10/20/68
sunday.

Dear Art.

Sammy was out today. He brought little Sammy. Sammy finished Hefler + Snyder 112 TP-2 Pump it had Broken Conn. Rod. We tried to use the piston + Rod out of the old one that broke a shaft. The Crank shaft was ruined on the one that just broke. The rod dug up the journal on the Crank shaft.

George Urban was in the moved to Manahawaken and bought back the Lickity split. He is putting cedar fence Kenney there.

Teddy and Sport were chasing a rabbit in the woods near the Cherry truck. Teddy was near the rabbit backing and Sport came along behind they lost him right away. I thought Sport would pick up the scent again but he didn't.

I made three shelves in the ship near the small bench in front.

I've got 1000 books on
them. Literature and Army books
with chain links and a strip
clips. A steel plug on them.

Dicky Ditton and his father
came in E. night at 8:00 P.M. He
brought his saw and looked at
a new one.

I called Mr. Schachert at
Seaside for shell and a cucular
saw for it. He asked about you.

Ray Newman was in. This
morning he got his chain sharpened.

Jack Ulbrich came over this morning
paid some on his 11050112 Pump

Pat called his car wasn't working
right again.

Do you remember who we sold
the 412 to from Franche Berthier?

Love Dad,
