GENERAL SERVICES ADMINISTRATION
FEDERAL SUPPLY SERVICE

RICHARD NIXON

President of the United States

ROBERT L. KUNZIG

Administrator of General Services

The GSA National Supplier Change Index and other GSA Federal Supply Catalogs are issued for the use of Federal agencies and other authorized users by the Commissioner, Federal Supply Service, GSA, under the authority contained in Section 101-30.602 of the Federal Property Management Regulations (FPMR).

The National Supplier Change Index provides interim notice of new supplies and services available from the GSA supply system and changes to current GSA Federal Supply Catalog publications. Executive agencies are required to use sources identified in GSA Federal Supply Catalogs to satisfy supply requirements. Other Federal agencies may use these supply sources in conformance with policy and procedures applicable to such acquisition. Government contractors and Federal grantees may also use these supply sources when properly authorized.

Information on the acquisition of items from GSA sources is contained in the GSA Stock Catalog and the Guide to Sources of Supply and Service.

A handwritten signature in dark ink, appearing to read 'Lewis E. Spangler', is written over a circular stamp or seal.

LEWIS E. SPANGLER
Acting Commissioner
Federal Supply Service

FOREWORD

For further information and details on how to order stock items listed in this publication, see the green pages of GSA Stock Catalogs, Part I or Part II; for information on nonstock items see Section I of the GSA Guide to Sources of Supply and Service.

1. **General.** The National Supplier Change Index (CI), Section 5 of the Guide, provides in a single publication notice of new supply items and changes to GSA Federal Supply Catalog publications.

The CI is a cumulative publication issued each calendar quarter. When the basic issue of a GSA supply publication and the CI have the same effective date, changes will be listed in the basic publication only. This CI includes cumulative changes to the October 1969 GSA Stock Catalog, Part II, and the July 1969 Guide to Sources of Supply and Service.

For a complete listing by Federal stock number sequence of all stock and nonstock items available from the GSA supply system, ordering offices are referred to the January 1970 Management Data List (ML), Section 6, which lists in a single handy volume essential ordering and supply data for over 100,000 items.

2. **Note to DoD Activities.** GSA supply catalogs are issued to DoD activities for information purposes only. They do not list all GSA stock items available for issue. DoD activities should refer to their military service Management Data Lists (ML's), other service supply publications or internal issuances before processing requisitions to GSA.

3. **Effective Date.** All information, ordering data, and changes listed in this publication are effective April 1, 1970, and will continue in effect until further notice.

4. **Distribution.** Copies of this CI have been mailed to all addressees on the regular Stock Catalog mailing list. Additional copies may be obtained from GSA regional offices.

5. **Contents of the National Supplier Change Index, Section 5.** Supply information changes appearing in a CI are grouped separately for each of the supply publications in the following sequence:

a. *GSA Stock Catalog, Part I.* See April 1970 issue of Part I.

b. *GSA Stock Catalog, Part II.* Cumulative changes to the October 1969 issue appear in this CI.

c. *GSA Guide to Sources of Supply and Service, Sections 1-4.* Cumulative changes to Sections 1, 3 and 4 of the July 1969 issue appear in this CI.

d. *GSA Management Data List, Section 6.* Changes to the January 1970 Management Data List, effective April 1, 1970, do not appear in this CI. DoD activities should refer to their current ML's for updated supply information on GSA managed items

6. **Prices.** Prices for new items in this publication apply to all agency orders received in GSA regional offices on and after April 1, 1970, and will remain in effect until further notice. Price changes listed in this CI are in effect on the date indicated. Prices shown include charges for normal mode of surface transportation on an f.o.b. destination basis to consignees in the United States (excluding Alaska). Advance notice of price changes will be furnished.

7. **Unit of Issue.** A standard or basic quantity in which an item of supply is issued or used, which represents the concept of the Federal stock number. It is the accounting unit established by the Managing Activity in association with the unit price and is the minimum ordering quantity to be requisitioned. The unit of issue preceding the price is the minimum ordering quantity, except where otherwise noted.

8. **Standard Pack (QUP).** The Standard Pack or Quantity Unit Pack (QUP) cited in GSA supply publications is always expressed as a multiple of the Unit of Issue shown in the publication. Item descriptions may cite one or more standard pack (QUP) levels; i.e., unit pack, intermediate pack, and shipping container pack. To reduce packaging and handling cost and expedite shipment, ordering offices should requisition quantities equivalent to the shipping container pack when possible or in one of the other standard pack levels indicated.

9. **Regional Area Map.** The map on the back cover shows the geographic boundaries of the GSA regions. Ordering offices should submit all requisitions for supplies and services to the GSA region servicing the geographical area of the consignee.

10. **Information.** For further information, direct

your inquiries to the GSA regional office servicing your activity. Orders and requisitions for stock items should be sent to addresses shown on the back cover and should include the routing identifier symbol shown with the address. Inquiries on orders for other than stock items should be directed to the addresses shown on the inside back cover.
