Methods of implementation:

Indoctrinate cadre and Party members on the resolution concerning the Fall Campaign to make them fully aware of the requirements and missions of the campaign, accurately assess the situation ~~do their part~~ to fulfill their duty and recognize enemy shortcomings and our capability to overcome difficulties.

Train cadre and Party members to hold their areas of operation and stay close to the people to motivate them. Consolidate our old base areas to use as stepping-stones to establish new ones by conducting three-pronged attacks.

Apply drastic measures to clear our penetration bases of enemy spies and agents.

3. ACTIVITIES TO BE PERFORMED IN THE PROVINCE CAPITAL AND DISTRICT SEATS:

Requirements:

Indoctrination: Make cadre and Party members understand their historical mission and realize the extremely important role of the province capital ((in the struggle)). Thus, they will have to step up the struggle movements of students, workers, laborers, disabled veterans, and people from all walks of life by using political slogans.

During the three months ((of the Fall Campaign)), they should motivate 6,000 people to conduct concentrated and scattered struggles ((against the enemy)). Three of these struggles should have from 1,800 to 2,000 participants. Each city sub-ward and city quarter should conduct one struggle per month with the participation of 20 persons or more to demand improvement of the people's living conditions. ((Cadre and Party members)) should guide the people in the various areas to conduct continuous scattered struggles.

Motivate the people to turn their hatred of the enemy into revolutionary activities, fight the Puppet oppressive control of the population, and participate in the people's guerrilla warfare movement to regain control ((over local areas)).

((Page 5 of O.T.))

Applying the three-pronged attack tactic, use all three ((types of forces ((main force, local force, and guerrilla force)) to conduct attacks to kill 65 enemy personnel. Of these nine attacks, four are to be conducted against his rear bases, storage facilities, and key agencies.

Continuously use detonations ((possibly of explosive charges)) to drive the enemy into confusion.

Contain the 834th Regional Force Company in its area to prevent it from reinforcing other areas.

Develop the forces of hamlets, wards, and branches of the city so they have enough agents, especially in-place agents, inside the city. Improve the skills of the old, courageous agents who used to dare to conduct bold activities. Recruit new agents among laborers and workers, particularly those working at power stations and water supply plants, etc ... ((sic)).

City Inner-Area 1: Recruit three Party members and two Group members.

City Inner-Area 2: Recruit three Party members and two Group members.

City Inner-Area 3: Recruit four Party members and three Group members.

Women's Association: Recruit 250 new members.

Laborers' and Farmers' Association: Recruit 300 new members.

Intermediary class: Recruit 100 new members.

We should also try to control overt trade unions such as taxicab, pedicab, and three-wheel Lambretta drivers, peddlers, bargemen, and civil servant unions, school discipline boards, and parents-teacher associations. We should activate many more "newspaper-reading cells" to conduct propaganda.

Methods of implementation:

Conduct indoctrination for cadre and Party members to make them understand the requirements and missions of the Fall Campaign, accurately assess enemy and friendly situations, and be determined to hold their areas of operation in order to attack the enemy and motivate the people.

Train cadre and Party members to understand the procedures and methods of operating in cities.

Stay close to the people to understand their ideology and aspirations in order to motivate them to conduct struggles against the enemy and join our revolutionary organizations.

All branches should plant their agents in the inner city areas to motivate the people to struggle against the enemy and establish an agent network to follow his activities.

Improve the skills of agents and indoctrinate them to make them realize the importance of the political struggle, so that they will be determined to build the political forces.

The ((Sa Đéc)) City Party Committee is to select City Inner-Area 3 as the "leadership point" ((possibly meaning area on which leadership will concentrate its greatest efforts)); Tân Phú Đông Sub-Ward in the suburban area as the main objective area; and Tân Qui Tây Sub-Ward as the secondary objective area. At the same time, it will have to gain the leadership of all struggle movements in ((Sa Đéc)) City.

