End-of-Tour Reports of Public Safety Advisors

Various end-of-tour reports have been made available to the Basic Course for the edification of Public Safety Advisors in our program. I would appreciate it if you would give me a brief memo as to what action has been taken with respect to these reports. I would also be interested in any feedback you have from Public Safety candidates as to the value of their training here.

I forward herewith a most interesting end-of-tour report just received from Frank Walton, namely the report by David E. McIntyre, and trust that this can be called to the attention of our Public Safety students as assigned reading.
