IT'S TIME TO SMASH TERRORISM IN AMERICA

HENDERSONVILLE (FAN)-- Terrorist activities by groups like the Symbionese Liberation Army (SLA), such as the kidnaping of Patricia Hearst (real or not) and the 15 April robbery of a San Francisco bank by heavily armed bandits, apparently members of SLA, is a rehearsal for what is going to happen to America soon. These acts are training Black revolutionary's in the United States the technique of HOW TO DO IT to rob banks to raise money for their activities and use kidnaping for pressure on their enemies and for money and free publicity to promote their terrorist program. Which is, they want to take over America.

Most revolutionary's in America are BLACK, and their enemies are WHITE people. Like You!

Watch for sniping of White people on the streets and in their homes to increase. Not because these White people are "Racists" or "Fascists" or because they might happen to be members of the FAN or some other White organization, but just because of the color of their skins, White. All White people are in danger. America is in danger from these Blacks.

WHAT WE CAN DO: It's impossible (right now) to get all the Blacks back to Africa. And Yes, a few of them are civilized human beings, so we must use humane methods.

Two-thirds of the 50 States (34) are required to petition for a Constitutional Convention in order for one to be called. With a Constitutional Convention, we could make all the Blacks WARDS OF THE STATE (legally), Put them in large Detention Camps, in the continental United States. Surround the camps with heavy barbed wire, police dogs, and FAN Security men armed with 12 gauge pump shot guns and government orders to Fire on anyone trying to climb the fence.

With this done, White people could return to their normal way of life. White women could again walk on the streets without being Mugged, Raped or Killed. There would be no more Busing of little children out of their neighborhood schools into a mixed jungle environment.