Specific requirements:

All forces in the inner cities, enterprises, factories, branches, and among important social groups such as laborers, peddlers, porters, pedicab and three-wheel Lambretta drivers, and bargemen. Party members and students must try to recruit additional members among these social groups to establish Party Chapters.

Specific requirements:

a. Political and ideological tasks:

The Resistance for National Salvation against the US has reached the final phase. The US imperialists and their henchmen are going to pay for their crimes. However, the closer we approach the victory, the fiercer the struggle will be.

((Page 6 of O.T.))

It is, therefore, necessary to strengthen the revolutionary viewpoint of our comrades to make them understand the new situation and favorable opportunities, and recognize our great victories in both Cambodia and Laos. These victories have forced the enemy to disperse his troops widely, showing many shortcomings and deficiencies, especially since the US imperialists began to expand the war throughout Indochina.

Properly evaluate the enemy and friendly situations. Resolve to implement the Party's strategic decisions and meet the requirements and missions prescribed for 1970, especially the requirements and missions of the ((1970)) Fall Campaign. Understand immediate missions: master all methods of operation; popularize the concept of self-help for self-improvement; consolidate our ranks to conduct continuous offensive and uprising activities to gain control ((of rural areas)); and prepare to sacrifice our lives to accomplish all missions assigned by the Party to liberate ((SVN)).

Improve our attitude toward the masses and promote discipline and organization and a good attitude toward work. Eliminate passivism, pacifism, rightism, fear of sacrifice and fierceness of war, reliance on higher echelons and lack of self-confidence, and confidence in the people. Avoid standing aloof from the people. Combat lack of discipline, disunity among internal organizations, dereliction, and procrastination.

b. Strengthening and development of forces:

Development of forces:

The requirements for the development of forces is to recruit, within a period of three months, 32 Party members and 31 Group members in inner city areas, suburban areas, slums, enterprises, factories, branches, and among important social groups such as laborers, peddlers, porters, pedicab and three-wheel Lambretta drivers, and bargemen. Party members and students must try to recruit additional members among these social groups to establish Party Chapters.

Specific requirements:

Tân Hưng Sub-Ward: Recruit four Party members, four Group members.

Tân Qui Đông Sub-Ward: Recruit three Party members, two Group members.

Tân Qui Tây Sub-Ward: Recruit four Party members, three Group members.

Tân Phu Đông Sub-Ward: Recruit four Party members, four Group members.

The City Inner-Area 1: Recruit three Party members, three Group members.

The City Inner-Area 2: Recruit three Party members, two Group members.

The City Inner-Area 3: Recruit four Party members, three Group members.

Security Force: Recruit two Party members in the inner city areas.

Students: Recruit five Party members and 10 Group members.

Improve Party and Group members who displayed lack of enthusiasm and determination in performing their tasks, passive and rightist tendencies, fear of sacrifices, and "legalism" ((meaning a desire to gain GVN legal status)).

Study resolutions on the ((1970)) Fall Campaign in order to be aware of the new situation and opportunities, as well as the new missions. Eliminate passivism and promote a positive attitude toward work.

Control the performance of assigned tasks by our personnel to help them improve and correct their weaknesses.

Sub-wards and inner city areas which already have ((revolutionary)) organizations should try to consolidate them and conduct training for their members to make them understand their mission as leaders in the motivation of the people.

Improvement of Party members and establishment of Four-Good-Quality Party Chapters:

Conduct additional training for Party Chapters which were considered good in order to convert two of them to Four-Good-Quality Party Chapters by the end of the ((1970)) Fall ((Campaign)). Prepare a plan to help Party members in weak Party Chapters become Four-Good-Quality members.

((Page 7 of O.T.))

