NATIONAL LEADER
Charles White

AMERICA IN TROUBLE-NIXON THINKS WORKERS SHOULD STARVE

Food stuffs sent to communists and other nations that hate us has caused shortages and high prices on almost all American goods.

I talk to hundreds of people every day and none of them can figure out why the American people always come Last.

America is suppose to be the richest nation in the world, but in most homes both the husband and wife work, or the husband has two jobs or a lot of overtime and they still can't get ahead or even keep all the bills paid up. They know something is wrong but a lot of people don't know what is wrong.

FOR
AMERICA
FIRST

Part of the what is that the working people have to pay the bills for a lot of people that won't work. Somebody has got to pay the bills. Nobody gets by in this world for nothing. What is left over is sent to communist nations to fight us with, that is whats left after the dirty politicians get their cut.

And now I hear that Nixon has vetoed the \$2.20 per hr. minimum wage bill. What a dirty dog. What man with a family can live on even 2.20 per hr.?

America has plenty of food and the American people should get what they need and want at an honest price. If there is any surplus grain etc. left over we could sell it off, but only to friendly nations that won't use it against us.

A BETTER
AMERICA IS
OUR GOAL

FUEL

The politicians in Washington could stop the fuel shortage that will put a lot of homes out of heating oil this winter. They will support Zionism over your children being warm.

Because of the Nixon support of the Jews the Arabs are cutting down on the number of barrels of oil the U.S. of A. can ship, and at the same time raising prices on oil going to the U.S. of A., to get back at Nixon. When a country lets American companies spend their money to get the oil out the American government should stand up for the companies and tell the Arabs "Hands Off", and back it up by any means it takes.

As far as oil is concerned, the US is at the mercy of the Arabs at this time.

Fuel prices will continue to rise and be short until Nixon gives up his support of international Zionism-Communism and puts the line back where it was before the 6 day war. The line should be put back and enforced against the Jews and the Arabs.

All of this trouble is what you get when a president backs down from high prices, threats from Arabs, Zionism and Communism.
