Dear Friend,

The prognosis of a disease is the prediction of the future conditions the disease will cause and it guides the physician as he decides how radical the treatment must be. A doctor who treated a disease without considering the prognosis would be guilty of malpractice.

Society is sick. Present symptoms are severe and indications are that things will get worse. Present symptoms include: 1) Uncontrollable inflation; 2) Increasing unemployment; 3) The declining stock-market; 4) Growing crime and violence; 5) Urban guerrillo warfare; 6) Communist activity; 7) Faithless religion with consequences such as situation ethics and Watergate; 8) The slaughter of the unborn; 9) Alcoholism and the drug culture; 10) Pervasive pornography, permissive sex, and family breakdown.

Similar conditions exist in most of the Western World. This situation is ideal for world communism which has contributed to its creation and which concentrates on its exploitation.

Communism is increasing in strength and activity. Soviet military might has grown so that it surpasses that of the U.S.A. in many vital areas. Communists play an important role in most of the conflicts that currently create misery. They instigated the Arab oil boycott which has had such calamitous consequences. They are working energetically to seize power in Portugal and Greece and to thereby destroy the effectiveness of NATO. They are creating industrial anarchy in countries such as England and Australia by causing strikes organized by communist-controlled or influenced unions. In many countries they have growing political power.

Treatment of communism is essential for the cure of our present problems. To ignore it is malpractice that could cause death. The communist formula for the conquest of the U.S.A. is working well. This formula is: "External encirclement, plus internal demoralization, leads to progressive surrender."

Effective treatment depends upon accurate diagnosis. The Crusade has been presenting such a diagnosis for more than 20 years. By constant research, accurate information on the doctrines, methods, plans and objectives of communism has been secured. This evidence leads to the inescapable conclusion that the communists are working ceaselessly to conquer the U.S.A. Although the evidence has been presented to the leaders in all important areas, action to combat communism has proved inadequate and the danger of communist conquest has grown.

Two options are open: 1) Accept defeat and cease activity; 2) Accept communist progress as a challenge to more intelligent, energetic, and effective work.

We choose the second alternative. It would be disastrous if the Crusade ceased to function in this critical situation. This could be forced upon us, however, if support for our work is not sustained. Income during the summer months has been the lowest in recent history. We must have additional support during the remainder of the year. We need a deluge of donations. Sixty thousand dollars must be forthcoming.

Despite the problems you are confronting, I ask you to give as generously and sacrificially as the prognosis demands. You can give with faith, hope, and love. These are the weapons that can defeat communism.

With Christian love,

Fred Schwarz
