

[illegible]

During this reporting period, a review of the U.S. Air Change orders to plans for the Pa Atom School that have been completed or are under construction was made. This information was furnished in a memo to AEC recommending that the plans for the Pa Atom School be reviewed and where applicable these changes be incorporated in the plans prior to bidding. A meeting was held and all parties concerned had the opportunity to express their views. AEC is presently making the necessary changes and revisions required and that will be necessitated by these findings.
