Update Briefing for Key VTC Outside Speakers

Dr. Hirsch had the very excellent suggestion that Mr. Williams be asked to discuss impressions of his recent trip to RVN with certain key speakers who are not able to stay current in the normal course of their business activities. There is also the point that by such discussions as this, basic instructional emphasis can be implanted into several presentations. Particular emphasis by speakers can also be placed on aspects of the advisory program which are timely and need stressing.

Please review your stable of speakers and set up a session of this kind. I have discussed the proposition with Mr. Williams.
