

OFFICE MEMORANDUM

May 5, 1971

TO: Mr. C. Teacher Training Adviser

FROM: Myron C. Charles, Administrator

SUBJECT: Monthly Report for April 1971

Problems

One problem that we can do nothing about is that the water table at K-9, as on the rest of the Vietnamese Plain, is getting lower. The pump for well number six, which has a source of water, is pumping air but the well recovers in about two minutes. Water is still being released and we are sure we will get through until the end of school without serious trouble.

Progress

1. A new Administrative Assistant has been provided this office by Personnel. He has turned out to be major and competent and responsible. Mr. Erikson has already checked out the inventory of non-expendable items of the San Thome EPL in Vietnamese and the EPL at Ban Kieu. For the month of May he will be taking the EPL driving course.
2. Through the good office of the EPL, the EPL was provided and the new school was completed. For the month of May the new school has been visited by them and approved by Bangkok and reports.
3. The school building, which was built in the school was destroyed by EPL. The road has been completed and is now the new road on the school grounds at K-9.
4. Cement pads have been built around barn yard number five and number six to protect the buildings and the school and the pump and the school.

5. Well number five was blown out by compressed air to remove sand that had accumulated in the well. The pump has been repaired and replaced in well. The electric pole at this well has been replaced by a new one as the old one was terrible rotten. Rather than make a permanent electrical connection for this one we will wait until the house is built and then the electricians will make all electrical connections will be made.
6. The other water pump has been replaced. Also new pipes are being installed in the emergency generator in well number five. This is being done by the school electricians.
7. The water meter has been replaced by a new one which has shown an average flow of about eight gallons a minute.
8. Ben, who for the KMI were given a new SMB and all rods at this school are now ready for the rainy season. The demonstration school received the equipment of equipment. It was given to the school by the school committee.
9. Four water pumps for the school are now being repaired by the school committee.
10. A water pump engine for the school is now being repaired by the school committee. This pump is now being repaired by the school committee.
11. A water pump engine for the school is now being repaired by the school committee. This pump is now being repaired by the school committee.
12. A water pump engine for the school is now being repaired by the school committee. This pump is now being repaired by the school committee.
13. A water pump engine for the school is now being repaired by the school committee. This pump is now being repaired by the school committee.
14. The latest amount of eggs, parts and materials have been processed.
