THAILAND

December, 16th 1985

Dear Mr. President

We the undersigned, your friends and former allies, in desperation ask your intervention to help save our lives.

Most of us were patriots and officials (including Congressmen) of the former Republic of Viet Nam or officers in that country's armed forces. After finally being released from Vietnamese communist reeducation camps, where we were held for years, we recently escaped from Viet Nam to "Freedom".

But "freedom" is elusive; we are still prisoners, this time in the Thai-operated Dongren refugee compound on the Thai-Cambodian border. At Dongren, the Thais subject us to all kinds of hardships while refusing us the right to be interviewed, even though many of us have already been cleared by the United States for admission.

Instead of freedom, we are treated to daily deprivation of food, brutality, rape our women, and minimal living conditions.

Now a new peril is at hand. The Vietnamese communist across the border in Cambodia have begun to shell our camp, and we fear not only for our lives, but also that Vietnamese troops will capture us, and return us for more brutal "reeducation".

Mr. President,

We know of your concern for Viet Nam's political prisoners, and we earnestly beseech you to intervene with Thai authorities, so we can be spared and live out our lives freedom with our loved ones. And if, Mr President, our lives should be lost in the coming weeks, we humbly ask that you look favorably upon the admission of our families to the

United States if they should subsequently come up for interviews with immigration officials.

Please help us, Mr. President, to find that peace and freedom for which we have yearned for so long.

Yours respectfully
