III. Code Numbers	12-5	12-6
PART FOUR		
INDEX OF ALL IDENTIFIED UNITS		
CHAPTER 13. REGIONAL COMMANDS, ARMY GROUPS AND ARMIES	13-1	13-1
14. DIVISION, BRIGADES, REGIMENTS, BATTALIONS AND COMPANIES/ BATTERIES	14-1	14-1
INDEX		Index-1

PART ONE

INTRODUCTION

CHAPTER 1

INTRODUCTION TO AGGRESSOR ORDER OF BATTLE

1-1. Purpose and Scope

a. This manual provides published order of battle (OB) information on the Aggressor Armed Forces and insurgent forces. It is intended for use in developing Aggressor order of battle data for all types of training exercises and as an aid to training in order of battle intelligence for general, limited, and insurgent type wars. It complements FM 30-102 which is designed as a training vehicle for operations concerning all intensity-type wars. The guidelines contained herein are recommended for use by those units or activities responsible for the preparation of an order of battle book for actual operations. Master order of battle files containing additional OB on all Aggressor units are maintained by the US Army Intelligence Center and School (USAICS), Fort Huachuca, Arizona. Exercise directors, scenario writers, and service school instructors for the Department of the Army (DA) or United States Continental Army Command (CONARC) directed exercises and instruction are invited to contact the USAICS for necessary additional elements of Aggressor order of battle which do not appear in this manual.

b. Users of this manual are encouraged to submit recommended changes and comments to improve this publication. Comments should be keyed to the specific page, paragraph, and line of the text in which the change is recommended. Reasons should be provided for each comment to insure understanding and complete evaluation. Comments should be prepared using DA Form 2028 (Recommended Changes to Publications) and forwarded direct to the Commander, US Army Intelligence Center and School, ATTN: Office of Doctrine Development, Literature and Plans, Fort Huachuca, Arizona 85613.

c. Users are further requested to forward copies of any locally developed order of battle studies which expand on the contents of FM 30-103. The development of additional or specialized Aggressor forces, local supplements to the Aggressor Field Manuals, and exercise after-action reports relating to enemy forces will greatly assist in monitoring the employment of Aggressor as well as provide a basis for future revisions of the field manual.

d. Personnel using this manual are reminded that FM 30-103 is designed as a guide to assist in planning for the employment of enemy forces in training exercises and service school instruction. Users are encouraged to modify information delineated to meet local conditions and to stimulate participant interest. Additionally, personnel should also be familiar with FM 30-102 which outlines the employment of Aggressor as a maneuver enemy.

1-2. Abbreviations not listed in AR 310-50

Acq	Acquisition
AG	Army Group
AGA	Army Group Alamo
AGB	Army Group Birmo
AGF	Army Group Flugo
AGG	Army Group Golfo
AGJ	Army Group Javo
AGK	Army Group Karibo
AGKL	Army Group Kalifornio
AGKO	Army Group Kolumbio
AGM	Army Group Malajo
AGN	Army Group Nordo
AGOC	Army Group Occidento
AGOR	Army Group Oriento
AGS	Army Group Sudo
AGSL	Army Group St. Laurencio
AGV	Army Group Viglio

F	Fusilier
Ftr	Fighter
Bmr	Bomber
G/A	General of Army
G/AA	General of Army Air
G/AD	General of Air Division
G/A's	General of Armies
G/Air	General of Air
G/B	General of Brigade
G/D	General of Division
Inten	Intendance (Supply)
Jng	Jungle
mm	Millimeter
Mtn	Mountain
Mtr	Motorized
RC	Regional Command
RCA	Regional Command Atlantico
RCAZ	Regional Command Azio
RCH	Regional Command Hejmkommando
RCN	Regional Command Novakommando
RCP	Regional Command Pacifiko
Rfl	Rifle
U/I	Unidentified
VAM	Vice Air Marshal

1-3. Definitions

Terms common to Aggressor order of battle are listed and explained in the remainder of this chapter. Other terms used by Aggressor may be found in the glossary of FM 30-102.

a. General Headquarters (GHQ) Units. These units, which comprise those ground and air force elements designated as the strategic reserves, are directly subordinate to the Ministry of Armed Forces. Their primary purpose is to provide a combat-ready strategic reserve to be used as the Minister of Armed Forces may direct. GHQ units may be transferred to the regional commands or army groups to replace units which have been withdrawn for reorganization, refitting, or retraining, as well as to reinforce existing army groups. In addition to the type of units normally found in operational regional commands, GHQ has such special type units as long range surface-to-surface (SSM) and surface-to-air (SAM) units presently integrated in the overall Homeland defense scheme.

b. Regional Command. It is organized to control operations in a particular area and consists of two or more army groups. The regional command is directly subordinate to the Ministry of the Armed Forces.

c. Army Group. Although any organizational structure is possible, it normally consists of two combined arms armies, one tank army, an air

army, one artillery division, one airborne division, one SSM division, two SAM brigades, and army group support units. The army group is usually part of a regional command but may be directly subordinate to the Ministry of Armed Forces.

d. Army. There have been three types of armies identified. Combined arms armies usually consist of two motorized rifle divisions, one tank division, one SAM brigade, one SSM brigade, two mixed artillery brigades, an antitank regiment, and army support units. Tank armies usually consist of two or more tank divisions, one SAM brigade, one SSM brigade, a heavy tank regiment, and army support unit. Air armies normally consist of two fighter divisions, two bomber divisions, two ground attack divisions, helicopter regiments, air transport regiments and other support units. Armies are usually directly subordinate to an army group. In practice it has been found that the composition of Aggressor armies varies widely in time and place.

e. Task Force. Aggressor occasionally forms special purpose task forces to conduct operations in a specific area or to accomplish a specific mission. The size and composition of these forces varies with the type of mission, terrain, and expected duration of operations.

f. Division, and Lower Level Units. These units have a fixed organization which varies only between types. Detailed organization is depicted in FM 30-102. There seems to be a recent trend to vary the equipment of otherwise standard divisions to adapt them for use in special environments. A case in point is the tank division employed in Southeast Asia which as replaced medium tanks with the new TYPRANT light tank.

1-4. Types of Units and Designation System

a. Types of Units. The branch and/or type of a unit is usually reflected in the unit designation. Example: 1 *Tank Army*, 10 *Bomber Division*, 20 *Propaganda Company*, 15 *Rifle Division (Mountain)*. For types of Aggressor military units, see FM 30-102 or the index of this manual. The term Fusilier, a designation of elite troops, is awarded to any type of division size or smaller (except airborne, already considered elite), which distinguishes itself in battle. Fusiler is used in combination with the unit designation. Example: 14 *Fusilier Artillery Division*. Fusilier units may be also designated by utilization of the letter F in place of the entire word Fusilier. Example: 13

F Motorized Rifle Division, 2 F Heavy Tank Regiment. All subordinate elements of any unit bearing the Fusilier designation are also considered as elite, although the designation does not appear in the title of the subordinate element. Example: The fact that the *15th Motorized Rifle Regiment* is subordinate to the *6th F Motorized Rifle Division* establishes that regiment as elite. The Fusilier designation may be awarded to a particular subordinate unit of a major organization. Example: The 3d Motorized Rifle Division may have one of its regiments designated as Fusilier.

b. Designation System. Any language may appear in the designation of Aggressor units. Designation patterns are noticeable although no rule is established that will apply to all cases.

(1) *Regional Commands.* There are five identified Regional Commands in the Aggressor military establishment. These are designated by region name or function.

(2) *Army Groups.* At least 15 Army Groups have been identified. They are designated by the area name or function. Generally, the name will be preceded by the letters AG. Example: AG GOLFO.

(3) *Armies.* Armies are designated by combinations of Arabic numerals and letters denoting the type of army. Abbreviations are commonly used in the designations. The following list reflects the types of armies identified, the abbreviation used, and the lowest and highest numbers identified.

Type of army	Abbreviation	Lowest number	Highest number
Combined Arms Army	CAA	1	49
Tank Army	TK A	1	50
Air Army	Air A	1	32

(4) *Task Force.* These forces are usually designated as Combined Task Force followed by a word denoting either the environment or the geographic area of expected employment. Example: Combined Task Force Schnee was formed in 1949 for operations in Alaska.

(5) *Divisions.* All divisions are designated by Arabic numerals and the branch, mission, or type of equipment. Each type of division is numbered in its own series probably beginning with the number 1, thus rifle divisions have one separate series for mountain and one for jungle divisions.

(6) *Brigades, Regiments, and Battalions.* These units are designated by Arabic numerals and branch, mission or type of equipment. How-

ever, motorized rifle, tank, and air battalions organic to regiments are numbered consecutively within each regiment beginning with the Arabic numeral 1, thereby necessitating inclusion of the parent unit designation in order to fully identify the specific battalion. Example: 1st Motorized Rifle Battalion, 15th Motorized Rifle Regiment; 3d Tank Battalion, 301st Tank Regiment; 2d Fighter Battalion, 3d Fighter Regiment.

(7) *Companies and Batteries.* Designation is effected by Arabic numerals and/or branch, mission or type of equipment. Companies and batteries not organic to battalions are numbered separately. Motorized rifle, tank, artillery and air companies/batteries organic to battalions are numbered consecutively within each battalion beginning with the Arabic numeral 1. Positive identification of a given company must therefore include the designation of the battalion and regiment. Example: 1st Motorized Rifle Company, 3d Motorized Rifle Battalion, 101st Motorized Rifle Regiment; 1st Battery, 2d Howitzer Battalion, 341st Artillery Regiment.

(8) *Platoons, Sections, and Squads.* Designations are by Arabic numerals and/or branch, mission or type of equipment, much the same as for companies, batteries and like units.

c. Miscellaneous.

(1) An interesting feature is noticed in the designation of certain artillery units. All identified artillery units carrying the designation of gun-howitzer are equipped with an artillery piece which has the capabilities of a field gun as well as the high angle fire of a howitzer.

(2) Headquarters units and service units have no numerical designation. They are identified by reference to their parent unit, i.e., Service Battalion, 9th Fusilier Motorized Rifle Division; Headquarters, Battery, 9th Motorized Rifle Division Artillery, 9th Fusilier Motorized Rifle Division.

1-5. Recapitulation

The following is a recapitulation of identified major units by type showing the regional command in which they have been identified. The numerical designations of all units listed below have not necessarily been identified. However, the existence of these units in the regional commands indicated is firm. Parenthetical figures denote the estimated number of additional units believed to be in the regional commands.

Regional Commands

AG	RCA 3	RCAZ 3	RCH 4	RCN 3	RCP 2(1)	GHQ	Total 15

CHAPTER 2

HISTORY OF AGGRESSOR CAMPAIGNS

Section I. INTRODUCTION

2-1. General

a. This chapter provides background on Aggressor activities in General War/High Intensity conflicts, Limited War/Mid-Intensity conflicts, and Insurgent Type/Low Intensity conflicts.

b. There are three sections based on geographical divisions. Section II depicts Aggressor campaigns in Europe and the Middle East. Paragraphs 2-2 and 2-3 describe Aggressor campaigns in North and South America. Paragraphs 2-4

through 2-6 provide background information of Aggressor activities in Asia.

c. The dates assigned to the Aggressor campaigns listed in this chapter are provided to establish a historical background for training in Aggressor Order of Battle. However, to maintain realism during Aggressor exercises, it is suggested that designated campaign dates be periodically readjusted to reflect a more current time frame and to stimulate player interest.

Section II. AGGRESSOR CAMPAIGNS IN EUROPE AND MIDDLE EAST

2-2. Campaigns 1954-1960

a. During 1954 and 1955, with the development of a strong military establishment supported by a renovated and productive economy, Aggressor inaugurated its ambitious plan for world domination by attacking the nations south of the Homeland. Aggressor conquered these nations after intense fighting. The presence of the Aggressor army in the subjugated nations enabled native Circle Trigonists to seize top governmental positions and request annexation to the Aggressor nation as satellite states. New army groups were established to command the armed forces in these territories and to conscript and train recruits from these areas. No other major campaigns were fought in Europe from 1955 to 1959.

b. In January 1959, Aggressor launched an offensive in Western Europe supported by nuclear missile attacks. On 14 May, Allied Forces employing nuclear weapons counterattacked on a wide front and drove Aggressor back to the original point of departure. In June, Aggressor trained satellite forces launched a series of strong attacks supported by nuclear and chemical weapons in an attempt to seize the northeastern coastal area of the Mediterranean Sea. Extensive use of guerrilla units created serious problems in the

Allied rear areas and it was not until August that NATO forces were able to halt the satellite armies. Aggressor regular forces were then committed, making extensive use of nuclear weapons and chemical agents. Further nuclear exchanges brought about a stalemate in Europe which lasted well into 1960.

c. In March 1960, AG SUDO assumed responsibility for the front extending along the Danube River and began replacing satellite army units with Aggressor regular forces. NATO directed its commanders to launch attacks against the withdrawing satellite forces. On 14 March, the Allies crossed the Danube River on a wide front and drove northeastward, surprising the Aggressor forces. Suffering heavy losses, AG SUDO was not able to mount a successful counteroffensive. AGs OCCIDENTO and NORDO were directed to take over the positions formerly held by AG SUDO. At dawn on 18 November, following intensive preparation, Aggressor launched a major counteroffensive. Simultaneously, guerrillas initiated a major campaign to sever all Allied supply lines. These actions forced the Allies to withdraw southward. The Aggressor's advance continued, but at a slower pace because of lengthened supply lines and mounting casualties. On

30 December, the front was finally stabilized along the Danube River.

2-3. 1961-19-

a. By October 1961, KROSTYCHOVIC knew that the continental US and insular campaigns had been stalemated and had failed in their goals. Personally calling in the Minister of the Armed Forces he ordered the European continent to be wiped clean of the US and Allied forces. Accordingly, the Aggressor ground forces east of the Elbe River, which had already been increased to two Army Groups (OCCIDENTO and NORDO), exploded into a general offensive. Continuing pressure by the Aggressor forces slowly forced the Allied Armies to withdraw westward, but the liberal use of nuclear and chemical weapons by the Allies, coupled with their retention of air superiority and a determined ground defense, brought the Aggressor's advance to a standstill in early November 1962. On 11 November, NATO forces opened a counteroffensive which, by 26 November, forced a general retreat of Aggressor troops. Simultaneously, a large scale counter-guerrilla campaign was launched against Aggressor guerrilla regiments inflicting heavy casualties and severely limiting their operational capabilities. By 7 December, the Allies regained their original positions along the western edge of the former buffer zone. Faced with the task of forcing a passage through the heavy defenses on the Aggressor side, and at the same time bolstering

the Balkans front, the NATO powers decided to halt their offensive and revert to a defensive posture. Thus developed the undeclared "cease fire" between Aggressor and NATO in Europe which lasted for two years.

b. On 23 January 1965, AGs OCCIDENTO and NORDO supported by satellite armies, re-opened hostilities against the NATO forces in Europe, with a large-scale offensive that drove the NATO forces into defensive positions in France. The extensive use of nuclear weapons by NATO, coupled with abortive revolutions in two satellite countries in 1968, forced Aggressor back to its original lines and, in January 19__, resulted in the adoption of the present uneasy truce with NATO on the European continent.

c. In the meantime, Aggressor organized guerrilla activities broke out throughout the Middle East. Terrorist acts and sabotage incidents were reported in Syria, Iran, Lybia, and Saudi Arabia; it was suspected that a new guerrilla Regional Command had been established in Kuwait under Major H. Muhammet SAUD. Concurrently, in North Africa, troops of RC HEJMKOMMANDO's AG VIGLIO were sent to the United Arab Republic as advisors.

d. Since February 19__, Aggressor organized guerrilla activities have reached civil war stages in Saudi Arabia, Iran and Lybia. RC HEJMKOMMANDO openly supports these "liberation wars" economically, logistically, and militarily.

