

National Association of Black Students

feb. 16
[REDACTED]

Dear Friends,

We are addressing this letter to friends because we feel that wherever there are people who are concerned with racial inequalities and social injustices wherever there are people working to solve these problems and wherever we speak with people in this country who truly believe that we are all created equal, then we know that we are speaking with friends. All of us know that if this land is ever to be the home of the free then we must come together and live as one or we will all perish like fools. So we here in Nacogdoches, Texas are presently engaged in a series of programs that are directed at opening the closed circuit of employment. We are working to engage the entire community in political matters and we are beginning to teach young Black kids of our proud and noble history and culture. We have many plans and programs that we know are essential for the survival of the community. But in order to do some of these things we deem it necessary to go down the long road to freedom, justice and equality for all. We are asking you to help us in any way that you can support us.

To further explain I am a member of several groups including the National Association of Black Students, The Nacogdoches Black Community Union and one which is important to you: The National Council to Repeal the Draft.

Thanking you in advance.

Power then Peace,

Mickey McGuire
