5-20-68

At about 11:30 PM I was going to relieve the watch. I had partially stepped through the FSD Hatch, starboard side, into the after engine room when it was slammed shut on my right foot, across the arch. I descended to the fire room, relieved my man and started with my duties. About 0200 the arch and lower foot began swelling and paining me. Mr. Werner called the sick bay and I reported. I reported again at 0800, 5-21-68 and X-rays were taken, advice given and I returned to quarters.