Section III. AGGRESSOR CAMPAIGNS IN NORTH AND SOUTH AMERICA

2-4. Campaigns 1956-1960

a. In late 1956, the Aggressor High Command turned its attention to the American theater. Aided by agents and sympathizers, Aggressor seized the Antilles chain of islands and the Panama Canal.

b. Aggressor's determination to conquer the North American continent resulted in a second campaign in the fall of 1957. Aggressor forces invaded and overran portions of North Carolina, South Carolina, Georgia, and Florida. After suffering a series of defeats, the Aggressor forces were evacuated to their Antilles bases. In the meantime, they had launched a combined amphibious, airborne, and air offensive across the Atlantic Ocean. By February 1958, Aggressor held all of New England and the St. Lawrence River area.

c. In the spring of 1959, the United States launched a limited attack against Aggressor Caribbean installations. On 2 March, two joint amphibious US forces landed on the Island of Vieques, destroyed submarine pens there and at nearby San Juan, Puerto Rico, and then withdrew. In May 1959, Aggressor executed an airborne invasion of the Southeastern United States and seized Pope Air Force Base and Fort Bragg, both in North Carolina. Strong US reinforcements compelled Aggressor to withdraw. At the same time, Aggressor launched an amphibious attack against the Hawaiian Islands. By June, Aggressor was in control of the entire island group. The United States organized an amphibious task force which assaulted Oahu on 25 October and completely recaptured the islands by mid-November. While in possession of the Hawaiian Islands, the Aggressor High Command decided to use them

as a spring-board for an Alaskan invasion. On 4 October 1959, Aggressor Combined Task Force SCHNEE departed from Hilo, Hawaii, and made an amphibious landing in the vicinity of Anchorage, Alaska. Subsequent combined operations of the US and Allied forces drove Aggressor from the Alaskan mainland to bases in the Aleutian Islands.

d. In 1960, Aggressor renewed its attack on the continental United States. On 1 February, it launched a successful airborne and amphibious invasion of Florida and directed a second joint airborne and amphibious attack against the area of Fort Bragg and Wilmington, North Carolina. In April, the United States regained air superiority over this sector and the US ground forces launched successful counterattacks. By the end of May, the Aggressor invasion of Florida had been stopped along the general line of Jacksonville-Tallahassee-Appalachicola.

2-5. Campaigns 1961-1965

a. The year 1961 saw Aggressor again attacking the United States in a series of campaigns. A reinforced combined arms army made a successful landing in the Charleston, South Carolina area in February. In May, Aggressor forces launched a major offensive west and southwest along the St. Lawrence River Valley and made airborne and amphibious landings in Texas. By the end of June, most of the state of Texas was in Aggressor hands. However, during the latter part of 1961, the Aggressor armies were forced to withdraw in the Carolinas and only retained control over a narrow coastal strip. In eastern Texas, after a short but intense battle, during which both sides employed tactical nuclear weapons, Aggressor pulled its troops back on a line of Wicita Falls-Fort Worth-Galveston.

b. In March 1962, Aggressor established beachheads on the western coast of the United States. By late July, they had occupied the states of Oregon and California. Aggressor resumed the offensive both in the Carolinas and Texas, making substantial progress initially. Late in 1962, US forces mounted counteroffensives and the Aggressor forces were forced back to their original lines in the Carolinas while they maintained their gains in the South, holding on to eastern Texas and portions of western Louisiana.

c. The Aggressor High Command, in consultation with the Triumvirate drafted a plan for a general offensive in the American theater. Ag-

gressor armies moved out of the Texas-Louisiana area on 8 August 1963 heading north. By mid-November, Aggressor reached a line along the Arkansas River. On 7 December, a US counter-offensive drove Aggressor back to the confines of Texas.

d. US forces on 23 May 1964, made amphibious landings on the Atlantic coast of Panama and air-transported landings on the Pacific Coast of that country. These raids were successful in destroying Aggressor supplies and equipment, and in neutralizing the immense staging areas for Aggressor troops preparing for commitment in the continental United States. At the same time, US forces attacked the Carolina lodgement area and by 27 September the Aggressor forces had withdrawn almost to the beaches in the Carolinas. On 4 October, the President of the United States ordered a general offensive against the Aggressor forces in Texas. The offensive was unsuccessful.

e. Reinforced by large numbers of recruits, Aggressor armies launched an offensive westward from the Carolina beachheads. By 15 March 1965, they had captured large segments of Georgia, Alabama, and Mississippi. A link-up was effected with the armies in the Florida and the Texas-Louisiana areas. A US counteroffensive succeeded in clearing Aggressor out of Alabama and Mississippi, separating once more AG GOLFO and AG KARIBO. In August, the US staged an all-out attack against the Panama Canal Zone, forcing Aggressor to evacuate to the Antilles. To offset this American victory, Aggressor launched airborne nuclear attacks against the US Air Force bases in Alaska. This was followed up on 29 October, by reinforced airborne brigades dropping on Fairbanks and then proceeding along the Alaskan highway in a southeasterly direction. Aggressor, hampered by inadequate logistical support was forced to withdraw after a US forces victory south of the Big Delta. Subsequently, several large battles were fought in the Texas-Louisiana area, and many minor engagements occurred in the St. Lawrence River area; but Aggressor made no appreciable gains.

2-6. Campaigns 1966-19-

a. In April 1966, Aggressor launched a major offensive on all fronts in the continental United States. AG GOLFO was initially committed northward, and succeeded in pushing well into Oklahoma before an all-out air offensive by US bomber groups, coupled with heavy rains which

caused flash flooding on all major routes, stopped its advance. AG ST. LAURENCO was ordered to move southwesterly, while AG KOLUMBIO was ordered to break out of the Fairbanks-Wainwright-Eielson airhead and drive southward along the Richardson Highway toward Tolsona Lake. After initial successes, the Aggressor offensive was met by forceful US counterattacks and was finally halted on all fronts. In June 1966, RC ATLANTICO ordered AG GOLFO to strike westward from the Texas-Louisiana areas in an attempt to link-up with AG KALIFORNIO which was attacking eastward under orders from RC PACIFIKO. Both army groups made successful 200 km, advances. During July, while Aggressor forces were still advancing successfully, KROSTYCHOVIC decided to regain the Panama Canal. AG KARIBO forces were selected to make this attempt. Only light resistance was encountered by Aggressor forces until they reached the Rio Hato area where STRAC and South American reinforcements halted the offensive. By mid-August, the Aggressor force was compelled to retreat to the Antilles. In mid-September US airborne forces, supported by nuclear airstrikes, were dropped on the Arizona-New Mexico border and the Aggressor forces involved were forced to withdraw. On 19 September 1966, AG ST. LAURENCO was engaged in a large tank battle near Watertown, New York. Nuclear and chemical warheads were freely exchanged, and the Aggressor forces retreated along the entire line. On 4 October 1966, a reinforced US airborne brigade intercepted AG KOLUMBIO's 7th army as it attempted to cross the West Fork of the Gulkana River. Rapid reinforcement of the US forces caused Aggressor to abandon the attack. Continuation of the US counteroffensive to destroy the airheads was precluded by the necessity to redeploy major reinforcing elements to meet Aggressor offensives in the St. Lawrence, Carolinas and Central European areas.

b. The only continental US campaign in 1967 took place in the Carolinas. Aggressor ordered RC ATLANTICO to launch a major offensive northward from the southeastern lodgement area to seize Washington, D.C. On 5 August, AG KARIBO struck US troop and supply concentrations in North Carolina with aircraft and missile-delivered nuclear weapons. After making rapid initial advances, Aggressor was halted by stubborn defensive positions. Major US combat units were redeployed into the new battle zone; since the US counterattacks were threatening to cut off

the attacking elements, Aggressor began a withdrawal southward on 15 October and by Christmas 1967 was again contained within its defensive positions in the lodgement area.

c. With the end of Aggressor's campaigns against the US in December 1967, an undeclared "cease fire" developed between the two nations along the border of the lodgement areas on the North American continent. There were no major military campaigns during the next year.

d. In February 1968 (acting, it is believed, on the advice of Marshall LODER), KROSTYCHOVIC resumed offensive activity in the Americas by sending high-ranking political and military advisors into Colombia and Venezuela. It was rumored that Colonel Ramon GUTIERREZ, renowned guerrilla leader and expert on Latin American affairs, had been transferred from Cuba to Panama and was organizing guerrilla forces in the hills of Colombia.

e. On 2 April 19__, Aggressor resumed the offensive in the US. AG KALIFORNIO moved eastward. Simultaneously, AG GOLFO sent its 5th Army northward out of Texas. Meanwhile, a new northwestern US campaign swung into action with AG KOLUMBIO sending amphibious and airborne units into the Bellingham-Tacoma coastline of the state of Washington. By 29 April Aggressor held a line extending from Sumas, on the north, southward through Coulee City to Kennewick. Despite aggressive US resistance, Aggressor continued to push slowly forward.

f. On 1 May, AG ST. LAURENCO and AG KARIBO emerged from their lodgement areas and within a short time, by means of air and missile attacks, had flattened several Middle Atlantic cities. Their ground forces wiped out all resistance, occupied all the New England area pushing well into New York State and completed the occupation of North Carolina. For the first time, the US was on the defensive on all fronts.

g. On 8 June, US military forces began a massive counteroffensive. Missiles armed with nuclear warheads were unleashed against Aggressor's 15th, 9th, 2d, and 10th Air Armies, eliminating their capability for close air support and resupply. In immediate followup actions, the US forces dropped airborne troops well behind the Aggressor lines of communications. After an intensive artillery preparation, US armor and infantry units penetrated Aggressor frontlines. Aggressor was forced to begin retrograde operations.

h. In the weeks that followed, the Aggressor units sustained heavy losses in manpower and equipment, and by the end of July they were again contained in their lodgement areas. AG ST. LAURENCO and AG KOLUMBIO lost upwards of 60 percent of their combat troops and equipment. AGs KARIBO, GOLFO, and KALIFORNIO lost up to 40 percent of their resources.

i. AGs KOLUMBIO and KALIFORNIO returned to the lodgement areas in Alaska and the Aleutian Islands, and AG ST. LAURENCO was moved to the Antilles. However, AG KARIBO recaptured Panama. AG GOLFO withdrew to Monterrey, Mexico, and stationed its armies along the Texas-Mexico border.

j. Since July 19___, Aggressor guerrilla forces in the US have reverted from open warfare to isolated acts of terrorism on selected targets. Dynamite charges were exploded at the Pentagon, the US Capitol building, and the City Halls of New York, Boston, and Los Angeles during the summers of 19___ and 19___.

k. Colonel Ramon GUTIERREZ expanded his activities in South America, establishing several

military training centers in Chile and Uruguay in May 19___, with the assistance of a Cuban based officer cadre. Guerrilla activities were expanded in Colombia and initiated in the Dominican Republic in June 19___ from base camps in Haiti and Cuba. Hostilonia's attempt to expand its area of influence to Latin America, in competition with the Aggressor Homeland, became quite evident by the presence of the technical and military advisors furnished to the insurgents, as well as the marked increase in their logistical support of the operations.

l. New civil disturbances were created in the United States by two civil groups suspected of being organized or infiltrated by Aggressor: the FREE STUDENTS led by Max SCHMIDT and the AMCITS (AMERICAN CITIZENS' TRUE SOCIALISM), a conglomerate of factions led by ABDUL JONES.

m. US intelligence agencies believe that the Homeland is preparing for another major offensive in the US; some intelligence sources state that Aggressor is now fully prepared, and could stage this offensive at any time.

