Nine adults between the ages of 24 and 78 years old. These are figures that reflect the ghastly drama of the people of El Salvador and the criminality of their government officials.

The example of Morazan is only one in a chain of genocidal massacres committed against the civilian population, there are many more.

President Reagan, Alexander Haig of the State Department and Congress are ultimately responsible for the sending of guns and bullets to the Salvadoran military who in turn tear open the lungs of children and bathe them in their own blood.....

Do we as American want to continue to shower our "love" for the Salvadoreans in this fashion?

Is the genocide and massacre of children and innocent civilians proof to the world that we are a power greater than any other on this earth?

IF YOU BELIEVE THAT SOMETHING HAS TO BE DONE TO CHANGE THIS POLICY OF THE U.S. IN EL SALVADOR WRITE TO PRES. REAGAN, ALEXANDER HAIG AND YOUR CONGRESS PERSON TO DENOUNCE THE PRESENCE OF THE U.S. IN EL SALVADOR.
