

Sept 1

For the past two weeks I have been building firebases. The work is long and hard but the life is easy and secure. When we came to this hill it was just a hill. Now it has bunkers, fighting positions and trenches. Sandbags and more sandbags is all I have seen this week. The only problem is that the soil is easy to dig in, too easy. The foundation is very weak. A heavy rain could wash it all away. The hill was burned off by flame drops. There are no plants, trees or grass on the hill.

It is now raining and getting dark. I am under a poncho in my hamic, so life isn't so bad. Today was a good day. We worked but not real hard and we also did get a lot accomplished.

It's getting too dark. I am ~~thinking~~ thinking about school starting, September 1st.