Section IV. AGGRESSOR ACTIVITIES IN ASIA

2-7. 1950-1968

a. Aggressor embarked on a series of campaigns to "liberate" several of the countries in Southeast Asia. By late October 1950, Aggressor had seized North Vietnam and portions of Laos and South Vietnam. Due to the major campaigns in Europe and the continental US, both the US and Aggressor minimized the activities throughout the world from 1950 until 1968.

b. In April 1959, the Aggressor High Command rendered a progress report to the Triumvirate. The report, dealing with Southeast Asia, in essence, stated that during the period from 1951 through 1958, Aggressor had consolidated its gains in the area by massing large stocks of military equipment and training the satellite armies in each of the subjugated nations. In August 1958, a major guerrilla campaign using both Aggressor and satellite forces had opened in Malaya, Indonesia, and the Philippines to overthrow the established governments and subvert those countries to the Aggressor cause. The report ended by stating that because of US intervention the progress of the guerrilla campaigns had been slowed down by January 1959.

c. In January 1965, Aggressor and its satellite forces commenced a pushing drive in Southeast Asia. Supported by concentrated aircraft bombardments, the Armies of RC AZIO crossed the border from Cambodia into Thailand, capturing the city of Bangkok. Inside Thailand, Aggressor and its satellite forces sped from Singora on the highway leading across the Malayan border to Alor Star on Malaya's west coast. From there, Aggressor engineer regiments utilized the single track railway to head south toward Malacca. Meanwhile, a small amphibious force landed at Kota Bharu on the northeast shores of Malaya. Armored spearheads, supported by self-propelled artillery, opened a gap through which lighter and faster units poured. The Aggressor moves were carefully planned and brilliantly executed. Rivers were easily crossed, and jungles which had been held to be almost impassable were used to great advantage by the Aggressor forces. Their tanks went where even a foot soldier moved with difficulty. By 29 January, a link-up had been effected slightly north of Johore Bharu. It was here that Aggressor met with stubborn resistance by SEATO forces emerging from Singapore.

d. On 14 February 1965, RC AZIO, using long-

range aircraft, exploded several 10KT to 30KT nuclear warheads over the Philippines. Seaborne transport units, carrying units from the 18th CAA, swept toward Indonesia. On 27 February, thousands of Aggressor troops poured ashore at Surabaya on the island of Java, with practically no resistance. By 18 March 1966, Aggressor held an area extending from the radioactive Philippines on the north to complete control over the Celibes, with the 18th CAA making headway against Djakarta.

e. In January 1966, the ASIAN UNIFICATION MOVEMENT, an organization logistically and tactically supported by Aggressor's RC AZIO and the Hostilonian High Command, again started exporting "liberation wars" throughout Southeast Asia, with emphasis on South Vietnam, Laos, and Cambodia. Despite SEATO's increased tactical, logistical, and economic support to the established governments in these countries, a stalemate had been reached on the battlefields by November 1968 but open warfare continued in these areas.

2-8. 1969-19-

a. Since January 1969, because of the increased political infiltration by the ASIAN UNI-

FICATION MOVEMENT, "shadow" governmental structures have blossomed in South Vietnam, Cambodia, and Laos. SHEI CHAO MONG, now Hostilonia's Circle Trigon Party Premier, has made several official visits to these countries to personally assess the progress of the "liberation wars."

b. In July 19__, a series of peace talks between SEATO and the ASIAN UNIFICATION MOVEMENT's representatives were started. SEATO's attempt to deescalate and nationalize the wars by withdrawing tactical elements while continuing limited logistical support has met with only token withdrawal of tactical elements by the ASIAN UNIFICATION MOVEMENT and RC AZIO.

c. In September 19__, RC AZIO and the ASIAN UNIFICATION MOVEMENT went into simultaneous MONSOON campaigns in South Vietnam, Cambodia, and Laos. Despite extreme adverse weather conditions, their maneuverability was unimpaired and they were able to seize, occupy and temporarily control several major cities in these countries until December 19__, when they suddenly abandoned urban warfare and reverted to guerrilla tactics.

CHAPTER 3

AGGRESSOR INSURGENT WARFARE IN PATRIA LIBERATA

Section I. BACKGROUND OF AGGRESSOR INSURGENT ACTIVITIES

3-1. General

This chapter provides background information concerning application of the insurgent doctrine outlined in part IV, FM 30-102. As a means of application an insurgent war is conducted in the fictitious country of Patria Liberata, which has geographic, climatic, sociological, and political conditions representing a composite of various countries. Exercise planners should fully develop this type of data for the geographic area of the world the exercise is training for. Such information is available in various Department of the Army Area Handbooks. An understanding of how to portray the insurgent activities outlined in part IV, FM 30-102 will enable planners to devise a maneuver enemy, for any part of the world, against which US personnel involved in internal defense/internal development efforts will be able to train. This chapter outlines the development of the insurgent movement and the ineffectual responses of the Patria Liberatan government. None of the possible counterinsurgent measures that the government should have implemented are discussed, for it is the task of internal defense/internal development personnel to devise and implement appropriate counterinsurgent programs during the training exercise. Paragraph 3-27 provides a point of entry to a host country for US internal defense/internal development personnel. Exercise planners may readily expand US involvement past this initial point of entry to meet the needs of the exercise.

3-2. Postwar Esperanta

a. Prior to World War II, Esperanta, a country bordering Patria Liberata on the North (fig 3-1), was a colony of Atlantia. During World War II, the country was occupied by the Axis powers. Immediately after the withdrawal of the Axis forces, Atlantia again assumed control. However, the Esperantans had become very nationalistic and desired to become an independent country.

Atlantia, because of Esperanta's rich natural resources, refused to grant it independence.

b. A nationalistic revolution took place, and, in 1957, Atlantia gave control of the Esperanta government to a group dominated by pro-Atlantia elements. However the Atlantian decree which granted Esperanta its semi-independence retained many trade and resource exploitation privileges which caused widespread dissatisfaction with the Atlantian controlled government.

c. A second revolution took place in 1960 under the leadership of Fasili MAKEBAN, a militant Circle Trigon Party leader trained in the Aggressor Homeland and sent to Esperanta. As a result of this revolution, the government was replaced by one headed by MAKEBAN, who was assisted by individuals sympathetic to the Aggressor cause. Thus, another nation was added to the group already within the Circle Trigon Party's control.

3-3. Aggressor-Esperanta Mutual Defense Pact

a. In 1961, MAKEBAN, leader of Esperanta, and KROSTYCHOVIC, Minister President of the Aggressor Homeland, signed a Mutual Defense Pact. The pact assured Esperanta of economic assistance to bolster its economy and promised Esperanta military support in the event of invasion. In return Esperanta permitted the building of highways from the Esperanta capital south to points near the Patria Liberata border and the stockpiling of large quantities of war materiel in Esperanta. The training of the Esperanta Army was to be supervised by Aggressor military personnel.

b. In 1965 Aggressor sponsored military activities were nearing completion and Esperanta agreed to assist Aggressor in developing the insurgent potential in Patria Liberata. Esperantan agents were infiltrated into Patria Liberata to conduct an intensive study of the country. The study, completed early in 1966, revealed—

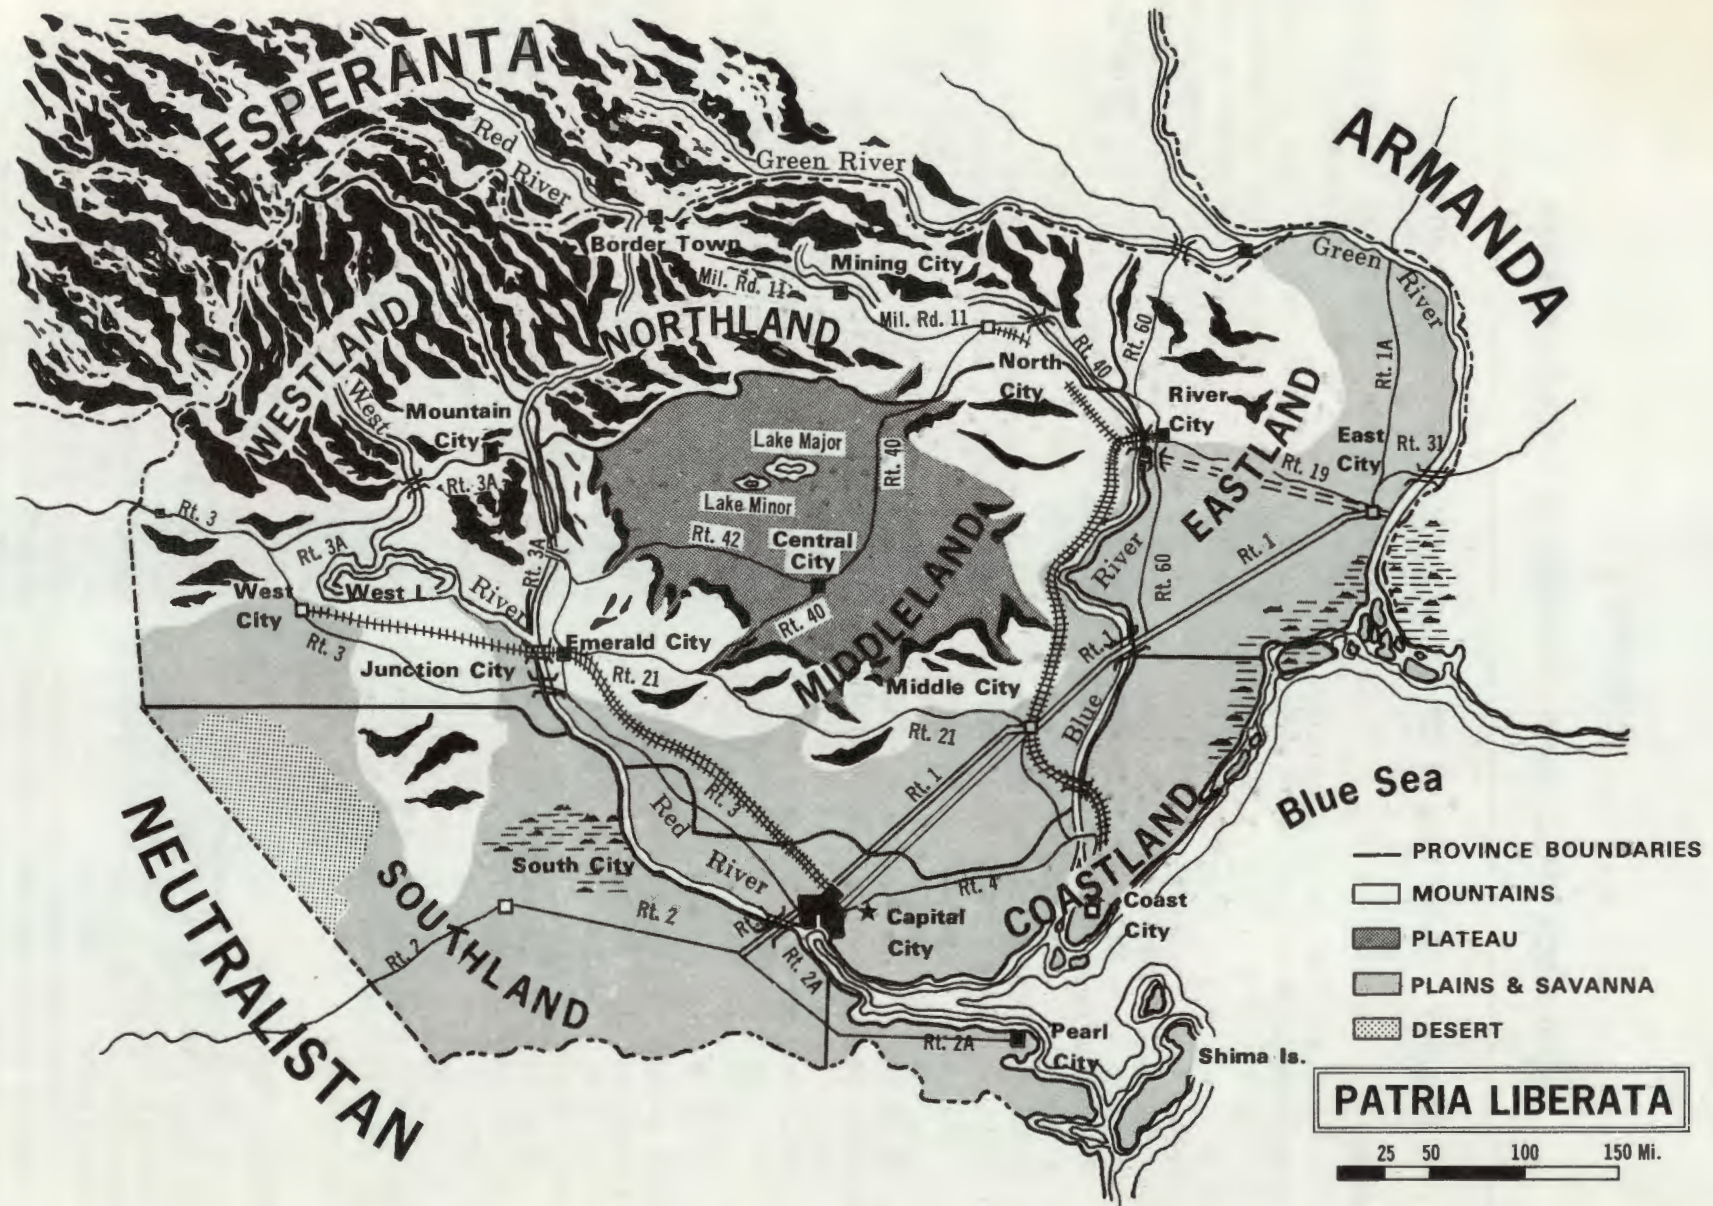

Figure 3-1. Map of Patria Liberata.

(1) Trails in the Morane Mountains located in southern Esperanta and northern Patria Liberata could be used as routes of infiltration into Patria Liberata.

(2) Bases of operations could be established in the mountains and swamps.

(3) The people of Patria Liberation were generally dissatisfied with the slow rate of progress towards modernization and the assumption of quasi-dictatorial powers by Uttar YUMJAB, the President of Patria Liberata.

(4) Executives of important industries could probably be subverted.

(5) Vital information on Patria Liberata's National Police and Armed Forces to include their organization, equipment, and strength.

(6) The political ignorance of the Primi-people living in the Morane Mountains, their susceptibility to insurgent manipulation, and their antipathy toward the Synthese majority in the country.

