NIXON BACKS DOWN:

MORE HIGH PRICES TO COME

AUGUST
1973

"Phase Four" is a bunch of Bull. Prices are exploding. The cost of living goes up almost every day. What hope is there for this government, with its record of backing down from every threat, holding wages of low-paid workers down? How can it control inflation when it is powerless to stop the price explosion?

Reminds one of the story about the woman in Georgia who had a man up in court for stealing \$65.00 worth of groceries out of the glove compartment of her car.

EDITOR:
CHARLES
WHITE

The government wont do enough to curb inflation, but will do enough to turn the people against the government. We need not only a new-type government but a new-type policy- Positive Measures- to rally the country against inflation.

America needs a strong elected government with constructive policies to win the people's enthusiasm, and smash inflation.

There is only one way to meet this situation, and no real government would shirk it: A tough siege economy, with direct action by government to hold prices steady, and with wage increases directly linked with greater productivity and effort. Government must also intervene to help all weaker members of society, such as pensioners, widows and the badly underpaid. It is going to be tough, but government must be fair and just.

Isn't it time to take a stand with FIGHTING AMERICAN NATIONALISTS for humane repatriation of colowreds in America and stop the drag on the economy by those who give nothing but use up needed products?

BULLETIN

Isn't it time to kick-out the private interest groups in Washington that have patriotic people shot who try to run against them?

Isn't it time to stop the sell-out of our country by Democrats and Republicans alike to communism?

Isn't it time to smash the chaos in our streets with positive measures. When I'm President I'll incorporate F.A.N. Members into a combination of Federal army and police force. I'm going to do away with the Department of Justice entirely.

Isn't it time for America to have an "America First" government? How long can this country afford the old party failures? America will continue to slide so long as government is led by the nose by the Jewish speculators. "America First" is not only F.A.N. policy; it is the only policy which can now save America!

WHAT YOU CAN DO

(1) Pass out the F.A.N. literature. (2) Write letters about our policies to your local newspaper. (give F.A.N. address) Many local papers will publish such letters and this is good for reaching new people. Some of our best members have joined after seeing a letter in their local paper. (3) Join F.A.N. and work for America First. You can help save America, yourself and your family from communism. Inform yourself and inform others. For best results join a fighting organization like F.A.N. and become active in spreading the truth.
