Dear Byron:

We just received the video tape of Ambassador Colby and find that it is unusable here. FSI technicians report that this is due to fluctuations in power resulting in variations of from 48 - 63 cycles. The voice is understandable but the picture cannot be locked in. As I mentioned in Saigon, please make sure that JUSPAO records the 1971 programs with a U.S. generator as power supply, or in any manner which will guarantee a 60-cycle current.

Many thanks. With best wishes.

Sincerely,

Ogden Williams
