

Don:

This "Huey" was assigned to HAL-3 from May, 1971 to January, 1972. Could you include any info on any specific missions she may have been included in? What were the Seawolves doing during this period? And, since I was one of the Navy's more elite troops in Danang(i.e. USMC) I only know some bare facts about the Seawolf mission, i.e. patrolling the Delta in support of PBR's. Could you send me a better idea on the squadron's overall mission? If it was like mine it changed almost daily.

Thanks and Semper Fi,

A handwritten signature in dark ink, appearing to be "Jim", written in a cursive style.
