west of the original landing zone. A/1-52nd (-), and B/1-52nd Infantry (-), and D/1-14th Inf were assigned missions of establishing blocking positions. Later D/1-14th Infantry received a change of mission to conduct search and destroy operations and conduct a village sweep.

9. Concept of Operation:

a. B/1-14th Infantry and the Ken Plat were to conduct a combat assault to an LZ vic BS693880 and conduct search and destroy operations on 2 axis to the east of Objective 1 (An Thinh, 2), vic BS73C892. (See Annex A). D/1-14th Infantry conducted a combat assault on 160845H Jan 68, to an LZ vic BS878857 and conducted search and destroy operations on the Batangan Peninsula. They established blocking positions vic BS738877 and BS73C880 at 170800H Jan 68. A/1-14th Infantry and C/1-14th Infantry were given missions to conduct screening missions vic BS655865 and BS685835 overlooking exfiltration routes from the area of expected contact. A/1-52nd Infantry (-) occupied blocking positions along with B/1-52nd Infantry (-) along the northern boundary of AO GRANT vic BS729898, BS725896, and BS7C8888.

10. Execution:

a. Based on available current intelligence, a plan was formulated to combat assault suspected enemy locations. Blocking positions were selected by 1st Bn, 52nd Inf in conjunction with this plan. Complete coordination was

3 - 3

CONFIDENTIAL

CONFIDENTIAL

40

2 February 1968

finalized prior to the combat assault of B/1-14th and Rcn Platoon.

b. At 170815H Jan 68 vic BS725895 (An Thinh, 1), A/1-52nd reported receiving BAR and LMG fire. Due to the immediate tactical situation, the LZ for Bravo Company was changed at 170830H Jan 68 to a location recommended after a hasty aerial reconnaissance by the Battalion S2. At the same time, the Battalion CO was briefing the flight leaders and the Battery Commander on the conduct of the operation at LZ UPTIGHT. The ground forces, artillery fire support, airlift aircraft, as well as the supporting armed helicopters responded quickly to the last minute change in the landing zone.

c. Upon entering the landing zone, all maneuver elements deployed according to the original plan. At this time, "Aloha" OH-23 aircraft entered the area of operation after being briefed at the Battalion TOC on LZ UPTIGHT. The Reconnaissance Platoon moved from the landing zone as planned and made contact in a hedgerow south of the LZ. They received two grenades from the hedgerow. "Aloha" immediately moved to the area of contact. Enroute to the area "Aloha" C6 and C4 observed numerous VC running in a trench line south of PHU NHIEU vic BS713884. They immediately engaged the enemy with M-60 MG's. Armed helicopter support of the combat assault immediately joined them and placed accurate suppressive fires on the enemy. Bravo Company and the Reconnaissance Platoon continued execution of the original plan and closed quickly with the VC located in the trench line. Upon entering the enemy trench line the Rcn platoon found numerous bunkers which would take considerable time to clear by physically entering each bunker. Realizing the time necessary to eliminate each bunker, LTC Ball placed the Delta 30 Platoon OPCON to Bravo Company and gave them a mission of blocking vic BS723877. Plans were made to lift the Delta 20 Platoon from LZ UPTIGHT to a secure LZ on the beach to link up with Delta 10 and sweep An Thinh (1). Bravo 6 took operational control of Delta 30.

Artillery support during the entire combat operation was limited due to the close proximity of friendly units and numerous aircraft over the contact area.

Close fighting along the trench line and hedgerow took a drastic turn as many of the enemy broke from the trench system into the open. They were immediately engaged by elements of B/1-14th and killed. Captives were used as tunnel rats. Exploitation of the tunnels continued throughout the day and the objective area was swept by elements of the Delta Company. The 3d Platoon of Delta reverted to its parent unit. Bravo Company continued police of the battle field until dark and set up a Company perimeter on the nearest defensive terrain. All companies were alerted for movement along trails in the area. Battlefield police continued on 18 January, and all bunkers were re-entered and destroyed. The results of the days of contact were very significant and are as follows:

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

SPONSOR PROGRAM FOR THE 11TH INFANTRY BRIGADE (LT) AND
THE 198TH INFANTRY BRIGADE (LT)

1. During the reporting period the 3d Bde TF, 4th Infantry Division sponsored the 11th Infantry Brigade (Lt) and the 198th Infantry Brigade (Lt). Advance planning groups preceded the Brigades and included the following Key Personnel:

- a. Brigade S-3
- b. Brigade S-2
- c. Brigade Signal Officer
- d. Base Development Officer
- e. AG Officer
- f. OBS Officer
- g. Brigade Supply Officer
- h. Asst Brigade Maintenance Officer
- i. Brigade Ammunition Officer
- j. Engineer NCO
- k. Finance Chief Clerk
- l. NCOIC (BSO)
- m. Clerk (BSO)
- n. Clerk (S-3)

2. To insure that the members of the advance planning groups were properly received and smoothly integrated into their respective areas of interest, the 3d Bde provided sponsors on an individual bases. Sponsors assembled at the arrival points to greet and assist the incoming party. Command briefings were scheduled to help the groups gather information, evaluate the situation, formulate plans, and implement the necessary action to insure the expeditious move of the Brigades.

