From 35 75-5 At 1700 hrs. I took out a security sweep with 6 EM from my NL. I headed out 50 meters to the S and hit a trail. After we hit trail we continued W on trail. We traveled approx. 100 meters. The point man saw what he thought were two enemy. He engaged. I brought my element on line and reconed by fire. Then we swept forward and found two friendly EM from my element. At this time we called a dust off. At this time I returned to my NL.

I questioned members of the squad that these two EM came from. These two EM one of them had been told by myself to take two EM from his squad. The EM was told to take this EM to check NW of his gun position. At approx. 30 meters from his gun position he was to check out AO for trails. At this time the only thing that I can think of that happened is that the two EM went in the wrong direction. They were also 100 meters from the NL.
