DCS 200-105C-67

Date Shot 14 Aug 67

Location Vietnam

Date Screened 12 September 1967

Photographer Abbott, Robertin, McBride

REMARKS:

Abbott's footage underexposed. Robertin's footage on convoy mostly overexposed. McBride aerials, too much shot in opposite direction of convoy movement very distracting. If the coverage on the M151 was to show the vehicle rather than the patrol, then daytime coverage would have been a better selection. Very little of the vehicle is noticeable in the night coverage. The night sequences were not effective. There was no story.