Training of cadre:

((Sa Dec)) City Party Committee is to conduct additional training for promising personnel who are most likely to become city Party Committee members and assign city Party Committee members to follow their activities and

relate then strengthen their three good concepts which are: Concept of understanding revolution, concept of the use of violence, and concept ((of behaving properly)) toward the masses. At the termination of the campaign, those who have these three good concepts must be recommended for admission to the city Party Committee. To this end, regular training should be conducted for prospective members.

c. Increased production and collection of taxes:

Increased production:

Coordinate with farmers to control production and get accurate figures concerning acreage cultivated.

Instruct ((farmers)) on how to kill rats and insects to protect crops and how to harvest crops rapidly and maintain their farm products.

Tax collection:

Having studied Directive 26/CT-70, various sub-wards, areas, and branches have properly assessed tax collection during the past and worked out effective plans to help cadre and Party members meet the requirements for tax collection during 1970.

Based on the situation and the ((financial)) capabilities in each area, the city Party Committee set requirements for the tax collection during the ((1970)) Fall Campaign as follows:

The City Finance and Economy Section:	600,000\$ ((SVN))
Tân Quý Đông Sub-Ward	: 700,000\$
Tân Quý Tây Sub-Ward	: 1,000,000\$
Tân Hùng Sub-Ward	: 100,000\$
Tân Quý Đông Sub-Ward	: 100,000\$
The City Inner Area 1	: 50,000\$
The City Inner Area 2	: 50,000\$
The City Inner Area 3	: 50,000\$
All branches in the City	: <u>350,000\$</u>
Total	: 3,000,000\$ (three million piasters).

Measures for the collection:

Sub-wards should find and motivate the farmers who have not paid taxes in order to finish the collection of agricultural taxes.

Train cadre to collect agricultural, industrial, and commercial taxes.

Set up interception points on land and water communication lines to collect taxes from vehicles and boats.

During attacks against the enemy, try to capture war booty. However, do not use the booty without permission.

Indoctrinate and motivate our troops, workers, laborers, and all personnel to increase production to insure sufficient supply for their units and agencies. Motivate the people to contribute clothing and money for the troops.

Make receipt and expenditure estimates, and prescribe regulations for the management and registration of funds and the settlement of accounts.

Development of ((tax collection)) forces:

The ((Sa Dec)) City Finance and Economy Section should recruit one more semi-legal cadre to be in charge of collecting industrial and commercial taxes.

During the ((1970 Fall)) Campaign, each sub-ward should recruit at least one cadre to be in charge of financial and economic affairs.

Measures for implementation:

((Page 8 of O.T.))

Train our comrades on resolutions concerning the activities to be conducted during the ((1970)) Fall ((Campaign)) to make them understand the new situation and opportunities and the favorable conditions which our people and troops in SVN now enjoy so that they can accomplish their 1970 missions. Although our people and troops in local areas are faced with many difficulties, they do have many opportunities because the enemy has many shortcomings and weaknesses. Every cadre and Party member should be determined to overcome all difficulties to accomplish their 1970 missions.

The city Training Section should open Party cell training courses in places where Party Chapters have been established, both in the inner areas of the city and in its suburbs. Within three months, 15 ((Party)) cell leaders should be trained.

Through the study of directives concerning the ((1970)) Fall ((Campaign)), strengthen the concept of unrelenting revolution for our cadre and troops, assign them specific missions, and closely control their performance of these missions to detect shortcomings in time to correct them. Efforts should be made to heighten the fighting spirit of weak comrades who display a passive attitude in performing their tasks. Plans should be made to conduct additional training for young key agents who have the potential to become Party members. Organize training on the nature and purpose of the Party. The monthly assignment of missions should be specific with control and improvement plans worked out. Recruit more Party members to meet the requirements prescribed for Jul 70.

Establish plans to improve Group members similar to those for Party members. Motivate the zealous people, especially women, to join the Group and train them to become good Group members.

The city Party Committee is responsible for improving the capabilities of its members from now until the end of the Fall ((Campaign)). Report results to higher echelons. The Organization Section should help Party Committee echelons provide good guidance, effective leadership, and close control for the implementation of plans and the activities of our comrades.

