Dear Art.

It is, clear and cool today. Gene took the small Sears saw apart that looked so run and good the pins were all off the flywheel the coil box broken and the laminations torn up a little.

Mother went to see Natalie this morning she seemed better she had been at the house today. When I came in with 11 days girls they went in the house one of them had a lolly pop eating it little Johnnie walked up and held out his hand for the lolly Pop and she gave it to him.

Ben U see from Truckee the one who brought the 115 P Homelite was in he wants a price on a 6 Cyl Hale or a Hale with a diesel.

Williams & Beede and
Webb came in this XL 12
made a clutch I put in the new
stage the spider broke when I
tried to take it out. I shaped
the Chair. Two sparks and shortened
the Chair. He wanted it for the
money. Lynn Lays don't work for them
any more and the rest of them don't
know much about running the
saw.

Love Dad.