(7) Eastland farmers were experiencing hardships and were dissatisfied with the national government.

(8) Most of the various ethnic groups had little representation in the National Parliament.

(9) Dissatisfaction with the government by the Patharis, a large religious group in Patria Liberata.

(10) Influential individuals in government and professions would probably assist the Aggressor insurgency because of the lack of advancement opportunities under the present government.

(11) Student groups had become disenchanted with Patria Liberata's ruling political party—the Patria Liberata Independence Rally (PLIR)—and would support the insurgency.

(12) The leaders of the People's Liberation Alliance (PLA), which was outlawed by President YUMJAB in 1965, had fled to esperanta. These people headed by Rab ISA and his young protege Roda KHAN could be used as a supporting link between the Esperantan Circle Trigon Party and the insurgent effort in Patria Liberata.

(13) Leaders of the PLA who rather than leave Patria Liberata, had gone underground, would provide the nucleus for the clandestine party and insurgent infrastructure.

(14) Members of the PLA would willingly go to Esperanta for training in the conduct of insurgent activity and subsequently return to Patria Liberata to become insurgent cadre.

Section II. ORGANIZATION OF THE INSURGENCY IN PATRIA LIBERATA (1965-71)

3-4. Insurgent Leaders

Based on the study conducted on Patria Liberata by the Esperantans, members of the Aggressor Circle Trigon Party contacted Rab ISA and Roda KHAN (leaders of the People's Liberation Alliance) who had fled to Esperanta, and asked them to join the party. Without hesitation, both agreed. In the spring of 1966, ISA and KHAN, along with several of their followers, were sent to the Aggressor Homeland for consultation with high ranking members of the Circle Trigon Party. The latter were impressed with the Patria Liberatans and outlined a program of training to prepare them to become the leaders of the insurgency. Upon completion of the training, ISA and KHAN departed for Esperanta and Patria Liberata, respectively, to begin operations. ISA's initial mission was to prepare facilities for the training of Patria Liberatans while KHAN was to establish an insurgent party organization and recruit individuals for insurgent training.

3-5. Establishment of The Party Organization

Upon returning to Patria Liberata in the summer of 1966, Roda KHAN established the headquarters of the Party Central Committee in the Morane Mountains near the Esperanta border. He then geographically divided the country into insurgent regions, provinces, and districts. These political boundaries were drawn to reflect the needs and capabilities of the insurgent movement and to, where possible, overlap governmental boundaries to create problems of government coordination. Six of KHAN's most trusted followers were dispatched to establish Regional Party Committees in each of the regions. The immediate mission of the committees was to recruit individuals to become leaders of the insurgency.

3-6. Training of Patria Liberatans in Esperanta

Recruiting personnel proved to be an easy task as former members of the People's Liberation

Alliance were eager to join the insurgent movement. During the fall of 1966, several thousand individuals were sent to Esperanta where Rab ISA had completed preparations for their training. Those personnel showing the best progress and absolute dedication to the establishment of a new government in Patria Liberata were trained for leadership positions at the province, district, and local levels. During all types of training, adherence to the policies of the Circle Trigon Party was stressed.

3-7. Organization of Party Committees

While the insurgents were being trained, Roda KHAN was organizing the clandestine party central committee which would guide the later development of local, district, provincial, and regional committees. Individuals were assigned various functions such as communications and liaison and finance and logistics. Adler CONDORO was charged with supervising intelligence and security, psychological operations, propaganda and training, and military affairs. The party organizers began placing extensive emphasis on propaganda activities based on the study conducted earlier by infiltrated agents. Plans were formulated for extensive propaganda campaigns among the Primipeople. General Hare AJOY was to be the supreme commander of the People's Liberation Army of Patria Liberata (PLAPL) when the insurgency was capable of providing for mobile main force and regional force units.

3-8. Preparation for the Insurgents

Upon completion of the plans for organizing the Party Committees, Roda KHAN concentrated on preparation for receiving the insurgents being trained in Esperanta. Lists of the most promising trainees were provided by Rab ISA and they were given tentative assignments so that training could be concentrated in their particular area of responsibility. Meanwhile, areas for operational bases were selected. A few of the bases in the Morane Mountains were made operational to provide areas for processing the insurgents.

3-9. Trained Insurgents Return to Patria Liberata

By the summer of 1967, the Patria Liberatans trained in Esperanta (now full-fledged insurgents), Aggressor technicians, and advisors began infiltrating into Patria Liberata. They traveled in groups of five to twenty following trails

through the Morane Mountains which were chosen by communications and liaison personnel and used only by smugglers and Primipeople. The infiltrators, using strict security measures, marched at night and slept during daylight hours at relay stations established along the routes. After spending a few days at a base camp, they departed individually for their place of assignment.

3-10. Initial Activities of the Insurgents

The number of trained insurgents was small compared to the population of Patria Liberata; consequently, they were not capable of launching the insurgency themselves. They concentrated on recruiting additional personnel for the insurgent movement and organizing them into cells. Cells were formed to conduct agitation, psychological operations, mob violence, passive resistance, coercion, threats, terrorism, bribery, sabotage, espionage, and agrarian reform. Early in 1968 many of the cells were organized and by the summer of that year some were operational.

3-11. Early Objectives of the Insurgency

Realizing active military operations could not begin for some time, the Central Committee devoted almost all of its energy toward political, economic, psychological and social objectives.

3-12. Converting the Primipeople

a. Agitation cells began operating in the villages of the Primipeople. At first the chiefs of the villages were apprehensive toward the insurgents, but eventually believed that the insurgents were sincerely interested in the welfare of the Primipeople and village meetings were arranged at which the agitators were permitted to speak. These representatives of the Political Cadre spoke eloquently and encouraged the people to form a Primipeople Confederation. They played upon the Primipeople's antipathy toward the Synthese, the despised "flatlanders" who governed Patria Liberata.

b. In addition to the agitation cells, psychological operations and passive resistance cells also were operating. Their theme was the same as the agitation cells.

c. Response to the activities of the Political Cadre-controlled cells was most gratifying. After being exposed to insurgent mass organizational

tactics, most of the villages agreed to become a part of the Primipeople Confederation which in actuality was a front organization for the insurgents in the Morane Mountains. The initial indications of a militia force became apparent when insurgent organizers suggested that special mass organizations be developed to protect the villagers from harassment and theft by corrupt government military forces passing through the area.

3-13. Conversion of the Villages

At the same time the Primipeople were being converted, Political Cadres were also active in other villages throughout the country developing various mass organizations. The approach was much the same as that used on the Primipeople. Agitation cells would convince the chief to arrange meetings of the villagers. During the meetings, members of the cells would accuse the government of not being concerned with the peasant's problems and of being controlled by the Atlantian monopolists. All promises were made in the name of the People's Liberation Alliance, with no mention ever being made of the Party Committee, or its affiliation with the Circle Trigon Party.

3-14. Activation of Base Areas

a. During the winter of 1967, a few of the previously selected base areas were activated for the purpose of processing the insurgents arriving in Patria Liberata. These bases, located in the Morane Mountains, would continue to be used for this purpose and as bases of supply for the insurgency.

b. By late 1968, the Primipeople and many villages were converted to the insurgent cause. KHAN decided the proper time had arrived for the activation of additional bases as they were necessary to provide areas from which guerrilla operations could be launched. Not all of the previously selected base areas were located in areas sympathetic to the insurgent cause. Those located in favorable areas were activated and personnel assigned to administer them. As the bases became operational, activities continued in an attempt to expand the base areas.

3-15. Agrarian Reform

One of the promises made by the insurgents to the people which proved relatively easy to fulfill was agrarian reform. By 1967 the National Appraisal Act, previously passed by the govern-

ment of Patria Liberata, had proved to be a failure. Therefore, it was only necessary to encourage the peasants to occupy the land acquired by the government from the plantation owners. The government reaction was either to ignore the peasant's actions or to move in with heavy-handed repressive measures. The repressive measures further alienated the population, making recruitment into mass organizations even easier.

3-16. Development of Mass Organizations

With propaganda and agitation activities showing substantial results, insurgent organizers emphasized further expansion of mass organizational work. Youth, women, farmers, workers, and minority organizations were developed. In each rural village a small militia force was developed to aid the organizational effort. By this time the insurgent infrastructure had developed to where it could support and control small guerrilla units. The party decided that personnel from the local militia units could be drawn from to develop the units and Aggressor supplied special warfare advisors to General AJOY to help build and train his infantile guerrilla army. By late 1968 a few rural districts had guerrilla forces operating within them. With many local liberation committees operating, a National Alliance for the Liberation of Patria Liberata was established (NALPL). This alliance provided Circle Trigon party activities with the illusion of massive popular support. Insurgent activities by the elite party organization were provided with the cover of what seemed to be a popular revolutionary movement. The Alliance would eventually claim that it was the real government of Patria Liberata.

3-17. Urban Insurgent Organization

a. Simultaneous with organizational activities in the rural area, political cadre (PC) cells were also active in the urban centers. Individuals were infiltrating student groups and unions, subverting employees in governmental agencies and industry, and infiltrating the Pathari religion.

b. Realizing the inherent capabilities possessed by the Tamaburen (organization of high school students) and the Saridaburen (organization of college students) in furthering the insurgent effort, insurgents trained for this purpose began infiltrating these organizations in late 1967. By 1968 both groups were under control of the insurgents and they began quiet demonstrations and

peaceful picketing against the policies of President YUMJAB. The groups became more active and outspoken toward the government. One of the group's more salient issues was the government's failure to curb guerrilla activities in the rural areas. Propaganda campaigns emphasized that the NFLPL was more capable of providing justice, law, and order than the government. Student unrest eventually closed several schools and universities.

c. Unobtrusively, insurgents gained important positions in several of the labor unions in Patria Liberata. In 1967, three of the largest unions, the Coast City Dock Workers, the United Mine Workers Union in Mining City and the Rail Transportation Union had been infiltrated. In the fall of 1967, factional disputes in the United Mine Workers Union erupted weakening its support of YUMJAB's government. At about the same time, the Coast City Dock Workers Union and the Rail Transportation Union went on strike. These strikes disrupted communications and transportation facilities halting the export of indigenous products which had an adverse effect on the already poor economic conditions in Patria Liberata.

d. Simultaneous with other operations, the Political Cadre began subverting individuals in government. Members of subversion cells had obtained employment with the government and began approaching middle-rank civil servants. Later, individuals in the National Assembly as well as a few Cabinet members were contacted. The mission of the subvertists was to persuade the civil servants to become members of the Liberation Movement.

e. A similar campaign to subvert individuals in industry was also initiated. Sizable private business donations were made as insurance against strikes and sabotage. But rather than concentrate on the subversion of Patria Liberatans a concentrated effort was launched to cause the Atlantians to leave the country. The Atlantians were subjected to assassination, intimidation, and kidnapping. Signs were posted in conspicuous places demanding they go home. Despite government promises of greater salaries, additional police protection, and other benefits, nearly all were coerced into fleeing the country in 1969. Their loss was keenly felt by the government for they had comprised nearly 60 percent of the country's industrial technical staff. After they departed many of their positions were filled by Political

Cadre trained in the Aggressor Homeland, Esperanta, and other countries of the world.

f. The urban clandestine organization became a primary means of support to the rural based insurgents. It established infiltration routes into the rural areas by which supplies, recruits, and financial aid could be sent to the rural insurgents. In addition psychological operations and mass recruitment cells gained access to both the domestic and international press and thus gave the insurgent movement prominence that it otherwise may not have received so early.

3-18. Infiltrating the Pathari Religion

a. The group of Synthese (the largest ethnic faction in Patria Liberata) who belonged to the Pathari sect had long resented the religious discrimination by the Omni Synthese, who looked upon the former as an "outmoded and primitive sect." Although the Pathari sect first gained followers among natives inhabiting the western part of the Central Plateau and peasant farmers of the Savanna region, several moved to major cities and were employed as laborers in factories and mills. They became quite influential in the unskilled labor class. Some of the grievances that stemmed from this traditional hatred of the Omni Synthese were that in spite of being the majority group, the Pathari were underpaid, decent job opportunities were denied them, and they were forced to live in the poorer sections of the cities.

b. The Political Cadre capitalized on such conditions and formed a mass organization called the "Pathari Believers Movement" which advocated relief from the religious discrimination and oppression of the Patria Liberata government. Many followers from the unskilled laborers in urban areas were recruited and the movement expanded to Pathari living in rural areas, the majority of whom also responded favorably. It soon became one of the most aggressive insurgent organizations.

3-19. The Formation of the Militia

Militia units were formed as soon as a village became converted to the insurgent cause. Training, which consisted mainly of political indoctrination and some basic military subjects, was supervised by Political Cadre who had been trained in Esperanta.

3-20. Formation of Regional Forces

Militia units had been organized in hundreds of

villages and the decision was made to organize regional forces by late 1968. Esperanta-trained advisors were infiltrated into Patria Liberata to supervise the formation and initial training of guerrilla units. Additional personnel had to be recruited by the local militia to replace those used to form the regional units. Platoons had been organized in almost all the districts and formation of companies at the provincial level has begun by the spring of 19___. (For organization of guerrilla units see part IV, FM 30-102.) Total strength at the regional units by mid-19__ was about 3,000 personnel in addition to 10,000 militia.

