

STRATEGY OF SLAUGHTER

CHILDREN, WOMEN AND STUDENTS

ARE THE "MILITARY TARGETS" OF ARAB TERRORISM

Explosives on a university campus, mines in school buses and in school yards, — this is the pattern of murder of those who call themselves "freedom fighters" — gangs of cowardly assassins against innocent civilians — men, women, and children.

March 6, 1968: The target of their mission: the cafeteria on the Hebrew University campus, Jerusalem. The success of their mission: twenty-two students injured and mutilated by the blast of a hidden plastic bomb.

Arabs, too, study at the Hebrew University — Arabs from Israel and from the administered areas. Hundreds of young men and women from the developing nations of Africa, Asia, and Latin America study at the Hebrew University. It is a free meeting ground of students from the world over.

This is the "military target" that the terror gangsters chose for their attack.

Read what a true freedom fighter has to say on the subject. Read what Michel Pierre D'Orleans wrote in the New York Times on March 6, 1969:

"As one of the principal members of the French resistance against the Nazis, I am shocked to hear the Arabs compare our movements to their terrorist acts against unarmed civilians.

First, France and the rest of the European countries never intended to liquidate Germany as the Arabs intend to liquidate Israel. We fought like men against the German Army. We never murdered children and women. We never attacked planes carrying innocent passengers. Theirs is not a resistance movement. It is cowardice".

The technique of cowardly killing, maiming and blowing-up, that goes on under the name of "liberation" and of "revolution" is the antithesis of liberation and revolution. It is human savagery. It is killing for the sake of killing. It is the Arab "renaissance" gone mad.

Two Israeli students killed by terrorists in Jerusalem February 1969.
