TOP PERFORMANCE — PROVEN RELIABILITY — FUNCTIONAL ELEGANCE

A HOT HUMID CLIMATE MUDDLES CREATIVE THINKING, retards efficiency and productivity. It is therefore no accident that advanced industrial countries are mostly in temperate and colder zones.

AIR CONDITIONING provides ideal weather for human comfort or industrial processing, and is destined to provide an equal opportunity for the people in the Tropics. When an air-conditioner is made available at low costs to own and operate, such as the Weatherite, it ceases to be a luxury, but rather accelerates development by providing a comfortable environment that is conducive to health and productivity.

DEDICATED TO THESE AIMS, we have the knowledge, facilities and experience to provide for the design and manufacture of a complete range of air-conditioning and refrigerating apparatus for comfort and industrial applications, such as window units, package units, central plants, & air-conditioning & refrigerating equipment for textiles and electronics manufacturing, quick-freezing and cold storage, plastic-mould cooling, photo-processing, colour-printing, testing laboratories, etc., tailor-made for your requirements.

PROGRESSIVE FIRMS & INDUSTRIALISTS are welcomed to send in enquiries for distributorship or assembly in their own countries.

CHINA COLD STORAGE & ENGINEERING CO. LTD.

(Manufacturing Licensee of Westinghouse Electric Co., U.S.A.)

Takshing House, 1st Floor, Hong Kong.