3-21. Propaganda Operations

a. From the beginning of the insurgency, propaganda cells supported all other activities. A radio station had been established in Esperanta near the border of Patria Liberata in 1966. This station was powerful enough to reach all the Primipeople in the Morane Mountains and the peasants in Eastland and Westland provinces. Another station, a mobile unit, began operating in the southern Alto Mountain area in 1968. Thus, after radio receivers had been distributed to the peasants of the villages and workers in the cities, propaganda broadcasts could be heard by almost everyone on a scheduled basis. This radio station often broadcast instructions to cadre via the use of double language.

b. In Capital City, the Central Committee began printing a newspaper, "The Spark," in 1968. At first, "The Spark" was published only weekly but by 1969 daily editions were printed. Copies were distributed throughout Capital City and sent to the other cities by covert means. Eventually, copies were even passed to the villages where literate individuals read them aloud at public gatherings. "The Spark" provided overall guidance and assured a unified effort on behalf of all insurgents.

c. The appropriate staff agencies of the Party Central Committee, using the NALPL as a cover, supervised the operations of the radio stations and the printing of "The Spark." All articles had to be approved by the psychological operations section before broadcasting or printing. Psychological operations personnel received guidance from the propaganda and training section. The aim of the propaganda was to assist the other activities in converting the people to the insurgent cause. Some broadcasts and articles

attacked YUMJAB's regime by exaggerating its weaknesses. Others emphasized the prejudices of the government toward the minority groups.

3-22. Sabotaging Communication Facilities

Those insurgents trained in the conduct of sabotage began operating shortly after entering Patria Liberata. Cells were formed for the destruction of rail lines, roads, docks, and oil pipelines. Operations were restricted to destroying portions of the short spur railroads, knocking out small sections of the highways and trails, damaging unloading facilities at the docks, and causing failures at some of the pumping stations on the pipelines. Plans were made for the destruction of larger targets, such as rail and road bridges, at a later date. Targets were chosen to hold antagonism of the population to a minimum.

3-23. Guerrilla Operations

a. As early as 1968, squad size regional units began operations. The first objective was the assassination of government tax collectors sent to the villages to collect land rent from the peasants. By means of an excellent intelligence system the guerrillas knew the exact schedule and composition of the tax collector teams. The teams were composed of one or two tax collectors and two to four National Policemen. By means of prior planning, guerrilla squads had little difficulty in ambushing many of the teams and killing the personnel.

b. In some instances, the plantation owners had not vacated the land as required by the National Appraisal Act. Obviously the government was not going to enforce the law so the guerrillas decided to terrorize the owners. Squad size units attacked and killed plantation owners and their families. News of these attacks spread causing surviving plantation owners to vacate the land, thus permitting the plantations to be divided among the peasants.

c. Other operations were launched against the National Police outposts located along the Esperanta border. Squads attacked outposts consisting of six or less men, annihilated them and captured their equipment. By late 1969 and early 1970, a few of the larger outposts were attacked by regional platoons. The primary purpose of these attacks was to obtain weapons and equipment for the regional units.

d. Government military forces began operations against suspected guerrilla locations as a result of the guerrilla attacks. The government operations were, for the most part, unsuccessful as the insurgent intelligence system usually knew

the details of most of the attacks in advance. The intelligence system was largely composed of civilian informants made available to the insurgents through their successful mass organizational work.

Section III. EXPANSION OF THE INSURGENCY IN PATRIA LIBERATA

3-24. Escalation of Military Activities

a. Prior to 1969, regional guerrilla operations were minor in nature. The first full-fledged operations began in late 1969 with well organized and highly successful ambushes of government military reconnaissance patrols and raids against military outposts, armories, and small-town garrisons. In the beginning, these operations were limited to a relatively small scale because of insufficient weapons and equipment. As the quantity of arms and ammunition captured from government forces increased, so did the number of raids and the size of forces employed. Company-sized operations were quite common by midsummer of 1970.

b. The Savanna region in Eastland Province, being the backbone of the country's agriculture, was the first territorial target area of the expanded operations. The insurgents extended their control in the area through the dual efforts of successful military operations and effective mass organizational work against the government forces. In spite of repeated attempts by government forces to regain the initiative, the People's Liberation Army of Patria Liberata was in full control of an area extending from a point just south of East City along the coastline to the border between Eastland and Coastland provinces and extending inland an average of 50 miles.

c. Elsewhere in the country the expansion of military operations followed the same timetable adhering to a similar pattern. The fundamental common factor throughout the country was that the PLAPL seized and maintained the initiative. Thus, by late 1970 the PLAPL had succeeded in excluding government forces from the following areas: the southern foothills of the Alto Mountains north of South City and the entire mountain areas of Westland and Northland Provinces excluding the towns of Border Town and Mining City. In these areas the PLAPL set up its major infrastructure organizations. Government lines of communication between these areas and the rest of the country were successfully blocked.

3-25. Actions of YUMJAB's Government

The Patria Liberation Army was not trained to fight a counter guerrilla campaign, and its overall training and ability to fight a conventional conflict was less than adequate. The mountainous terrain chosen by the insurgents for base areas made it difficult for conventional forces, especially on the offensive, to operate. Air reconnaissance was generally ineffective. Eventually the army abandoned offensive operations and gave up its mountain outposts that were not vital. Guerrilla attacks on small and weak outposts and harassment of government troop columns forced the military to adopt a policy of containing the insurgents in their area of operations, leaving them free to operate in this area. This action opened the way for the development of larger main force units. In the urban areas the YUMJAB government reacted to insurgent activities with military force and coercive measures in an attempt to repress the insurgents. These measures were not specifically aimed at the infrastructure organization and succeeded only in alienating large segments of the population.

3-26. PLAPL Form Mobile Main Force Units

a. By late 1970 the PLAPL began to form mobile main force units. At this time the estimated PLAPL total strength was 28,000 personnel; 8,000 full-time guerrillas in the regional units and 20,000 part-time militia. The regional units, organized at the district and province levels and subordinate to the local party executive committees, had been operating within their own geographical areas of responsibility. The militia was being used primarily as a village defense force and a major source of local intelligence as well as a manpower pool for the regional units.

b. Manpower for the main force units was drawn from two primary sources. The leaders, technical specialist, and some of the rank and file were obtained through infiltration of personnel from Esperanta. These infiltrators were Pa-

tria Liberatans who had been sent to Esperanta for special training and Esperantan Synthese personnel. The major source of manpower for the main force units was the existing regional forces. It was considered an honor to be selected for assignment to main force units; therefore, local recruitment presented no problem. Local infrastructure personnel were able to supply ample recruits. However, PLAPL leaders were forced to set up a rigid timetable and manpower management plan governing the formation of main force units to avoid depletion of regional units. In general, the insurgent leadership attempted to keep the strength of regional units constant by replacing personnel shifted to main force units with personnel recruited by the psychological operations and recruitment agency of the infrastructure. If necessary, the regional force could draw from the local militia, if the request was approved by the political apparatus.

c. Initially, the PLAPL formed platoon and company sized units and only toward the beginning of 1971 did it begin forming main force battalions. To cope with the consequent increase in demand for experienced advisors and more sophisticated military equipment, infiltration of men and materiel from Esperanta was increased.

d. By the end of 1971, PLAPL had approximately 8,000 men in its main forces. Most of these regulars were at that time organized into 19 battalions. There were six battalions in each of two major base areas in the Moranes and seven battalions at the base area in the Alto Mountain north of South City. In addition, there were some independent companies in Eastland province.

e. During the last months of 1971 the PLAPL, in preparation for operations which would require shifting its best striking forces from area to area, began to establish a series of "safe areas" throughout Patria Liberata. These consisted of small mobile bases where equipment and supplies were stored in areas nominally under government control. Normally the safe areas were located in heavily wooded parts of the country-

side, although at times they were located in villages friendly to the PLAPL cause. They served as temporary bases for guerrilla operations in the vicinity and as way stations for units moving from one major base to another. Mobile field medical facilities were also located in the safe areas. The main characteristic of these safe areas was that they could be shifted from one location to the other rapidly and with a minimum of advance notice. The PLAPL main forces now possessed an enhanced capability to operate away from their home bases.

3-27. Insurgent Order of Battle in Patria Liberata

a. The People's Liberation Army of Patria Liberata (PLAPL), in accordance with Aggressor doctrine, has successfully enforced strict security measures to prevent its units from being identified and located. While main force regiments are subordinate to a region, their subordinate units, as well as their headquarters, move frequently, rarely operating in one location for an extended period of time.

b. Main force regiments are designated by arabic numerals, and have code names and code numbers, much like the regular Aggressor army. Often these units are identified in insurgent documents and verbal orders solely by code numbers. While the unit designation does not seem to change, the code numbers are changed very frequently, at times even daily. Battalions subordinate to a main force regiment are designated 1st, 2d, and 3d battalion of parent regiment. All other units subordinate to a regiment retain the regimental designation, i.e., medical platoon of parent regiment, supply company of parent regiment. All regimental units use the parent unit's code name and code number.

c. Independent main force units, those not subordinate to a regiment, have a combination numeral-letter or solely numerical designation. In addition they have code names and code numbers. Unit designations as well as code names and numbers are changed frequently.

3-28. Identified Main Force Regiments

Unit	Commander	Code name	Code No.	Subordination	Last known location
1	Comdt De Unamuno	Montoro	22000	Westland Region	10 km north of Mountain City.
7	COL Thijm, J.R.	Monteta	Unknown	Westland Region	Lake Major Area.

Le Play	Lt Le Play	Unknown	Unknown	Coastland.

3-31.

Since the development of insurgent movements is dependent on political, social, cultural, and economic circumstances, the further development of insurgent OB holdings is not realistic. Exercise planners for insurgent exercises should develop political, cultural, social, and economic circumstances they feel to be most appropriate to

their exercise and tailor the insurgent situation to those circumstances. To take a "canned" situation like Patria Liberata and say it is applicable to any part of the world is not using it in the proper context. It is merely an example of insurgency in one particular cultural, political, economic, and social setting. While conventional Aggressor divisions can, with proper modifica-

tion, be deployed in any part of the world, insurgencies cannot.

3-32. Insurgent Offensive

a. A PLAPL offensive launched in early 19— consisted of two simultaneous campaigns. One campaign consisted of a series of operations conducted in the countryside to inflict heavy casualties on government forces and drive them back into the cities. The other consisted of extensive sabotage operations geared to disrupt government communications in the countryside and create chaos and confusion in the major cities. The infrastructure was responsible for the conduct of sabotage in the cities. Each organization was selective in the use of sabotage as the insurgent leaders were looking to a time when they could gain control of the country and would need transportation and communication facilities for their own use. Damage of targets was rarely so severe that it could not be restored in two or three days, but the insurgents still hampered government operations by either interdicting repair crews or causing other damage elsewhere.

b. The insurgent offensive was initiated with attacks on villages in government-controlled areas. The insurgents struck suddenly and effectively, overrunning government garrisons and ambushing reinforcements. In those villages with small or no government garrisons, the PLAPL employed its regional units and assassination teams to murder or chase away members of the government civic action teams and terrorize the villagers into submission. Whenever the government mounted large scale search and destroy operations, PLAPL threw its main forces into action. Aided by superior intelligence and mobility the PLAPL main forces were generally able to concentrate their units in large enough numbers as to outnumber government forces in a given place at a specific time. Heavy casualties were inflicted on government forces making it unprofitable for them to move into the countryside. By choosing the beginning of their offensive to coincide with a prevalence of adverse weather conditions, they neutralized the threat of Patria Liberata's Air Force. In addition to inflicting heavy casualties on government forces, the insurgents captured large amounts of war

materiel and were progressively able to equip more and more people with modern equipment.

c. As the government forces lacked tactical air transport units, they depended almost entirely on the rail system to shift troops and supplies. The insurgents, reluctant to inflict permanent damage on a rail system they felt they would soon need themselves, devised a practical solution to disrupt rail transportation. PLAPL sabotage teams removed sections of rail from many places on the country's railroads hiding the rails for future use. The sabotage always occurred at a considerable distance from the cities so that government repair crews could be ambushed. In the few instances where government escort forces were too strong, the insurgents simply moved a certain distance down the line and while repairs were being effected in one place the insurgents sabotaged the rails in another. This type of harassment seriously hampered government efforts to move troops and supplies.

3-33. Patria Liberata Requests Aid

a. The beginning of the insurgent offensive clearly indicated the gravity of the insurgent threats to the Patria Liberation government. The YUMJAB government had consistently underestimated the insurgent threat. By concentrating on elimination of the guerrilla forces, without regard to the infrastructure support and control apparatus, the Patria Liberation government had been able to deal with neither effectively.

b. The American Ambassador and his Country Team in Patria Liberata had been closely monitoring the rapidly deteriorating situation and, upon request for assistance from the Patria Liberation government, the Ambassador asked that a Military Assistance Advisory Group be dispatched to Patria Liberata. The request was approved and military technical experts began arriving in Patria Liberata to advise, assist, and train indigenous forces in counterinsurgent warfare. Personnel in the areas of combat operations, counter guerrilla operation, psychological operations, and intelligence activities were among the fields represented. An effective counterinsurgent program can best be devised by augmenting Patria Liberatan forces with advisory personnel.

PART TWO

ORGANIZATIONAL HOLDINGS

CHAPTER 4

REGIONAL COMMAND ATLANTICO

Section I. GENERAL

4-1. General

This regional command was activated in 1956 to direct Aggressor operations in the Atlantic and gulf coast areas of the North American continent and in the Caribbean area. AG KARIBO, AG ST LAURENCO and Task Force Panama were placed under its command. In 1961 AG GOLFO was added to the regional command. In 1965, as a result of the loss of the Panama Canal Zone, Task Force Panama was deactivated. Until 1969 the forces of RC Atlantico, after their initial successes, had not made any substantial gains. The few real victories in the early 1960's were more than offset by the severe defeats in the mid 1960's. In 19__ the entire regional command was reorganized. In 19__ it resumed the offensive on all fronts and by May had made considerable gains. After a series of serious setbacks from June to July 19__, AG GOLFO withdrew to Monterrey, Mexico. AG KARIBO recaptured Panama and AG ST. LAURENCO withdrew to the Antilles. No major campaigns have been launched in the continental United States since July 19__.

4-2. RCA Order of Battle

CODE NAME BRAVIDO

CODE NUMBER 000001

AREA OF RESPONSIBILITY Atlantic Coastal Areas of North America, Caribbean Area and Texas-Hq: Cuba

Commander: Marshal ZAGAMI, Frank

Deputy Commander: G/A's RODRIGUEZ-SIERRA, F.M.

