

Dear Bill Keys:

May 24 '64

The statement on the anti-missile
missile is excellent, and profoundly
urgent.

Freeman Dyson — the most
brilliant theoretical physicist —
pleaded before the Federation
of American Scientists this issue
to be taken seriously by.

I enclose his article on the
issue — before it would be used
in any way or shown around,
I guess we would have to
ask his permission. I am
so glad you covered the problem
so carefully. Sincerely Yours Hubert

I have an other copy
of this article.
