Ravens of Long Tieng

Town Meeting

Residents of Long Tieng, the CIA's secret air base, surround a Helio Courier, one of the aircraft flown out of Long Tieng and prized for its short-takeoff-and-landing capability. The families of Hmong soldiers lived on the base with them.

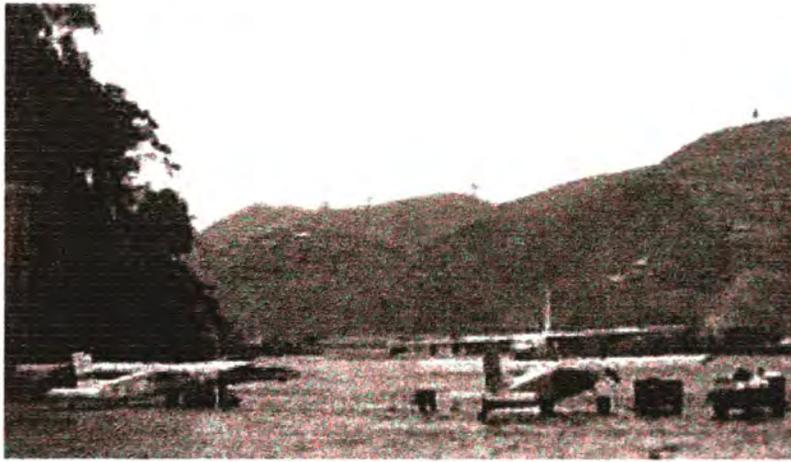

Entering the pattern

The Long Tieng airstrip lies nestled between some low hills, as seen over the nose of a Helio Courier entering the traffic pattern to land.

Overflight

The Long Tieng air base, seen from above.

The ramp

Two Helio Couriers and a transport sit on the ramp (such as it was) at the Long Tieng airstrip.
