FMSO NOTICE 4410

From: Commanding Officer

To: Distribution List

Subj: Hazardous Materials

Ref: (a) FMSOINST 4410.1 of 26 July 1967

1. Purpose. To advise activities of incorrect classification of hazardous materials in the CHIL (Navy Consolidated Hazardous Item List).

2. Information. Enclosure (1) to reference (a), the CHIL (NAVSUP Pub. 4500), incorrectly classifies FSN's (Federal Stock Numbers) 6630-588-2758 and 6630-588-2768 as radioactive (Code "R"). The items contain sulphuric acid and are not radioactive. These items will be classified as hazardous (Code "H") in the next update of the CHIL.

3. Action. Addressees are requested to update enclosure (1) to reference (a) by changing the classification of FSN's 6630-588-2758 and 6630-588-2768 from radioactive (Code "R") to hazardous (Code "H").

4. Cancellation. This Notice is cancelled upon completion of action and for record purposes on 30 September 1968.

A. W. MacDONALD
Acting
