BOOKS

Uniforms, Organization, and History of the Waffen-SS

by Roger James Bender and Hugh Page Taylor

Here is the third in a continuing series on the world's first pan-Aryan army and the most famous military organization in history. Hundreds of unique photographs, drawings and illustrations plus a lively and informative text about this elite outfit more than offset the few anti-National Socialist remarks that the authors felt constrained to throw in, which the discriminating reader will readily recognize and discard. No student of National Socialist history—particularly the World War Two period—will want to miss this one!

The Aryans by V. Gordon Childe

Hardcover \$9.50

Where did our race come from? For every White person concerned about his racial identity, this definitive work provides invaluable assistance. Examining the results of nearly two centuries of scholarship in the fields of archeology, anthropology and linguistics, Dr. Childe traces the early migrations of the culture-bearing Aryans from their original Northern European, Cispyntine homeland to every corner of the ancient world, and comes up with answers not taught in today's schools and colleges.

The Case Against Psychoanalysis by Andrew Salter Paperback \$1.95

Here is the full story about one of the most insane and ludicrous rackets in history. Written in a devastating style, the author completely demolishes the sex-obsessed Freudian method and puts the "father of psychoanalysis" into proper perspective: as a neurotic, dirty old man who deserves to be taken about as seriously as his junior kosher counterpart in *Portnoy's Complaint*. A must for anyone who wants to understand those witch doctors of modern-day Western civilization who are often sicker than their patients.

The Viking Settlements of North America by F.J. Pohl Hardcover \$6.95

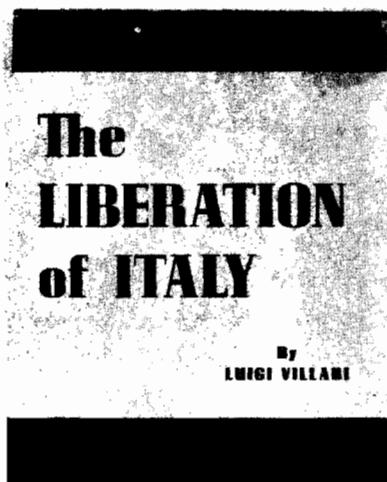

There is a mysterious shroud surrounding the North American continent before the arrival of Columbus. And yet we know today that an undetermined number of European expeditions did succeed in reaching the shores of the New World in the preceding centuries. In this book, one of the world's greatest authorities on these pre-Columbian migrations describes in his highly enjoyable style the early voyages of the hardy Viking seafarers across the northern oceans and into the deep interior of a mysterious new continent. Highly recommended.

Jews Must Live by Samuel Roth

Paperback \$2.00

Written by a "son of Abraham's seed," this fascinating little volume reveals the *why* and the *how* of the Jew's characteristic rise to influence and domination in the *goyish* world. With his book, Samuel Roth has become the Joe Valachi of world Jewry—one of those rare members of the Chosen People to break the code of criminal silence and "spill the beans" about the insidious Tribe of which he has been a part. A real eye-opener and an indispensable introduction to the Jewish question.

The Liberation of Italy by Luigi Villari

Hardcover \$7.95

Written by a former high-ranking Italian diplomat, this study demonstrates that the so-called "liberation" of his country was in fact a cruel farce. Not only did the Western Allies allow the wholesale slaughter of tens of thousands of anti-Communist Italians by Communist partisans, but by actively assisting and encouraging these cut-throat gangsters the Western powers almost succeeded in delivering Italy to the Soviet bloc. Every student of contemporary European history will want to add this important work to his collection.

Banking, Currency, and the Money Trust by Charles Lindbergh, Sr.

Paperback \$4.00

A thoroughgoing expose of Wall Street banking interests by the father of the famous aviator. Distinguished in his own right as a United States Senator, the elder Lindbergh was a champion of the populist cause as well as an uncompromising foe of the colossal swindle known as the Federal Reserve System. At a time when the dollar faces a series of systematic devaluations and when our monetary economy is teetering on the brink of disaster, the information contained in this book can give us a closer insight into the real problem.

Lord Haw-Haw & William Joyce by John A. Cole

Hardcover \$4.95

In the predawn hours of January 3, 1946, a man went to his death on the gallows of England's Wandsworth prison. The man's name was William Joyce. His crime: he was a National Socialist and he dared to stand with his racial brothers in Germany against the combined forces of international Plutocracy and international Communism during World War Two. The author, himself a liberal democrat, has nevertheless given us a highly sympathetic picture of this remarkable man. No one can fail to be moved as he reads the story of this great martyred hero of our Movement who, even in the shadow of the gallows, never lost his great National Socialist faith.

The Balfour Declaration: Warrant for Genocide

by Conrad K. Grieb

Paperback \$2.50

During this century, nearly 100 million non-Jews have perished in Europe and the Middle East as a direct result of two criminal international conspiracies led by Jews: Communism and Zionism. While much has been written about Communism, relatively little has been said about the other Jewish conspiracy. This remarkable book delves into the Zionist phenomenon, and comes up with some astounding revelations as it documents how the Jews were responsible for the two world wars, as well as the present day rape of Palestine. Absolutely essential.

BALFOUR
DECLARATION

WARRANT
FOR
GENOCIDE

A Revolution In Thought

by Dr. Otto Dietrich Paperback \$1.00

The former head of the German Press Bureau and press secretary to Adolf Hitler challenges the standard liberal-democratic myths about the "freedom" and "rights" of the Individual. He makes a fundamental distinction between the Individual as someone who has rejected his responsibilities to his racial community and the National Socialist concept of the Person who is an integral part of his people, arguing that rights and freedom are first of all a concern of the race as a whole. Extremely thought-provoking.
