The document states that although the armed elements of Z1 scored significant victories from the ((1970)) Spring Campaign to date, they failed to effectively accomplish their missions. The disruption of the ((RVN)) accelerated pacification program and ((GVN)) administrative control was unsatisfactory and the damage to ((RVNAF)) Regional and Popular Forces was insignificant. District local force ((companies)) and guerrilla elements were understrength due to difficulties encountered in recruitment.

During Operational Phase MT ((possibly third phase of the 1970 Fall - Winter Campaign)), three-pronged attacks were to be intensified to deal deadlier blows to the enemy. Efforts were to be made to cut ((RVN)) YYJXBX - ENQS ((possibly communication routes)). The VC and CIDVEN - WNBSHYAI ((possibly sapper and secret guerrillas elements)) were to be used to attack enemy AB-PQ-LQ ((possibly command posts)) and logistical facilities.

((Possibly the 1970 Winter Campaign)) would consist of HI - MC ((possibly two phases)). During the MC-DI-MT ((possibly the third phase of the 1970 Fall - Winter Campaign, i.e. the first phase of the 1971 Winter Campaign)), attacks were to be launched primarily on enemy ZWVCSYNBV - MNYVAI, AB - EXMI - DSQSBX, PQ - LQ ((possibly airfields, gun positions, POL depots)), communication routes, and command posts. MC - HI ((possibly during the second climaxing stage of the first phase, 1970 Winter Campaign)), violent attacks were to be conducted against enemy JYZXAI - ZVCNDSBV EYCNCBY - EVCNBSDV ((possibly key military installations)). Troops at district and province levels were to increase their attacks from DQ to HQ ((coded dates)) and guerrillas, from HQ ((coded date)) to the end of the climaxing stage.