Chief of Staff: G/Air ROGOVOFF, Nikolai

Subordinate Army Groups:

AG GOLFO (AGG)

AG KARIBO (AGK)

AG ST LAURENCO (AGSL)

4-3. Miscellaneous Regional Command Units

A large number of SAM units are deployed throughout the Caribbean to protect the regional command headquarters and rear units. Quantitatively they appear to be evenly divided between RAMMER and RAIDER units. None of their numerical designations have been identified. One U/I SSM Division has been tentatively reported in Cuba. Naval forces available to this regional command include missile-armed cruisers and submarines. The normal complement of headquarters and service units, to include large medical facilities, is deployed primarily in Cuba and Haiti.

Unit History. Organized as AG XII in 1955. Landed in New Brunswick in the fall of 1957 and by February of 1958, held all of New England and the St. Laurence River area. In 1956, redesignated AG ST LAURENCO, it was placed under Regional Command ATLANTICO. The 21st CAA joined the group in 1960. In 1961 it launched a major offensive southwest of Montreal making limited territorial gains in northern New York. From 1962 to 1965 it consolidated its hold over occupied areas and avoided major engagements. In September 1966 its 16th Tk A was practically annihilated in northwestern New York. The entire AG was forced to pull back into Canada. In 1967 the 16th Tk A was reconstituted in the Homeland and rejoined AG ST LAURENCO in 1968. By November 1968 the entire AG had been reorganized and re-equipped. In May 19__ it began a successful drive southward reoccupying New England and most of New York state. However, by June 19__ it encountered intense resistance from United States forces and in July was withdrawn to the Antilles after losing almost 40 percent of its resources in the United States counteroffensive.

Unit History. Organized in the Homeland in 1952. Participated in the 1954-55 European campaigns. Returned to the Homeland in 1956. Re-assigned to AG ST LAURENCO in Canada in 1965. Was not committed in the 1965 offensive. Spearheaded in the 1966 offensive. In September 1966 while massing to exploit a breakthrough in US lines it was hit by a devastating nuclear attack. A subsequent US Army armored counterattack succeeded in surrounding the remnants of the 16th TK A and completing its destruction. A new tank army, given the 16th TK A designation,

was sent in 19__ to join AG ST LAURENCO. In May 19__ the new 16th Tk A was committed and in a short time its divisions were streaming down the Hudson Valley headed for New York City.

Unit History. Organized as Army Group GOLFO in 1960 in the Homeland and sent to reinforce Regional Command ATLANTICO in 1961. In May 1961 it successfully invaded Texas. In 1965 it failed in an attempt to invade Oklahoma. In 1965 it repulsed a major US offensive. In March 1965 elements of its 6 CAA temporarily linked up with elements of Army Group KARIBO on the Mississippi-Louisiana border. In late 1965 it was reinforced as a result of the deactivation of Task Force Panama. In 1966 its 5th CAA again attempted to occupy Oklahoma but did not succeed. An attempt in June 1966 to push westward and link up with Army Group KALIFORNIO also failed. Reorganized in 1968. In April 19__ launched a major offensive along the Texas-Oklahoma border. The AG withdrew to Monterrey, Mexico in July 19__ after having lost 40 percent of its resources in the US counteroffensive.

Unit History. Organized in 1960 in the Homeland as a subordinate command of Army Group GOLFO. Participated in Texas invasion in 1961. In 1963 began a northward offensive reaching the Arkansas River by mid-November. Forced back in December 1963. Successfully repulsed a US offensive in 1964. In 1966 spearheaded a second northward offensive into Oklahoma but again was stopped and slowly was pushed back to the Texas border. In April 19__ it made its third attempt to invade Oklahoma meeting with success.

Unit History. This is one of the oldest units in the Aggressor Army. Its traditions go back beyond the founding of the pre-Circle Trigon Aggressor republic. Formerly the 3d Republican Guard Division traditionally stationed in the Homeland capital, it was redesignated the 3d Presidential Rifles in 1956 and was the backbone of the amphibious force which invaded the Antilles and Panama. In 1958 it was returned to the Homeland where it was reorganized, re-equipped and redesignated the 3d Fusilier Motorized Rifle Div. In 1960 it was assigned to the 5th CAA and sent to take part in the Texas invasion in 1961. Participated in the 5th CAA offensives of 1963, 1966 and 19__ with great distinction.

Unit History. Formerly the 15th Rifle Div it was assigned to the 5th CAA in 1960 and in 1961 participated in the Texas invasion. In 1963 redesignated 15th Mtr Rfl Div. In 1963 at the onset of the first northward offensive it broke through US lines and by mid-November its 281st Regt was deployed along the Arkansas River line. For these actions it was awarded the Fusilier designation. In April 1966 it again broke through US lines and pushed into Oklahoma. When the 5th CAA has been forced to back into Texas this division was withdrawn from the Oklahoma sector and sent to western Texas where in June 1966 it took part in the westward offensive. Returned to the 5th CAA sector in late 1966. Reorganized and re-equipped in 1967. Took part in the April 19__ offensive.

Unit History. Formerly the 80th Terr Gd Cav Div it was converted to a Tk div in 1959. After a period of intensive training, in 1960 it was assigned to the 5th CAA and took part in the invasion of Texas a year later. It has been in every combat operation of the 5th CAA since 1961. During the 1966 offensive it successfully exploited the breakthrough by the 15th F Mech Div and won the Fusilier designation. When the 5th CAA was forced to withdraw from Oklahoma the division acted as a covering force, two of its regiments were encircled but managed to break out and rejoin the retreating 5th CAA. Due to the severe losses sustained in that campaign the division was out of action for several months. In 1968 it was re-equipped. In April 19__ it again went into action in the third northward offensive.

Unit History. Organized in 1959 and assigned to the 1st Tk A in 1960. Took part in the 1961 Texas invasion. Identified in western Louisiana in 1962. Identified in the Texas-Oklahoma border area in 1963. During the 1966 northward offensive it was part of the exploitation force which drove into Oklahoma. Its 62d Mdm Tk Regt won the Fusilier award for this action. In September 1966 nuclear fires caught its rfl regt in the open and inflicted 90% casualties. In November 1966 the 202F Mtr Rfl Regt joined the division to replace the lost rfl regt. Identified in assembly areas near Ft. Worth in 19__. Identified in Oklahoma in April 19__.

Unit History. Organized in 1960 in the Homeland and assigned to AG ALARMO. Transferred to AG GOLFO in 1962. In 1962 participated in the invasion of western Louisiana. In 1966 it was shifted to western Texas and in June of that year, reinforced with the 15F Mech Div, it launched a westward offensive in an attempt to link up with AG KALIFORNIA forces. In September 1966 after a series of decisive defeats in rapid succession it was forced to withdraw to western Texas. During the withdrawal the 181st HV Tk Regt smashed a US airborne force blocking the route of withdrawal and won the Fusilier designation. Reported on maneuvers in the El Paso area in 1967. Two of its divisions were identified in April 19— in the 6th CAA sector in western Louisiana.

Unit History. Organized in 1960 and assigned to the 2d Tk A. Identified on the Texas-Louisiana border in March 1962. In June 1966 spearheaded an armored offensive in western Texas and by July 1966 penetrated US defenses in Arizona. In August 1966 was awarded the Fusilier designation. In September 1966 it had overextended its lines of communications. US airborne forces succeeded in cutting it off from the rest of the 2d Tk A. Forced to fight on two fronts the division suffered severe losses and only 20% of its combat strength was able to rejoin the retreating 2d Tk A. The division was reconstituted in 1967 and participated in Army maneuvers around El Paso that same year. No recent identifications of this unit have been reported.

Unit History. Organized in 1955 as AG XI. Redesignated AG KARIBO in 1956 and placed under Regional Command ATLANTICO. Its forces invaded Florida in 1957. In 1961 it gained an additional foothold on the North American Continent by invading S. Carolina. It suffered a severe defeat in September 1964 and was almost pushed back into the sea in S. Carolina. Heavily reinforced in 1965, it conducted a successful campaign in the southeastern United States effecting a link-up of its forces in Florida and the Carolinas with the forces of AG GOLFO. In July 1966 it failed in an attempt to retake the Panama Canal Zone. Made limited gains in the 1966 Carolinas campaign. It was fully reorganized in late 1968. In May 19__ it initiated a major offensive completing the occupation of N. Carolina. The AG withdrew its forces from N. Carolina in July, under intense pressure from the US counteroffensive of 19__. Although it sustained losses of up to 40 percent in some units, its First Combined Arms Army was successful in leading an amphibious assault which resulted in the recapture of the Panama Canal in late July 19__.

Unit History. Activated as 1st Army in 1954 to command and control the 48th and 3rd Rifle Corps. In 1955 assigned to AG XI and sent to the Caribbean. Contributed in the formation of task forces which harassed the North American Atlantic coast area from 1955 to 1958. In 1958 the rifle corps were deactivated and the 1st Army was reorganized, redesignated 1st CAA, and placed under AG KARIBO. In 1961 it made a successful amphibious landing in S. Carolina. Since 1961 the 1st CAA has been fighting in the Carolinas with distinction. It spearheaded the 19__ northward offensive and its advanced units crossed into southern Virginia. It retreated into N. Carolina in July 19__ and spearheaded the successful recapture of the Canal Zone later the same month.

Unit History. First identified in 1961 as the 125th Rfl Div in the amphibious landings in S. Carolina. Participated in the 1962-1963 Aggressor offensive into N. Carolina. In 1964 the division was responsible for a large sector of the Aggressor northern perimeter defending the Carolina lodgement area. In September 1964, under attack by US forces the division's positions were overrun and it suffered severe losses of personnel and equipment. No identifications of this unit were reported for the period 1964-1966. Identified again in August 1966 as the 125th Mtr Rfl Div, it participated in the 1st CAA's northward push. Reorganized in 1968. Identified in southern Virginia in 19__.

Unit History. A division of the pre-Circle Trigon Aggressor-land Army, it was formerly known as the 25th Homeguard Division. In late 1963 it was reorganized, modernized and sent to Cuba to form the nucleus for the organization of the 3d CAA. Identified in western S. Carolina in 1965. During the westward offensive of March 1965 the division executed the breakthrough which permitted the 3d CAA to sweep through the southern US to link up with AG GOLFO. For this action the division was awarded the Fusilier designation. Later that same year it was forced to withdraw into eastern Georgia. Credited with successful holding action in Georgia in the 19__ campaign.

Unit History. The division was formed by expanding the very old and tradition laden 171st Chasseurs à Pied Regiment and redesignating it the 171st Rfl Div in 1958. In 1959 it was assigned to AG KARIBO's 12th CAA. Participated in the landings and subsequent occupation of Florida. Redesignated 171st Mtr Rfl Div in 1965. In 1966 it was identified in the attempt to retake the Panama Canal Zone. In August 1966, after having suffered high casualties and abandoning most of its equipment the division was withdrawn to Haiti to be reorganized and re-equipped. It was sent into N. Carolina, temporarily attached to the 1st CAA, 19—. In May 19— identified west of Winston-Salem, N. Carolina, acting as flank guard for the 1st CAA's push northward.

Unit History. Formerly known as the 9th Homeguard Air Comd stationed in the Homeland. Transferred to the Caribbean in 1955 to support the operations of Aggressor forces in that area. Redesignated 9th Air A in 1958 and placed under AG KARIBO. It has undergone two major reorganizations, one in 1963 and the other in 1967. Its subordinate units are scat-

tered throughout the Antilles and the Carolinas. It lost up to 75 percent of its helicopter strength in 1966 in Panama but it has been brought back up to full strength with modern aircraft as a part of the 1968 reorganization.

CHAPTER 5

REGIONAL COMMAND PACIFIKO

Section I. GENERAL

5-1. General

Organized in 1962 to direct Aggressor operations in the north and eastern Pacific theater of operations. Until 1965 its forces had met with limited success. The 1966 defeat in Alaska forced it to abandon plans for the total occupation of that state. By April 19__, however, its forces were in the offensive on all fronts and making good headway. However, by July 19__, under pressure from US forces, PACIFIKO was forced to withdraw both its AG's to their lodgement areas in Alaska and the Aleutian Islands.

5-2. RCP Order of Battle

CODE NAME DANGEROCODE NUMBER 000002

AREA OF RESPONSIBILITY Aleutians; Pacific Coastal Areas of the US Hq: California

Commander: Marshal DIETZ, Louis H.
Deputy Commander: Admiral NORWOOD, W.F.

Chief of Staff: G/A CHERKUROV, Iuri
Subordinate Army Groups:
AG KALIFORNIO (AGKL)
AG KOLUMBIO (AGKO)

5-3. Miscellaneous Regional Command Units

No specific units have been identified in this category. Ground forces include a limited amount of headquarters and service units, some maintenance installations, and medical installations. A liaison team from a unit identified only as USO-NO is reported to have arrived at regional command headquarters, no other information is available on this matter. Naval forces available to this command include heavy troop transports, hospital ships, missile armed cruisers and submarines and a large flotilla of landing craft.

Section II. ARMY GROUP KALIFORNIO

Unit History. Organized in 1961 in the Homeland. Assigned to Regional Command PACIFIKO in 1962. In March 1962 executed multiple simul-

taneous landings on the west coast of the United States. By July 1962 had completed the occupation of California and Oregon. From 1963 to 1966 consolidated its hold on the occupied areas and set up a strong defense along the borders of California and Oregon. Reinforced by the arrival of the 6th Tk A in 1965 and the 4th SSM Div in 1966. In June 1966 launched a major offensive from southern California into Arizona. The offensive was initially successful but was halted in August in central Arizona. In September a US counteroffensive pushed the AG back into California. From late 1966 to 1968 the AG avoided major engagements while undergoing intensive training and being re-equipped. In April 19__ it launched two offensives contemporaneously. While the 15th CAA began a northeastward push into Washington, the 16th CAA, and 6th Tk A pushed into Arizona up the Gila valley. In July 19__, US counteroffensive pressure caused the AG to again withdraw into California and ultimately to its lodgement area in the Aleutians.

