VHPA

Dear Sirs,

Congratulations on your new and improved 1990 Membership Directory which I just received in the mail. I rifle through it each year looking for lost "Seawolves" and always find a few.

Also in the Sept. 90 Newsletter you included a piece entitled "Get IN TOUCH". There were six names on the list of vetrans whose relatives were seeking info. You concluded the column with "If the VHPA can't help "In Touch", no one can. We exist just to do this. OK guys, it's up to you."

Upon opening my mail and reading that column I picked up the phone and called Wanda Ruffin at "In Touch". One of the names on the list was a "Seawolf" pilot KIA, James Ravis Burke, Jr. Wanda was seeking information for his daughter, especially the wherabouts of his Commanding Officer Bob Spencer. I gave Wanda Bob's address and phone number and told her that I could provide any additional info. that she might require. Hat's off to the

Hat's off to the VHPA for taking the bull by the horns, seeking out "In Touch", and finding and publishing the six names of aviation personnel so that the members of our group would be able to help out. Keep up the fine work.

Best Regards,