Re-establish contact with comrades who were released from enemy prisons and comrades with whom relations were broken. Check their present activities in order to assign missions to them.

Leadership task of Party Committee echelons:

Party Committee echelons are responsible for disseminating directives concerning activities during the ((1970)) Fall ((Campaign)) and reviewing the activities of the ((last)) Spring ((Campaign)) to **ascertain** strengths and weaknesses and gain experience to conduct attacks more effectively during the ((1970)) Fall Campaign. Party Committee echelons should pay attention to providing leadership for the activities in inner city areas, in slums, and in various enterprises.

Transform Tân Quý Tây and Tân Phú Đông Sub-Wards into strong areas; eliminate suspected persons; and disseminate experiences gained to other areas.

Keep abreast of enemy and friendly situations in hamlets, slums, and wards to establish proper plans for developing strengths and eliminating shortcomings which may limit the development of our ((struggle)) movement.

Assign cadre of all branches to infiltrate the inner city areas and suburban areas. Assign missions to those cadre who have not yet infiltrated these areas. Do not let them remain idle.

Coordinate the three types of forces ((main, local, and guerrilla forces)) to conduct three-pronged attacks in both areas ((possibly urban and rural areas)).

While conducting attacks against the enemy, pay attention to strengthening our forces, because only when we have strong forces can we insure the conduct of continuous attacks against the enemy.

Intensify attacks against secondary objectives to disperse enemy forces, so that we can concentrate our forces to attack main objectives. Intercept any enemy reinforcements to insure victory.

Consolidate the commo-liaison system between the inner city areas and suburban areas and the Permanent ((Section)) and insure that reports are promptly sent to higher echelons. Attention must also be given to establishing a communication line for guerrillas.

Step up military proselyting activities, closely coordinating them with military and political activities. Break the enemy oppressive control of the population to create enthusiasm among the people to struggle and gain control of their areas. Follow the progress ((of military proselyting activities)) to detect weaknesses to take appropriate corrective

action. Command echelons must master the two ((basic)) operating methods ((possibly the overt and covert methods)) and the compartmentalization principle to maintain secrecy, thus avoiding compromising our mission and jeopardizing the lives of our key agents. But we must guard against being so afraid of suffering losses that we do not dare to attack the enemy.

Make all cadre understand their missions and assign them to their designated areas of operation to attack the enemy and carry out the missions of their branches and those of the local areas.

Strengthen military proselyting machinery by recruiting additional military proselyting cadre.

Plans for breaking the enemy oppressive control of the population should be specifically and elaborately worked out in accordance with the situation of each hamlet, ward, and laborers' living quarters.

Initiate a military proselyting attack phase with specific plans, careful organization, close control, and detailed reports to correct shortcomings and gain experience.

Implementation task.

The ((1970 Fall)) Campaign will last three months. In the first climaxing phase of this campaign, each local area should try to gain great achievements to create enthusiasm for the two following climaxing phases. V

Villages will use this ((plan)) as training material.

Study this plan in the light of the ((1970)) Fall Campaign plan of ((Vinh Long)) Province Party Committee and Directives No's 17 and 18 CT.70 and achievements gained during the ((last)) Spring Campaign throughout the province.

After study, command echelons must work out a plan to provide leadership for the campaign and an implementation plan for subordinate cadre.

Cadre of various branches at district and sub-ward levels should complete the study of this plan by 25 Jul 70 and disseminate it among the people for study on 26 Jul 70. Provide leadership for the people living in main objective areas and disseminate this plan to them prior to 20 ((Jul)) 70. On 25 Jul 70, send a report on the dissemination of this plan to higher echelons. On 30 Jul 70, ((Sa Dec)) City Party Committee should send its implementation plan for the 1970 Fall Campaign to the province Party Committee.

The time for cadre to study ((this plan)) is two days, one day for study and one day for working out plans for Group members. The people should study it for one day.