3. Specific orientations were conducted in the following areas:

- a. Briefing by the 3d Bde commander and appropriate staff members.

- b. Visits to two Brigade bases.
- c. Direct coordination between all staff members.
- d. A visit to an interrogation center.
- e. Obtaining maps.
- f. Reception procedures for the Brigade to include:
 - (1) Security of the Brigade on arrival.
 - (2) Movement of the Brigade to firebases.
 - (3) Logistical support.
 - (4) Communications support.
- g. Coordination with US and local officials to include:
 - (1) Obtaining a list of all US and local officials.
 - (2) Determining attitude of local populace toward US Forces.
 - (3) Estimating requirements for civic action projects.
 - (4) Obtaining a list of recommended civic action projects for the Brigade.
 - (5) Determining the health hazards of the area.
- h. Logistical structure and methods of support to include:
 - (1) Class I.
 - (2) Class II and IV.
 - (3) Class V.
 - (4) Medical supplies.
 - (5) Special service supplies.
 - (6) PX supplies, to include sundry packs.
 - (7) Crypto supplies.

- (8) Maintenance channels for all equipment.
- (9) Salvage channels.
- (10) "Dustoff" procedures.
- (11) Graves registration.
- (12) Laundry and bath facilities.
- (13) Finance.
- (14) Personnel replacement.
- (15) Postal service.
- (16) Transportation.

i. Administrative requirements and methods of operation for the Brigade to include:

- (1) Personnel status reporting (PSD to higher headquarters).
- (2) Personnel replacement system.
- (3) Personnel infusion system.
- (4) Casualty reporting.
- (5) Red cross.
- j. Regulations and directives of higher headquarters.
- k. Availability of training facilities.
- l. Availability of fortification materials.
- m. Enemy order of battle.
- n. Procedures for map and photo procurement.
- o. Procedures for obtaining security clearances.
- p. Establishing channels of intelligence information.
- q. Determining status of linguists.
- r. Obtaining frequencies and call signs for the Brigade.

2 February 1968

SUBJECT: Operational Report for Quarterly Period Ending 31 January 1968

4. The 3d Brigade assisted the incoming Brigades in preparing the following plans:

- a. Brigade debarkation and movement plans.
- b. Administrative and logistical support plans.
- c. Base development and security plans.
- d. Civil affairs plans.
- e. Intelligence estimates.

5. Upon arrival of the incoming Brigades the 3d Brigade provided the following support:

- a. Met the incoming elements at the airfield and transported them to the 3d Brigade firebases.
- b. Provided tent kits and personnel to help erect the tents.
- c. Initially provided aviation support.
- d. Conducted briefings for commanders and staff sections.
- e. Coordinated logistical support.
- f. Conducted on-the-job training for all principal staff officers.
- g. Provided an orientation flight over the TAOR for all commanders and principal staff officers.
- h. Conducted a counterpart training program in which officers at all levels worked with a 3d Brigade counter-part in the same position.
- i. Conducted a three day training program for each Co to include:
 - (1) NVA and VC tactics.
 - (2) Practical work with booby traps.
 - (3) Patrolling and ambushes.
 - (4) Grenade and demolition.
 - (5) TO procedures.
 - (6) Employment of scout dogs.

- (7) Zeroing of weapons.
- (8) Malaria control.
- (9) A training combat assault into a relatively secure area.

j. All units were given instruction by Vietnamese cadre from the 2d ARVN Div on local customs and courtesies at the Vietnamese village training site.

k. The Brigade commanders accompanied the 3d Brigade commander on missions and visits during the training period.

6. RECOMMENDATIONS AND CONCLUSIONS:

a. Recommendations:

(1) Incoming units should bring sufficient logistical and maintenance support elements with the main body. The 3d Brigade initially had to furnish a portion of this support. As a result maintenance on this Unit's equipment was not always accomplished in the desired time frame.

(2) The maximum number of personnel eligible for second tours in Vietnam should be infused into incoming units.

(3) US air control teams (FAC'S) should be completely equipped and arrive with the unit. In the past it has been difficult to obtain equipment in country.

(4) Additional aviation assets should be provided to the host unit during the period of sponsorship of the incoming Brigade in order to insure continuity of combat operations and the availability of air control for training purposes.

b. Conclusions: Incoming units benefit immeasurably from the sponsor program. Particular emphasis must be placed on combat intelligence, operations, training logistics, and maintenance. The program should be continued for all units arriving in Vietnam.
