IV. 1. MISSION HISTORY: Major Harrison was evaluated as a First Pilot on an S-8 instrument flight with IFR clearance from Andrews AFB (ADW) to Atlantic City (ACY). Holding, high altitude jet penetration, VORTAC approach, to ILS approach were executed at Atlantic City. ILS and GCA were executed at Andrews. Weather at Atlantic City was 2000 broken 8000 overcast and 7 miles visibility. Andrews was the same but winds were 090 at 15 knots gusting to 22 knots. Unable to accomplish C46 circling approach, C48 recovery from unusual attitude and C49 steepturns were not accomplished due to weather.

EVALUATOR COMMENTS: Overall evaluation was considered above average in all phases except as noted below. Aircraft control was excellent. Knowledge of systems was considered average.

WEAKNESSES/STRENGTHS: Aircraft control - C41; Radar approach and C42 ILS approach were excellent. Heading control ± 5 and glide path never exceeded slightly low. Weaknesses: B13: Comply ARTC instructions - failed to employ correct point to point procedures when cleared direct. C45: Holding - failed to slow to correct holding airspeed until within holding pattern E65: Crew/passenger briefing failed to brief missed approach intentions and DH on a PAR.

RECOMMENDATIONS/CORRECTIVE ACTIONS: N/A

REMARKS:

"Major Harrison has demonstrated satisfactory knowledge of aircrew survival and air express from this aircraft".

IV. 1. This mission was flown under IFR and VFR conditions at Dover AFB and Andrews AFB. A penetration, GCA, SFO's and normal traffic patterns were flown at Dover. No-flap and min-run landing were accomplished at Andrews. The pilot demonstrates smooth positive techniques and has an overall good feel for the aircraft. He is however, a little rusty in VFR overhead patterns. (Airspeed down to 155 Knots on downwind and maintained too high during early part of the final approach.) This condition was not considered unusual as he had not practiced overhead patterns in some time. All landings were good.

REMARKS: 

"Major Harrison has demonstrated satisfactory knowledge of aircrew ground and air egress from this aircraft".

IV. 1. Major Harrison completed an instrument check in all phases. Flight was outstanding. One minor discrepancy:
C-42--Failed to descend from 1500' to 1200' on ILS final prior to outer marker. GCA was the best I've seen at Andrews.

Major Harrison

IV. 1. Overall mission was very good. Major Harrison exhibited good pilot techniques. Landings were good except for Area 6f: the minimum run landing which was 300' beyond the designated touchdown point.
