Dear Sirs:

I would like to seal a small pond on my farm in West Virginia, and for this purpose would need some bags of granular Bentonite. The Ashland Chemical Company has referred me to you as their representative in this general area. My farm is located near Moorefield, West Virginia, but the material might also be picked up in Front Royal, Virginia.

Initially, I would be interested in perhaps six 100-pound bags. Could you advise me as to the price per bag and also suggest how I might take delivery of the material. I would prefer Moorefield as a pick up point if that is feasible.

Sincerely,

Ogden Williams
