Dear Art.

At Central I shouldn't have the 4:30 to night it only lasts 3 days. it is clear and cold mode in last night but was cloudy and not as cold as last night.

Wed night a big flock of white geese flew over it was dark but you could see the white under part of them real plain. Clifford Wright was over we both saw them. They bought the 2 saws from their Uncle Dave 50. each. one was seized up from standing wood it must have been in a real damp place. I freed it up but didn't start it yet.

Gene worked on a C-51 yesterday. Harry Payne bought the fellow down from Chateauville his name was Webb a white fellow. The guy thought it needed a real valve he had made one out of a thin piece of steel. We put one

Or least it wasnt that. I had to leave
when I got back Gene said to look
at it, it had spark and gas but
wouldnt run. I checked it the spark
wasnt good enough. Gene put fuel
and Condenser in and it ran alright
he freight a 5.00 Chan used.

A fellow from Sons Run. came in

the bar was ~~not~~ because it
cut to one side. The Bar and Chain
was almost new. So he wanted the Chain