Unit History. Organized in 1961 in the Homeland and assigned to AG KALIFORNIO. Participated in the landings on the west coast of the United States in 1962. In the course of that operation it experienced considerable difficulty in securing its objective and was almost forced off the beaches by resolute US counterattacks. The subsequent landings of the 20th CAA relieved the pressure on its perimeter and the 16th CAA was able to break out of the beachhead. During the consolidation phase it was assigned to southern California. Two of its mechanized divisions were replaced during the same period. In 1966 it participated with the 6th Tk A in the first eastward offensive but by September of that year it had been pushed back into California. In April 19— it broke through US lines on the California-Arizona border creating a wide gap through which the 6th Tk A pushed into Arizona.

Unit History. Organized in 1958 and assigned to AG ORIENTO. In 1965 it was reassigned to AG KALIFORNIO. In 1966 played a major role in the first eastward offensive. Its tank divisions carried the offensive deep into Arizona. When the US counterattacks forced Aggressor to withdraw from Arizona the 6th Tk A deployed its divisions in a covering action which permitted an orderly withdrawal with a minimum loss of personnel and equipment. In April 19__ it again took the offensive exploiting a breakthrough by the 16th CAA, and pushed up the Gila Valley into Arizona.

Unit History. Activated in northeast Asia in 1957. In 1965 its airborne brigades were dropped in the Fairbanks area following a nuclear attack delivered by 6th Air A units from bases in the North Pacific. In 1964 and 1965 engaged in applying a constant outward pressure which succeeded in enlarging its Alaskan airhead permitting it to air land the bulk of its 7 CAA in 1965. In 1966 its 7th CAA was ordered to take the offensive but the results were disastrous. No more attempts were made to further reinforce the Alaskan airhead after 1966 and the 7th CAA reverted to a defensive posture. In 19__ the airborne brigades and the 7th CAA's tank division were withdrawn from Alaska. In April 19__ four AG Airborne divisions were dropped behind the US coastal defenses while the 24th CAA was making amphibious landings along the Bellingham-Tacoma coastline of Washington. By the end of April the 24th CAA, reinforced with AG forces, had driven a wedge running generally NW to SE deep into Washington hoping to link up with AG KALIFORNIO forces moving north from Oregon. Its drive to link up with AG KALIFORNIO was stalled in June by US resistance and an airborne assault in its rear areas. The AG was forced to withdraw from Washington to avoid being trapped between US forces. The withdrawal turned into a rout with KOLUMBIO losing 60 percent of its combat troops and equipment. The remnants of the AG managed to withdraw into Alaska and were reported in the Seward Peninsula area in 19__ undergoing reorganization and training.

Unit History. Organized in 1957 in northeast Asia. Its units spent 3 years training in air-landing techniques and for subsequent operations in rugged terrain in an arctic environment. Air-landed in Fairbanks, Alaska, area in 1965. Ordered to take the offensive in May 1966. Determined US opposition combined with a high rate of equipment failure, disrupted the offensive and US counterattacks in October 1966 forced the 7th CAA to retreat to its original lines of departure abandoning large quantities of equipment and sustaining heavy casualties in the process. Since then the 7th CAA has limited itself to defending the Fairbanks airhead. In 19__ the 219F Tk Div was withdrawn from Alaska.

Unit History. Organized in 1958 as a rfi div and assigned to AG VII. In 1959, as part of Task Force SCHNEE, made amphibious landings in the vicinity of Anchorage, Alaska. Won the Fusilier designation during the first Alaskan invasion. Evacuated to the Aleutians in October 1959 and transferred to the Homeland a few months later. Reorganized in 1964 and reassigned to AG KOLUMBIO. Trained in air-landing techniques and arctic environment tactics until it was air-landed in Alaska in 1965. Did well initially in the 1966 offensive but lost 70 percent of its mechanized equipment and 50 percent of its personnel in the October retreat. Identified still in the Fairbanks area in 19__.

Remarks. Equipped with TYRANT tanks in place of the standard Aggressor medium tanks.

Unit History. Organized in 1954, took part in the first European campaign winning the Fusilier designation. Returned to the Homeland in 1958 where it was reorganized and re-equipped with light tanks in place of its standard medium and heavy tanks. Transferred to northeast Asia and assigned to AG KOLUMBIO in 1964. Trained in air-landing techniques and arctic environment tactics until it was air-landed in Alaska in 1965. In the 1966 campaign the division was caught by surprise while attempting to cross the west fork of the Gulkana river and it suffered such heavy losses that it was not able to provide an effective covering screen for the 7th CAA's retreat. The division was withdrawn from Alaska in 19__ and sent to the Homeland where it was reorganized and re-equipped. In April 19__ it was identified in the vicinity of Kennewick, Wash., still reportedly subordinated to the 7th CAA.

Remarks. Equipped with TYRANT tanks in place of the standard Aggressor medium tanks.

CHAPTER 6

REGIONAL COMMAND AZIO

Section I. GENERAL

6-1. General

This is the newest of the Aggressor regional commands. It was activated in the Homeland in 1964 and it took over from AG ORIENTO responsibility for operations in SE Asia. In addition to its three known army groups it has some yet unidentified GHQ ground and air units. It appears to have been formed with the intent to effect the occupation of the Philippines and Burma. As a result of the nuclear neutralization of the Philippines, the invasion effort was shifted to Indonesia. GHQ units were employed to occupy SW Celebes prior to the landings on Java. The reason is not known for AG BIRMO's invasion of Thailand where all pointed to its having been groomed for an attack on Burma. Since 19__ RC AZIO has been actively committed to the tactical support of the ASIAN UNIFICATION MOVEMENT and its "liberation wars." From September to December 19__, RC AZIO participated in the "MONSOON" campaigns in South Vietnam, Laos, and Cambodia.

6-2. RCAZ Order of Battle

CODE NAME BRUTOCODE NUMBER 000003AREA OF RESPONSIBILITY Southeast Asia
HQ: Vietnam

Commander: Marshal SNYLOV

Deputy Commander: G/A's IMAGAZU, A.

Chief of Staff: VAdm ZOSHCHENKO, Alexei

Subordinate Army Groups:

AG BIRMO (AGB).

AG JAVO (AGJ).

AG MALAJO (AGM).

6-3. Miscellaneous Regional Command Units

a. The regional command headquarters and rear area installations are protected by two or three SAM brigades, mostly RAMMER. Several rifle regiments have been reported to be employed in local security and antiguerrilla activities. These could be part of the unidentified rifle division; mountain or jungle, or separate rifle regiments. Most rear echelon service installations are concentrated in Laos and Cambodia.

b. Naval forces available to the regional command include large numbers of medium and heavy transports, a large flotilla of landing craft, an unknown quantity of missile cruisers, and a large quantity of missile-armed patrol boats.

Section II. ARMY GROUP BIRMO

Unit History. Organized in the eastern Homeland in 1964 as AG SUDORIENTO. Conducted

large-scale maneuvers in the South China Sea coastal areas with emphasis on amphibious landings. In February 19__ the entire army group moved out by sea heading for Celebes. On 27 February the 18 CAA made a surprise landing near Surabaya in the island of Java. The army group was apparently redesignated just before the Surabaya landings. When the advance of the 18 CAA became stalled near Surakarta, the 44 CAA was also landed at Surabaya and sent to assist the 18 CAA. On 10 March 19__ the advance was resumed. After taking Surakarta, the army group forces began a two-pronged push for Djakarta. By 20 March, the 18 CAA had taken Tjirebon on the north coast and the 44 CAA had advanced to Bogor, only 25 kilometers South of Djakarta.

Unit History. Organized in 1963 and assigned to AG JAVO, formerly AG SUDORIENTO, in 1964. Conducted a cycle of intensive jungle and mountain warfare training followed by one in amphibious landing techniques. Alerted for landings in Celebes in February 19__, received a change of orders while at sea and landed near Surabaya, Java, on 27 February. Meeting light resistance at first, it advanced rapidly along the Surabaya-Surakarta axis but was stopped by determined resistance outside of Surakarta. Reinforced by the arrival of 44 CAA forces, it resumed the advance on 10 March and took Surakarta the next day. On 13 March it took Semarang. Advancing along Java's north coast, it occupied Tjirebon and by 18 March — was closing on Djarkarta from the East.

Remarks. Equipped with TYRANT tanks.

Unit History. Date and place of organization unknown. Identified as a new army group only

after the Gulf of Siam landings. In January 19__, it landed the 28 CAA near Singora, Thailand, and the 29 CAA near Kota Bahru, Malaya. It achieved total surprise by selecting least likely areas on an undefended coastline facing shallow and very difficult waters. At first met only light and disorganized opposition so that it succeeded in reaching Gemas on 25 January 19__. The impracticable eastern coastal areas were bypassed. Spreading its two armies along the Malacca-Mersing line, it began to push southward. Allied resistance had been stiffening constantly and by 30 January AG MALAJO's southward offensive had been stopped between Gemas and Johore Bahru.

Unit History. Organized in the eastern Homeland in 1963 or 1964. Reported to be with AG ORIENTO in 1964. It landed near Singora, Thailand, in January 19__, and was positively identified as subordinate to AG MALAJO. Meeting only light opposition, the 28 CAA moved across the peninsula to Alor Star then pushed south through Penang down to Gemas where it linked up with the 29 CAA coming down from the northwest. Deploying in the western sector of the army group's line it began to advance southward but by 30 January 19__ Allied opposition had stalled the advance near Kluang.

Remarks. Equipped with TYRANT tanks in place of the standard Aggressor medium tanks.

a. 20 Motorized Rifle Division, 28 CAA, AG MALAJO, AZIO.

CHAPTER 7

REGIONAL COMMAND NOVAKOMMANDO

Section I. GENERAL

7-1. General

Activated in 1958 to direct Aggressor operations in Europe. It has no official command responsibility for satellite forces but in practice exercises operational control over them. In 1964 and early 1965 it heavily reinforced its AG NORDO with a preponderance of tank forces. It has no resupply problems and can count on further reinforcements from HEJMKOMMANDO. Its January 19__ deployment and offensive present the picture of classic Aggressor basic offensive maneuver of single envelopment with the main effort being prepared in AG NORDO's sector while AG OCCIDENTO acts as the pivot to pin allied forces against the southern Alps.

7-2. RCN Order of Battle

CODE NAME DINAMOCODE NUMBER 000005AREA OF RESPONSIBILITY Europe-HQ: Central Europe

Commander: Marshall DIMITRIOFF, Kon-tanz

Deputy Commander: G/A's SHIFF, Petro

Chief of Staff: G/Air LIAO, Kang

Subordinate Army Groups:

AG NORDO (AGN).

AG OCCIDENTO (AGO).

AG SUDO (AGS).

7-3. Miscellaneous Regional Command Units

These forces include SAM units, mostly RAMMER, communications, medical and other service units. In addition, there are two unidentified divisions of anti-guerrilla forces protecting the command's lines of communications. Available naval forces include a small number of troop transports and an undetermined number of missile armed patrol boats.

Section II. ARMY GROUP NORDO

Unit History. Organized in 1958 in the Homeland and assigned to HEJMKOMMANDO. Originally had one combined arms army and one

tank army. In June 1960, it was reassigned to NOVAKOMMANDO and sent to replace AG SUDO in south central Europe. In November 1960, in coordination with AG OCCIDENTO, it launched a major offensive and succeeded in reaching the Danube River line before being stopped. In 1961, moved into the northern sector of the western European front replacing satellite forces. Received an additional combined arms army in May 1961. In October 1961, it launched a large scale offensive across the Elbe. By November it has reached the Weser River line where it was forced to halt. An allied counteroffensive in November forced the army group to withdraw and by the end of December it was back behind the Elbe. In 1964 it was reinforced by the arrival of another combined arms army and a second tank army. It 19__ it received a third tank army and another air army while divisions were added to its existing armies.

Unit History. Organized in 1958 and assigned to Army Group NORDO. Arrived in south-central Europe in 1960. Participated in the 1960 offensive. Moved to the northern European sector in 1961. Formed the Army Group second echelon in the October offensive, was severely hit by nuclear fires in the course of that offensive and withdrew with the army group behind the Elbe River. Its units had been brought back up to full strength by 1964. In April 19__ it was deployed

in the army group's second echelon behind the 25th CAA with 19th CAA.

Unit History. Organized in 1958 and assigned to AG NORDO. Took part in the 1960 offensive in south-central Europe. In September 1961, after units of the 19 CAA had secured crossings on the Elbe, it spearheaded the push to the Weser. A portion of its lead tank division had succeeded in crossing the Weser in November 1961 but was cut off and captured or destroyed. Successfully covered the December retreat to the Elbe. In February 1964 received a fourth tank division.

In April 19__ it was reported in the army group's second echelon.

Unit History. Organized as Alianco Support Command in 1956 to command and control all Aggressor forces in satellite countries of Europe. Given additional mission to train satellite forces. Reorganized in January 1960 and redesignated AG SUDO. Assumed responsibility for Danube section of European front in March 1960. While still in the process of replacing satellite units in that sector with its own units, it was hit by a surprise Allied offensive and suffered such severe losses that it could no longer be counted upon to hold its assigned sector. Replaced by AG NORDO and AG ORRIDENTO, it was returned to the Homeland after being stripped of the few remaining units with an acceptable degree of combat effectiveness. Reorganized and re-equipped in 1963-64, it underwent intensive training in a mountainous area of the homeland. In 19__, arrived in Southeast Europe to replace satellite forces in that sector.

Unit History. Organized in 1958 and assigned to HEJMKOMMANDO. Reassigned to NOVAKOMMANDO, it moved into South-central Europe to relieve AG SUDO in July 1960. In November 1960, in coordination with AG NORDO, launched a major offensive and succeeded in regaining the ground lost by AG SUDO. In January 1961, the 8 CAA and the 3 Air A were assigned to the army group and it was designated to man the south-central European sector. In October 1961, it launched a limited offensive north of Regensburg, in connection with AG NORDO's large scale offensive. The offensive was repulsed by the Allies but their subsequent counteroffensive was halted by the 5 Tk A. In 19__ and 19__, its several attempts to cross the Danube between Passau and Regensburg were not successful.

