DELEGATES PRAISED, URGED TO IMPLEMENT CONGRESS RESOLUTION

Hanoi HANOI MOI in Vietnamese 3 Jun 77 p 4

[Text of closing speech by Le Van Luong, member, Executive Committee of Hanoi VCP Organization, to the Congress of Delegates of the Hanoi Party Organization on 2 June]

[Text] Dear comrades,

After 9 days of urgent and enthusiastic work with the spirit of full responsibility and the concept of true democracy, our congress today comes to an end and it was a success. We discussed and unanimously decided about the basic task of our party organization in the new stage; about the urgent and actual work to be done in the next 5 years in the political, economic, cultural, social, security and military fields; about the masses' revolutionary movement and the need to consolidate the administration and mass organizations; and about raising the party's leadership capacity and fighting power. We elected a new executive committee of the party organization to carry on the task of leading the party organization toward fulfilling the resolution adopted at the congress in order to meet the legitimate needs of the people of the capital city, a task that is also a very necessary contribution of our party organization and our people to the country as a whole in the first years after we enter the urgent task of national construction.

Our congress was successful because of these reasons: the draft report presented at the congress had been ardently discussed by all of our party organization members and had later received ideas from a large number of residents of the capital city. In addition, as it was reported to the VCP Central Committee, the central government and sectors had offered many precious ideas; as the congress progressed, we had the secretary general of the VCP Central Committee who came in person to express many additional ideas about the task of the party organization, which gave us another basis to affirm the road and tasks lying ahead of us. While the congress was being held, many units and individuals in the capital city especially continued to send ideas to it. How impressive were the ardor and enthusiasm of the people toward our party organization! Once again may I, on behalf of the congress, sincerely welcome and thank the worker class, the collective farmer class, the white-collar

workers and all strata of the population of the capital city for having contributed very many precious ideas, organized productive labor emulation campaigns as enthusiastic greetings to the party organization congress and used other forms of activities to encourage us.

Dear comrades,

Our congress was a success. That is something very encouraging for us. But we all know that to have a congress resolution is but a first step -- sometimes a very small step -- as compared with our entire revolutionary task. Once we have a resolution, we must implement it at any cost and make it truly become reality and have the effects of pushing production ahead and improving the standard of living. Therefore, the resolution of the congress must later be really widely popularized and understood among the party organization echelons and in the masses in order to be unanimously and resolutely implemented through total and creative measures.

The new party organization executive committee must have a positive, active and unified program of action and must concentrate its leadership on directing each work to be completed at specific times. It must be sensitive, closely follow the situation, be able to gather enough ideas from comrades and the people and other party organizations, truly display democracy and stress the spirit of criticism and self-criticism. It must both improve the working method, perfect the party organizations, the administration and mass organizations and improve the arrangement of men and machines in order to concentrate to the highest degree the intelligence and fighting power of the party organization as a whole and the masses on implementing the resolution.

Those are the things that the new executive committee will have to do. But implementation of the resolution must be assured by all party organizations being responsible for actively organizing it and by you delegates, who have contributed to creating the resolution, as you go to your own units, localities and production installations to promote its resolute implementation.

As to the implementation of the congress resolution, particularly in the case of major goals, we will be determined to develop the working people's collective ownership right and to let them discuss and display the spirit of striving to achieve things. We believe that if the masses had contributed many ideas at the time we prepared for the congress and while the congress was meeting, they would surely offer more ideas and ensure and control the implementation of the resolution if we attached importance to such ideas and honestly motivated them.

If all party organizations at all levels show concern about controlling and pushing things in a rigid manner, if the masses everywhere show concern about controlling and pushing things in an active manner, and we certainly believe they will, we will surely be able to properly implement all the correct resolutions of the congress.

Finally, before we close the congress, let us sincerely thank the delegates of the Municipal Fatherland Front Committee, the representatives of the two party organizations of the fraternal Democratic Party and Socialist Party, the representatives of the command of the capital city and the veteran party members for having attended the congress and brought to us the solidarity of the Front and friendly parties and the very close cooperation between the army and the party and between the old and the new cadres, which symbolize the precious unity of the party and the people as a whole, the reason for all of our victories. We wish you all good health and success in every work.

On behalf of the congress, let me welcome and thank the cadres, workers and civil servants from different sectors who devotedly served the congress day and night, created favorable conditions for the congress to do its work and thus contributed to the success of the congress.

We wish all of you delegates good health as you leave the congress and may you have joy in your heart, enthusiasm, solidarity and peace of mind in order that together we do our very best to successfully implement all the resolutions of the congress.

ECONOMY BUILDING GENERAL DEPARTMENT UNITS COMMENDED

Hanoi QUAN DOI NHAN DAN in Vietnamese 28 May 77 p 1

[Article by Le Dinh Hy: "Economy Building General Department Promotes Political Ideology Education Mission and Party Building Mission Among Economy Building Troops"]

[Text] Recently the Party committee of the Economy Building General Department convened a political conference to evaluate the strengths and weaknesses of the political ideology education mission and Party building mission of the preceding period conducted by the divisions and regiments directly subordinate to the Economy Building General Department, and at the same time set forth positive guidelines, tasks and methods for strengthening ideological education, Party building and other political tasks, for the purpose of fulfilling and surpassing the plan for the second quarter and for all of 1977.

During the latest period, many regiments and divisions transferred to economy building missions, among them, capital construction, road building, railroad and forestry units..., they made many organizational and procedural adaptations for activities at mountain forest sites, and faced many obstacles in installations, materials, and equipment. But thoroughly understanding the Party Resolution, the units actively and regularly carried out in an excellent fashion the mission of political ideology education and looked after the tasks of developing and strengthening the Party base organization. Therefore, both cadre and troops firmly maintained their will to fight on their new battlefield and fulfill their assigned tasks in good fashion. Representative were road work Groups Nos 8, 35, 531, 575, 30 and 22; material production Group No 15; capital construction Group Nos 61, 85, and 600; forestry Groups Nos 537 and 14 and so on.... The conference heard several reports on experiences in the political ideology education mission, the Party building mission, the cadre mission... in road building, railroad, forestry and capital construction units.

The conference carefully discussed and profoundly realized much more about political ideology work and Party building work in the new situation and
