

Liberty Amendment

Committee of the U. S. A.

July, 1976

P.O.Box 7029 University Station, Provo, Utah 84602

Dear Friend of the Liberty Amendment:

HAPPY BIRTHDAY time is here--and for us who love and defend human liberty. it is a double barreled event this Bi-Centennial year. The BIG one, of course, was the 200th Birthday celebration on July 4, 1976, honoring the DECLARATION OF INDEPENDENCE, which put into words the idea of liberty for the people of this country, and eventually for the whole world.

It would have been a wonderful gift to our beloved United States if we could have observed this 200th Birthday by making the LIBERTY AMENDMENT a part of our Constitution. Hope and pray this will be done before long.

During the past years it has become a tradition with us to celebrate another July birthday--July 20--because this is the birthday of Willis E. Stone, author of the LIBERTY AMENDMENT. This modern Patriot has given his "life, fortune and sacred honor" to this work as surely as did the men who signed the Declaration of Independence; his lifetime has been spent working to restore the glories the Founders created and gave to us.

It seems especially appropriate this year that as your new National Chairman I should write and ask of you an outpouring of your thanks for the efforts made by this great American. Willis E. Stone's contributions to the well being of every citizen of this country are far beyond recounting. As a brilliant student of the Constitution, a dedicated analyst of trends and statistics that have enabled him to give us the true facts, a tireless and dynamic speaker for the principles on which this country was founded, and a colorful and impassioned writer on the subject of Liberty, Bill Stone has performed services for all of us that have enriched our lives immeasurably.

Fortunately, in his new position as Chairman Emeritus, Willis E. Stone will continue doing those things he does extraordinarily well--researching, writing, and speaking for all manner of media; appearing throughout the country on the pressing business of restoring our Constitution to full force and effect. Our job is to see that he has the facilities needed to carry on this vital work.

Please join with me in making the birthday of Willis E. Stone--who will be 77 years young on July 20--a memorable occasion. We have a limited stock of a flexible plastic 33 1/3 RPM recording of THE VOICE OF LIBERTY which Bill Stone made some time ago, and this souvenir will be sent out as a "thank you" as long as stock lasts. Please use the enclosed envelope for your birthday wishes and be assured of my gratitude for your help.

Sincerely,

W. Cleon Skousen, National Chairman