Unit History. Past history unknown. First identified in the 1961 campaign as the 2 CAA's left flank division. The failure of the adjacent 18 Mtr Rfl Div to continue the offensive left the 22 Division exposed in a salient and the subsequent Allied counterattack threatened to cut it off from the rest of the army. The intervention of 5 Tk A units erased the threat of encirclement, but the loss of men and equipment was high. In April 19___ reported to be the left flank division of the 2 CAA's first echelon.

Unit History. Organized in 1947 with some of the oldest elite divisions of the Aggressor Army. In 1954 spearheaded the invasion of the European nations adjacent to the Homeland. Assisted, by suppressing widely scattered revolts, in the establishment of a Firm Circle-Trigon central over the conquered nations. Returned to the Homeland in 1956. In 1958 lost its 2 Mtr Rfl Div to AG KALIFORNIO. In January 1961, it was assigned to AG OCCIDENTO. Held in reserve in the 1961 offensive. Reported to be in the Army Group's second echelon in the 19__ offensive.

CHAPTER 8

REGIONAL COMMAND HEJMKOMMANDO

Section I. GENERAL

8-1. General

This command was activated in 1950 to command and control the home groups in the Homeland. Has overall responsibility for the defense of the Homeland and to provide combat ready forces to back up those regional commands in the combat zones. Supervises the research and development effort intended to provide special types of units for operations in special environments. In 19__ known to have directed this effort to prepare some of its forces for extended operations in a desert environment. It also appears that it is training a large force in the far eastern Homeland with major emphasis on amphibious tactics.

8-2. RCH Order of Battle

CODE NAME DEFENDICODE NUMBER 000004AREA OF RESPONSIBILITY Aggressor Homeland-HQ: Aggressor Capital

Commander: Marshal BROTKOPFV, Georg

Deputy Commander: VAM KRONEBERGER, W. E.

Chief of Staff: G/A HASUR, M.P.

Subordinate Army Groups:

AG ALARMO (AGA).

AG FLUGO (AGF).

AG ORIENTO (AGO).

AG VIGLIO (AGV).

8-3. Miscellaneous Regional Command Units

The location of this command makes for a low percentage of identifications and a scarcity of confirmed information on the activities of its units. No identifications are available beyond what is listed under each of the four subordinate army groups. A very large force, of army group size, is known to be in training in the eastern Homeland. It does not appear as if it is intended to remain under HEJMKOMMANDO once it has completed its training. No units within this force have been identified, but the name USONO is reportedly associated with it.

Unit History. Organized in 1950 as Home Group III, with one CAA and two Air corps, and intended for the protection of the southwestern and westcentral regions bordering non-Circle Trigon countries. In 1961 it was redesignated AG FLUGO after being thoroughly reorganized and considerably increased in strength. It is claimed by Aggressor to be completely air-transportable and capable of reaching any part of the globe in a very short time in full combat readiness. In addition to its own two Air A, it is known to have first priority on Aggressor GHQ strategic air transport units. Although based in the western Homeland, its units undergo continuous air mobility training and in 19__ an entire CAA was reported in the southeastern region for a short period of time. Only one of its present subordinate units, the 75 Mtr Rfl Div, 46 CAA, has been known to have been airlifted to a foreign country.

Unit History. Date of activation unknown. First identified when it was airlifted to the pro-Aggressor desert republic of Dawhah in 1964 to reinforce the local forces against a threat from a bordering country. The unit was not committed however, and in March 19__ it was airlifted back to the Homeland.

8-13. 49 Tank Army, AG FLUGO, HEJMKOMMANDO

Date of activation unknown. Assigned to AG

FLUGO in 1961. In 19__ reported to be located in the desert area of the south central region of the Homeland.

8-14. 4 Air Army, AG FLUGO, HEJMKOMMANDO

Nothing is known about this army other than its subordination to AG FLUGO.

8-15. 22 Air Army, AG FLUGO, HEJMKOMMANDO

Nothing is known about this army other than its subordination to AG FLUGO.

8-30. Miscellaneous Army Group Units

The following units have been reported in the southcentral region of the Homeland. They are believed to be AG VIGLIO units, remaining in the Homeland, but their immediate subordination is not known:

208 Motorized Rifle Regt.

332 Motorized Rifle Regt.

52 Mdm Tk Regt.

CHAPTER 9

GENERAL HEADQUARTERS (GHQ) UNITS

9-1. General

The units listed below have been identified as GHQ units. Due to the special cloaking and identity and activities of these forces, only a relatively small number have been identified. The Homeland is given as their location, however, they may appear in any theater of operations at any time. The commander of GHQ forces is confirmed to be Marshal WUERTZFELD. The deputy is reported to G/A's SALLAOV.

PART THREE

REFERENCE DATA

CHAPTER 10

PERSONALITIES

10-1. General

a. This chapter contains an alphabetical listing of those Aggressor armed forces officers currently identified. The name, rank, branch, and present assignment are listed. Abbreviations of rank designations are defined in chapter 22, FM 30-102.

b. Numerous changes to this list can be anticipated as a result of the effects of war as well as Aggressor administrative actions. Revised lists will be published by USAICS upon request.

10-2. Roster of Identified Personalities

<i>Name</i>	<i>Rank</i>	<i>Branch</i>	<i>Position and unit of assignment</i>

CHAPTER 11

CODE NAMES

11-1. General

a. Code names are permanently assigned to regional commands, army groups, armies, divisions and brigades. Subordinate elements of these units, not normally assigned to code name, share the code name of their parent organization.

b. Code names are usually single words and are selected under no identifiable system. For security reasons, Aggressor units in the field are sometimes referred to by code name only. Code names often appear as part of the unit mailing address replacing the unit's numerical designation. In identifying units by their code name, care must be taken to insure that the word being analyzed is in fact a code name since the name of the commander is also often used to refer to a unit.

11-2. Listing of Identified Code Names

CHAPTER 12

DOCUMENTS AND CODE NUMBERS

Section I. DOCUMENTS

12-1. Identification, Pay, and Service Card (IPS) (fig 12-1)

a. Each person of the armed forces receives an IPS issued by the Personnel Main Directorate. The card expires 3 years after it is issued.

b. The front of the card identifies the individual, stating his name, rank, service number, branch and unit. It gives his date of birth (DOB), place of birth (POB), height, weight, color of hair, color of eyes and blood type. It is signed at the bottom by the bearer.

c. On the left-hand portion of the inside pages, further information will be found regarding the soldier's date of entry into the armed forces (DOE), place of entry (POE), schools attended and awards (entitlement to decorations and campaign ribbons). If the bearer is a member of the Circle Trigon Party, the party membership card number will be listed at the bottom along with the countersignature of the issuing officer.

d. On the right-hand portion of the inside pages, the bearer's pay record for a 3-year period

will be found. Each time the individual is paid, the paymaster will place the amount given and initial the appropriate monthly block.

e. On the reverse side of the IPS are listed the regulations regarding its use and misuse. Conforming with usual Aggressor practice, it will be noted that the penalties are severe for unauthorized entries or unauthorized use.

12-2. Circle Trigon Party Card (fig 12-2)

a. Issued by the Secretariat of the Circle Trigon Party, the front part of the card contains the name and signature of the bearer, his sponsor and his party number, and the countersignature of the secretary of his party cell. At the bottom of the card will be found the bearer's assigned party number and the date the card was issued.

b. Annotated on the reverse side of the card are the party card rules. Severe penalties are authorized for violation of the rules of the Party and the unauthorized carrying of the card is considered a serious criminal offense.

PARTY CARD RULES

1. Valid until withdrawn.
2. Only persons swearing allegiance to the party's principles may carry this card.
3. Loss of card must be reported immediately.
4. This card is not transferable.

Figure 12-2. Circle Trigon Party card, English.

Section II. CODE NUMBERS

12-3. General

a. Code numbers are permanently assigned to each unit in the Aggressor armed forces. Aggressor, for security reasons, often refers to specific units by their code numbers. Code numbers for

regional commands and army groups are completely arbitrary, while codes for armies and lower units follow a definable system which is outlined below.

b. Aggressor utilizes a code number system

in which each unit is assigned a six-digit number. It is believed that the code number system can be broken and personnel utilizing this manual are encouraged to conduct their own analysis of currently identified code numbers and attempt to break the code. To date it has been determined that there is a correlation between the fourth digit and the size of the unit.

c. Aggressor mail addresses may utilize a combination of unit designation and/or code numbers or code names coupled with area designations.

12-4. Method Used to Determine Aggressor Unit Code Numbers

a. Each digit of the Aggressor 6-digit unit code number indicates information about the unit, as shown by the following chart:

First digit	Second digit	Third digit	Fourth digit	Fifth digit	Sixth digit
Unit designation	Sub-type	Unit designation	Size	Unit designation	Type

b. The first, third and fifth digits of the Aggressor unit code number indicates the unit's numerical designation. These digits are determined as follows:

Step A: Multiply the last number of the Aggressor unit's numerical designation by 50. (As an example, we shall use the 24th Anti-tank Battalion). Multiply the 4 by 50 = 200

Step B: Add the entire numerical designation to the answer in Step A, above.

(24 is the entire numerical designation + 200 = 224

Step C: Reverse the answer obtained in Step B, above to obtain the first, third and fifth digits of the Aggressor unit code number. (Reverse the 224 and the unit code number becomes 422. These become the first, third and fifth digits of the Aggressor unit code number.)

Note: The conversion table to ease steps A, B, and C is as follows:

Conversion Table for First, Third, and Fifth (Unit Designation) Digits of Aggressor Unit Code Numbers

	$\frac{1}{50}$	$\frac{2}{100}$	$\frac{3}{150}$	$\frac{4}{200}$	$\frac{5}{250}$	$\frac{6}{300}$	$\frac{7}{350}$	$\frac{8}{400}$	$\frac{9}{450}$
1	1-150	2-201	3-351	4-402	5-552	6-603	7-753	8-804	9-954

400	401-154	402-205	403-355	404-406	405-556	406-607	407-757	408-808	409-958
	411-164	412-215	413-365	414-416	415-566	416-617	417-767	418-818	419-968

c. The fourth digit of the unit code number designates the size of the unit, as explained by the following table:

- (1) Companies and/or Batteries
- (2) Battalions
- (3) Elements
- (4) Regiments

(5) Brigades

(6) Divisions

(7) Armies

d. The second and the sixth digits of the unit code number determine the sub-type and the type of the unit concerned, and are determined by using the table that follows:

Types (6th digit) and Sub-Types (2d digit) of Units

Type	Sub-type	Type	Sub-type	Type	Sub-type
1	COMBINED	5	AIRBORNE	8	AIR
	1 Signal		1 Medical		1 Helicopter, Light
	2 Signal Operations		2 Anti-Tank (?)		2 Helicopter, Medium
	3 Signal Interceptor		3 Artillery		3 Helicopter, Heavy
	4 Target Acquisition		4 AD Artillery		4 Recon
	5 Anti-Tank		5 Signal		5 Fighter
	6 AD Artillery		6 Engineer		6 Bomber
	7 Recon		7 Chemical		7 Ground Attack
	8 INTEL		8 Motor Transport		8 Transportation
	9		9 Target Acquisition		9 Headquarters and Service
	0 Arms		0 Airborne (Regt/Div)		0 Observation and Air
2	TANK	6	ENGINEER	9	SERVICE
	1 Light		1 Mine		1 Medical
	2 Medium		2 Amphibian		2 Propaganda
	3 Heavy		3 Construction		3 Motor Transportation
	0 Tank		4 Bridge		4 Headquarters and Service
3	ARTILLERY		5 Ponton (Medium)	0	ROCKETS/MISSILES
	1 122mm SP Gun		6 Ponton (Heavy)		1 Nerono (Rocket Launcher)
	2 130mm Gun		7 Ponton		2 MRL 140mm
	3 152mm Gun—Howitzer		0 Engineer		3 MRL 240mm
	4 152mm Gun—SP	7	CHEMICAL		4 SAM RAMMER
	5 203mm Gun—Howitzer		1 Mine		5 SAM RAIDER
	6 240mm Mortar		2 Flamethrower		6 SAM
	7 310mm Gun SP		3 Offensive		7 SSM RANCOR
	8 400mm Gun SP		4 Recon		8 SSM RAVAGE
	9 Heavy		5 Smoke		9 SSM REBEL
	0 Mixed (also Arty Div & Regt)		6 Equipment Decontamination		0 SSM Heavy (Also SSM Division)
4	MOTORIZED RIFLE		7 Personnel Decontamination		
	1 Rifle, Mountain		0 Chemical		
	2 Rifle, Jungle				
	0 Motorized Rifle				

e. Example of How to Obtain the Unit Code Number for the 24th Anti-Tank Battalion:

Steps 2A, 2B, and 2C, above explain how to obtain the first, third and fifth digits, which are 422. The unit code now looks like this: 4 2 2 2 2 2 1

The fourth digit designated the size of the unit (c above): A battalion is rated as a "2", making the code 4 2 2 2 2 2 1

The second and the sixth digits designate the sub-type and the

type of the unit as determined by the Type, Sub-type Table attached. Anti-tank is rated as "5" under COMBINED. "5" becomes the second digit in the unit code number: 4 5 2 2 2 2 1 Since Anti-tank falls under the TYPE of COMBINED, and since COMBINED is rated as "1" the sixth digit becomes "1" in the code number: 4 5 2 2 2 2 1 The entire Aggressor unit code number for the 24th Anti-Tank Battalion is 452221.

Section III. CODE NUMBERS

12-5. Listing of Identified Code Numbers for Regional Commands and Army Groups

Code number	Unit
000001	RC ATLANTICO
000002	RC PACIFIKO
